OFFICERS and members of labor unions, lend me your ears for a moment. You have

THE CLEVE-

never known your power, because you have permitted the capital-ists to make the issues and line out the cam-

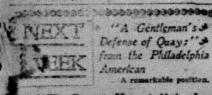

paigns. All the secret bribes which many leaders have doubtless taken has been because you have divided your vote between two capitalistic parties. You have never had a party of your own and have had no places of henor and trust to give the men who would have served you faithfully and Unappreciated, they have served their own interests and betrayed you. When you control offices they will serve you. See what the laboring element in Cleveland, Ohio, did in the recent campaign, Jones' sympathy was the cement that made them pull together and they carried the city over both the old parties' combined vote! Do you know what that means if they would do it in a city election and thus have the places of power and henor? It would mean that labor would control capital as it should instead of capital control of labor. There is no difference in the character of the people of Cleveland and any other city in the land. Organized labor can control every city because its votes, the vote of its' friends and sympathizers are in the majority. Do that, and thousands who are outside the labor unions will at once join the unions. The way to build up the unions is to show the power of your unions, and in no way can you do that so thoroughly as to show it by your votes.

Political parties will never bid for your votes until you shew your power and independence. When you do as the laboring people in many European countries have, you will find all the political parties in this country willing to serve you. They will make such laws as you wish and will enforce them. That is what labor unions in New Zealand have done there in five years. No one can hold office there who does not have the support of the unions, except such as are appointed by the crown and you wear the crown here if you will only put it on your head The social democratic party has always been your champion, has always fought your bat-tles, and is composed of labor union people and their friends. Will you not rally to it, build it up, elect your ablest members to office under its banner, and then you will have laws that will be just to you? Able men who have stood aloof from you because you gave your votes to your political enemies will serve you as they serve your peopie in Germany, France, New Zealand and other countries. De semething, be some-Give year officers and leaders to understand that they are to serve YOU and that right service will bring greater power and honor than ever capitalist can give them and you will get honest service and honor yourselves. Again I repeat, be something!

Ir you were to catch fish do you believe that you should give part of them to some other fellow who should claim that he owned the ocean or lake? Would it not be absurd? But is it not really as absurd to give up part of what you fish out of the ground to some fellow who says be owns the ground? Did not nature make the ground as well as the water? If it'were the law, you would have to pay rent or tithing for fishing the same as you do for land. By the same law you can make ground the same as water. And that the without interfering with the possession of others or having them interfering with you. You only look upon the earth as private property because you have been educated to it from childhood. It is to give up a part of their labor to those who neither fish nor catch bait. Of course so long as the millions who do the work are willing to support laws that make them keep few in idleness the few will be pleas ed to have them do it, and will insist it is right. But why be such a goose?

Under the new law the banker can take the money you deposit and buy government bonds, the government will then give his money for the full face of the bonds and let him keep the bond and draw interest on it. The banker can then pay the depositor the money the government has given him, and he has made the interest on the bond for the full time it has run. When the depositor returns the money again, the banker can repeat the game so long as he can buy bonds. at the depositor, if he has the bonds, cannot get the government to issue him money -that would be rank anarchy, don't you

Mr. ROCKEFELLER is a very influential citizen. He is building up a family of "quality" in this country, as the royal families of Europe and Asia were built. He has started in to manage the finances of the nation. He owns the control in several of the largest banks in the country. The principal one of these is the City National of New York. Without any warrant in law this bank has just been made the depository of all the funds of the United States raised through internal revenue-a sum amounting to a million a day. You will notice here how private interests viciate public service. The use of this money is a virtual gift of about \$16,000,000 a year to the bask. A half dozen families in this country now control an amount of money equal to all the money of all kinds in the United States! To control the money is to control the nation. No one can go into any great business without their consent and must pay tribute to them or quit. There was a bank up in Boaton that bowed not the knes to these giants and loaned money to some

A READER wants a definition of wealth Wealth is a mental estimate of a thing. A great storehouse of meat

would not be wealth to

a people who would not

WHAT IS WEALTHR

use meat. Gold would net be wealth to a Robinson Crusoe nor to the Utopians. Wool would not be considered wealth to a people who had prejudices against its use, as were the ancient Egyptian priests. Beautiful stones would be the opposite of wealth where the ground was covered with it and the occupier needed soil. It would be wealth in other places, as the custom and conditions had made needs. A mean with a ton of gold would not be considered wealthy unless there were some people in need of his gold. John Ruskin has somewhere said, (some bad friend has borrowed my copy and failed to return it or I could put my finger on the paragraph,): "Imagine a man with

From Chicago comes a dispatch to the effect that railroad rates are to be advanced throughout the country the first of the year. Nobody will believe that there is any encuse for this action. All the reports shew that the past has been a very prosperous year with the traffic associations. They have been making money and should be satisfied. Their contemplated action in this master will promote socialism.—Republican Exchange. can Exchange.

That shows how blind you are, brother. What better excuse for raising prices do the owners of the roads need than that they want more money out of the people for the same service? The presperity they have experienced during the past year is pleasing and they want more of it. Are you sates fied when you have made money? Do you not want to make more? And lastly, as the tiresome preacher would say, if their action will promote socialism you should be delighted, for socialism will enable you to enjoy life more than you have ever heped for. It will enable you to have an income of more than \$5,000 a year, and insure it to each of your children, and I am sure that the average republican local editor never had any such income. Why not want a little of the prosperity possible to all people Does the carrying of a pass vourself? equalize what you would otherwise gain without a pass? Look into this thing of socialism, brother. Men who have accomplished much in the world have not turned a deaf ear or a blind eye to any new and untried theory that has been presented to them, They have investigated and finding it reasonable have acted on it and because the many would not, have made successes that have astonished the world. Suppose Mr. Rockefeller, and I use him to explain a principle only, had turned a deaf ear to any other method of doing business except the old methods, he would have been a common tanner as are those who worked with him who have not been mentally recipient, Something or somebody, it matters not which, suggested to him better methods and he studied them out. He did not curl up his lips in disdain or disgust at the novel Those who had better opportunities but opposed -new methods are down in the world while he is up. Look at a proposition on its merits-net on the man who is telling of it. A bad man or a foolish man may and does have occasionally good ideas. What you seem most to fear, brother, is the good thing about this raise in rates, a thing that will benefit you more than anything that could happen in this world-more than a million of dollars given to you. That is what I see in it after investigation and that is the reason I am a socialist. may be a fool but you can not knew it until you have investigated the subject. You would be feelish to cendemn semething you have not thoroughly investigated, some thing especially that has millions of intelligent advocates. Am 1 not right?

A READER asks. "Has not private owneringliand encouraged private home building,
a thing of wonderful consequence to the social
condition of every nation? What per cent, of
farmers would invest a single cent in permanent improvements on land that all bidders
would have an equal right to compete for the
use of? What would hinder sacculators rentuse of? What would hinder speculators rent-ing large tracts and farming it with expensive machinery and gangs of hired laborers who could never hope to compete with their besses?"

As I look about and see the things the people call homes I should say that private ownership has encouraged the building of few real homes. Shelters, ves, but homes, no. And most of the houses are occupied by tenants, and even worse ones owned by the occupant would be better for the secial condition. Three-fourths of the people of this country live in rented or mortgaged Would they not fare better to pay their rent to the public treasury to be us for public purposes than to pay it to landlords to spend in useless rioting and folly? You assume that with the public ownership of land the occupier would of necessity build the shelter. I think that the public could and would do that and do it better I think that the public than ever private ownership did it. Why in Glasgow and other cities they have torn down the houses that private ownership built as unfit for human babitation and erected dwellings that private interests would never have built, and rented them for prices that would be impossible with private ownership. If this plan were done on a national scale it would fill the earth with homes—not such things as we now have. This would apply to the farmer as well as the artisan, but the farmers would soon want to live in cities where they could have all the advantages of association and would not compete Yor land. The land would and should be farmed by the nation. That would make conditions that would remove the possibility of your last fear about big speculators. None of them would be able to compete with the whole people in the use of machinery of production and distribution. And there you have run up against the absolute end of it again socialism.

THE executive committee of the ways and means committee of Kings Co., N. Y., democ racy recently passed resolutions that paper money not bimetalism is the solution of the financial question; demanding that the party take up the labor question and deslare for the public ownership of public utilities, such as railroads, telegraph, telephones, etc , and for raising all taxes on land values. The party begins to smell the smoke of the bat-tle that the socialists have been bearing for years. Just a straw to show the drift of public sestiment, that is all. PRIVATE property provents progress. If a bridge or building or machine is to be constructed, the buy-ing price of the ma-terial causes the light-

A CLOG ON PROGRESS.

Nearly overy railroad bridge casualty is the result of skimping in the material in order to lessen the money cost that profit be increased. Things are made to make the most immediate profit, at the expense of safety and usefulness. There are hundreds of patents locked up by the Western Union that would make great improvement in the service, but it would cost too much and is not used and that corporation prevents others from using. Houses are constructed that will pay a per cent. regardless of beauty, sanitation and durability. When these things are con-structed by the while people—under socialism-for use, the cost of material will be what human time is consumed to produce it, and everything will be made as permanent and perfect as possible, that it may last as long as the nation shall need them. In other words, everything will be constructed for permanency not profit, just as the government builds its public buildings today, which are better than other buildings, notwithstanding the vandal hands of the political contractor. Under socialism all the genius of the nation would be given the opportunity to develop, all would be invited to aid in the work of making the world a more beautiful place to live in. Today most of the genius is tled by peverty, has no chance to develop and is lest to the world. We point with pride to the progress in farm work. But had the nation developed agriculture it would have invited all the genius, would have offered a wide field where the most expensive implements could be applied economically, where the labor could be specialized and made more perfect and productive, and farm work would require no longer hours than any other vocation, instead of the 16 hours of dirty drudgery that it is. The competitive system is now a clog on progress.

In a private letter from a freind in the southwest, saying he had made an effort unsuccessfully to get any subscribers for the APPEAL, he explains as follows:

"The majerity of people here are very hard up, crops were shert and many failed to raise their mortgages and have to be carried over some paid out but it took all they had and the only chance to live is to open up accounts under mortgage for the next year Politically here the people are apathetic and indifferent and say there is no use going to the polis, that a change can only come through the musket and bayourt and that they are ready when the time is ripe for action."

This is the saddest part of the whole

political situation. This condition is true

not only of this particular locality, but letters of similar import come to my table from almost every locality in the nation. It is not the view of one man but many. expressions are not made by socialists but by the deceived who yet vote the old party tickets when they vote at all. Those who express themselves thus are ignorant politically, never read anything except what their party bosses control, are opposed to social-ism because they know nothing about it, hate socialists because they are teld they are wanting to revolutionize the country, yet they are the very ones who are ready to take up the gun and torch and inaugurate a revolution worse than the French epi-sode that sent a chill of horror through the world. . Of course the students of event see this thing coming and are trying to avert it by getting relief in a change of system, but the capitalist class, ignorant and arrogant, and are preparing the people to do the most desperate things that has ever been done. The working people are divided and will suffer nearly all the pain such anarchy will bring, but in it the rich will reap the seed they have sown and from the very class they have kept as dupes. Any man with a thimble full of brains knews that the present conditions, which this writer has hinted at as a reason he could get no readers for this paper, cannot much longer continue. The strikes of the republican and democratic voters against the bosses in every section shows how strained are the social how ready the men are to fight against the men and measures that they vote to uphold. In these industrial battles men forget they are democrats, republicans, Catholic or protestant, and in the troublous times coming they will sink all these differences and in their blind wrath will strike at the employing classes as the cause of all the misery their own duplicity has permitted to exist. Woe to the people who are keeping the masses ignerant party slaves that they may fatten of their misery and thoughtlessness. The greater the oppression, the more vicious laws are passed, the deeper the misery of the people, the more like wild beasts will be the people in the day of blind wisth. Those who are controlling the wealth of the nation are foreing conditions that make for that awful time.

A'schung to operate all the ide plants in the southern cities, by a powerful syndicate is being perfected. It will drive out of the market all the little fellows, even if it has to less money for a time. Gentlemen, you are going to have monopoly, whether will or not, and would you rather own them or have the capitalists own them? That is the only question left you to decide. Corporationism or socially, which shall miss?

people who wanted to transact business in

copper, which was against the pleasure of Mr. Rockefeller, who has exhibited a desire

to monopolize that industry and stop com-

went contrary to the Rockefeller plans. Its assets were thrown on the market, all the independent copper stocks that it held as collateral were also at the mercy of the street. It is suspected that Mr. Rockefeller and his friends were not displeased at this state of affairs, especially as it enabled them to pick up coveted stock at ene-fourth of what they would otherwise have had to pay for it. The small capitalist must go. The man with a million or two is a small capitalist. Don't be deceived by the anpearance of good times during this year. It is the good times a may enjoys when he mortgages his home and spends the money foolishly. Pay day will come. Concentration is the order of the day. It is going on, because in the nature of things it cannot stop. All industries will yet be in the hands of a very small number of the peo-ple. Then it will be ready for socialism. All these transactions, that fill the ordinary man with fear and misgivings, are food for congratulation to socialists. We see in congratulation to socialists. them the preparation for the overthrow of the capitalistic system. Each of these break and wake up some hundreds or thousto the real situation. could in no other way be reached. They need less condemning than explaining. The foundation for the socialist state is being rapidly builded.

A LETTER from a friend in Washington City says: "Since you called attention to it (the 13th annual report of the Labor Commissioners) there have been more of them sent out than any other book in the same time that has ever been issued by the government." Brother workers, that is what you have done by giving the APPEAL i's wonderful circulation. I claim no credit, for what I have done is nothing to the corabined work you have been doing. That report is the most revolutionary document ever issued by any nation on earth, and it is free if you will write for it. Armed with this, you can dethrone any man on earth who upholds the present system of industry. See what socialists can do when they unite to build up a great engine. The APPEAL is what you have made it, and you can well be proud of your work.

In Germany the pawn shops are run by the government. In Berlin the profit from st year was about 1 per cent. It is really too bad that 50 per cent. to 590 per cent, profit was not permitted to be exterted from the poor by the enterprise of her capitalists! The poor should be skinned for everything they can be forced to past with—that is the way we do it in free America. Would be no freedom, you know, if the authorise to be a second if the wealthy were not free to go through the peckets of the needy. What is the use of having money if the government loans to those who can be forced to pay the great-est usury? The herrible slavery of having the public prevent extertion from the poor!

The APPEAL in clubs of 25, 25c per year,

a vast estate, with cattle on a hundred hills, with fields of growing glaids and a noble castle overlooking the whole, while the sands in the streams were of virgin gold. You would doubtless count this man rich. But suppose that no man was in need of his gold, his cattle nor of his grain? He would have to bake his own bread with his own hands, his eastle would rot for repairs, his cattle would wonder off and become wild and he could not gather his grain which would rot in the fields. No one would take riches on such terms. To become rich he must arrange things so that somebody must be in need of his gold or his land, that he may compel them to serve him. Riches then mean that we must arrange the greatest possible inequality in our own favor. This is not so well said as Ruskin put it, but contains the essense of what wealth is. When we refer to wealth we have in our mind conditions that will enable us to control the labor or services of others for our pleasure. That is what Horace Greeley called slavery. But wealth can be different. Wealth can be a benefit to all and an injury to none. That it is not so today is because control to public control and you will have as certainly changed the effects of it as the present conditions produce present effects. Private wealth is everywhere bad-public wealth is everywhere good, except . where private wealth influences it for private gain.

In Texas the prisoners, as I notice by a description in the El Paso Daily Herald, are taken to the state prison chained together by the neck. You have often shuddered, if you are humane, at the pictures of Siberian exiles thus chained on their way to their living death. You probably failed to see that the same spirit is just as prevalent here. When men only herd together with the one aim of seeing how much they can make off each other, this spirit will always rise. The present industrial anarchy making beasts of the people. Men what their surroundings make them, or else environment has nothing to do with them and they will be just as good and intelligent raised up in ignorance and vice as if raised up under the most refined and elevating in flaences. We are so civilized in this country that we burn people at the stake, we send men to prison for offending the king (judge), we herd men in bull pens under heat and cold while their families starre, we wreck men's fortunes that we may fatten off the ruin, we polson food if by it a few extra pennies may be made in profit, we cheat in the clothing, in the buildings, in the instruction and entertainment, and even the pulpit mere often than otherwise serves the devil rather than God, because the calary will be the greater by the deception for the wrong teaching. Yes, we are civilized with a capital C.

# Men Who Have Lost Their Way By Count Leo Tolstoi

Men are cons. lous of the wretched-

ness of their condition, but the one thing that wood ameliorate it they are un'willing to do.

\$

This article was written in Russia and translated for the Independent by Nathan Haskell Dole.

Travellers were making a journey. And they happened to lose their way, so that they found themselves proceeding, not on a smooth road, but across a bog, among clumps of bushes, briers and fallen trees, which blocked their progress, and even to move grew more and more difficult.

en the travellers divided into two parties; one decided not to stop, but to keep going in the direction that they had been going, assuring themselves and the others that they had not wandered from the right road, and were sure to reach their journey's

The other party decided that as the direction in which they were now going was evi-dently not the right one-otherwise they would long ago have reached the journey's end-it was necessary to find the road, and In order to find it it was requisite that without delay they should move as rapidly as possibly in all directions. All the travel-

ions; some decided to keep going straight ahead, the others decided to make trials in all directions; but there was one man who, without sharing either opinion, declared that before continuing in the direction in which they had been gonig, or beginning to move rapidly in all directions, hoping that by this means they might find the right way, it was necessary first of all to pause and deliberate on their situation, and then after due deliberation to decide on one thing or the other.

But the travellers were so excited by the disturbance, were so alarmed at their situation, they were so desirous of flattering themselves with the hope that they had not lost their way, but had only temporarily wandered from the road, and would soon find it again, and above all, they had such a desire to forget their terror by moving about, that this opinion was met with uni versal indignation, with repreaches, and with the fidicule of those of both parties.

It is the advise of weakness, cowardice, sloth," they said.

"It is a fine way to reach the end of our journey, sitting down and not moving from the place!" cried others.

For this are we men, and for this is strength given us, to struggle and labor, conquering obstacles, and not pusillanimous ving in to them," exclaimed still others. And in spite of what was said by the

vere divided between these two opin- man that differed from the rest. 'how if we proceeded in a wrong direction without be well for us for a time to stop moving in changing it, we should never attain our that direction, which is evidently wrong, goal, but go further from it, and how we hould never attain it either if we kept flying from one direction to another, and how the only means of attaining our way was by taking observation from the sun or the stars, and thus finding what direction we must take to reach it, and having chosen it to stick to it\_and how to do this it was necessary first of all to halt, and to halt not for the purpose of stepping, but to find the right way, and then unfalteringly to go in it,, and how for either case it was necessary to stop and consider, -in spite of all this argument, they refused to heed him.

And the first division of the travellers went off in the direction in which they had been going, and the second division kept eir course, but neither division changing th succeeded in attaining their journey's end, but up to the present time, moreover, they have not yet escaped from the bushes'and the briers, but are still lost.

Exactly the same thing happened to me when I attempted to express my doubts as to whether the road which we have taken through the dark forest of the labor question and through the all-swallowing bog of the endless armament of the nations is exactly the right routs by which we ought to go, that it is very possible that we have

lost our way, and that, therefore, it might in consequence. It would seem that the be well for us for a time to stop moving in first main application of energy which should that direction, which is evidently wrong, be put forth ought to be directed, not to and first of all to consider, by means of the universal and eternal laws of truth revealed to us, what the direction is by which we intend to go.

No one replied to this, not a person said, "We are not mistaken in our direction and we are not gone astray; we are sure of this for this reason and for that."

Not a person said, "possibly we are mis-taken, but we have an infailable means of correcting our error without ceasing to move.

No one said either the one thing or the other. But all were indignant, took offence, and hastaned to quench my solitary with a simultaneous outburst.

"We are so indolent and backward; sluggishness, inefficiency!"

Some even went so far as to add: 'It's all nonsense! Den't listen to him.

Follow us." And they shouted like those that reckon

that salvation is to be found in unchangedly travelling a once selected read, what ever it may have been; like those also that expect to find salvation in flying about in all di-Why wait? Why consider? Push for-

ward! Everything will come out of itself!"
Men have lost their way and are suffering

the confirmation of the movement that has seduced us into the false position where we are, but to the cessation of it. It would seem clear that as soon as we stepped we might, in a measure, comprehend our situation and discover the direction in which we ought to go in order to attain true happiness; not for one man, not for one class of men, but that general good of humanity toward which all men are striving and every human heart by itself. But how is it? Men invent everything possibly, but do not hit upon the one thing that might prove their salvation, or if it did not do that, might at least ameliorate their condition; I mean, that they should pause for a moment, and not go on increasing their misfertunes by their fallacious activity. Men are conscious of the wretchedness of their condition, and are all deing what they can to avoid it, but the one thing that would assuredly ameliorate it they are unwilling to de, and the advice given them to do it more than anything else rouses their indignation.

If there were any possibility of doubting the fact that we have gone astray, then this treatment of the advise to "think it over" proves more distinctly than saything else how hopelessly astray we have gone and how great is our despair!

DIRECT LEGISLATION

Let the people alone rule by voting directly fer all laws under which they are to This is the only way to maintain a true republic .- Kast Tomas Reformer.

Direct Legislation is not only a method, but a principle—the principle that "the people must rule." Without this principle there is no such thing as liberty. - Lynity.

Direct legislation will knock out plutoeracy in the first round. It will restore America to Americana. It will make it a free and happy nation exec more. It will help destroy partylam, which is the bane of American politics, and will wipe out boss-ism. Therefore, les us study it. - The Re-

In any country fit for democratic institutions the common people are scarcely less informed and far more disinterested than the classes that take meat active interest in public affairs. The men who desire by public employment, and the servants of the moneyed jobbing interests, are the persons who now have the most potential voice in government in the United States. Are they better informed concerning political matters, or more houses than other classes of society? (Nathan Cree, Direct Leg. p. 14.)

No. Direct Legislation is not a panacea for all national ills. In fact it is not a panacea at all. It is merely a spoon with which the panacea can be administered. Specific legislation is the panacea for political ills, and Direct legislation is the method by which this special legislation can be secured. A sick man may need a number of different medicines, but they can all be administered with one speen. If the nurse went to get a spoon with which to adminis ter the medicine, you would not say that she considered a speen the paracea for all the sick man's all. - Equity.

"Direct Legislation asks the people only to understand their own interests. all that any one can ask without being guilty of an act of felly.

The masses are endowed with an inimi table capacity of going straight to the heart of a great legislative question and deciding it is accordance with the principles of eternwhereas this capacity and good faith can munifest themselves but seldem among a body of pretended legislaters, who, in addition to their class interests, are blinded by pride and prejudice. Who has not observ-ed the spontaneous intelligence with which the masses will settle questions that for ages have been reading the bair-splitting brains of the privileged classes without be ing determined? In a recent discussion of Direct Legislation one opponent, a widely known literary man, wanted to know how the people could be asked to settle the grave question of the separation of church and state, a question which the most learned disputants can give no solution of. There a subdued murmur among the audience at this question, and a workman asked 'The people,' he said, 'will decide that these who want to pray may eay their prayers. Religion is a private af-fair.'—Exchange.

What is legislation? It is simply the changing of a petition to a mandate. When a certain (say five) per cent. of all the qualified voters of a district (town, city or state) have signed a pe-tition and filed the same with the proper of scials, it becomes mandatory to these offcials to submit the matter petitioned for to the voters of the respective district at the next ensuing election by having it printed, by its title only, on the ballet in same manmer as now is done in veting on constitu-tional amendments, issuing of bonds, etc.

Direct Legislation-Law-making by the

The Initiative—The proposal of a la

ground as the constitution; they are above the powers of the co-ordinated branches of a government, and can only be amended or annulled by the same power that exacted them—the people. [Definitions by Gustave R Wickert 1- Direct Legislation.

INITIATIVE, REFERENDES AND SQUEIGNTY MANDATE EXPLAINED.

We knew of no better way to explain the Initiative and Referendum than to give the substance of the constitutional amendment adopted by the people of South Daketa at the election of 1888.

The Initiative-The amendment provides that whenever 5 per seat, of the veters of the state petition the legislature to pass a law they most pass it; it matters not how much the legislature may be opposed the petitien is imperative, and submit it to the people at the next general election. If a majority voted for the law it is enacted; if a majority vote against the law it is null and void. Any person may draft a law and any person may circulate the petition. This gives the people of South Dakota the power to pass any law they want over the heads of the legislature, it matters not how much. the legislature might oppose it.

The Referendum-Whenever the legislature of South Daketa, on its own motion, passes a law, it does not take effect until sixty days after its passage. If before that date 5 per cent, of the voters petition that the law be submitted to a vote of the peo ple then the law will not go inte effect until voted on by the people, which will usually be at the next general election. If a ma-

ing, if a majority vote against and void. This is the Referen tain laws which must necessaril fect immmediately are expect Referendum.

SOVEREIGNTY MANBA' The Sovereignty Mandate is the people to petition for a ve-law declared unconstitutional preme court. Then the law is a rote of the people and if a for the law it is constitution standing the decisien of the centrary. Thus the living p the sustainers of a living With the Initiative, References

ereignty Mandate in the hands of the peop'e no power on earth could prevent them al justice and natural equity, with which from ruling this nation. We would then bounties, not for the benefit of one or two their interests must necessarily accord, have a government in fact as well as in private cornections but for all the coord, have a government in fact as well as in h can name, by the people, of the people and for heng a the people. No Justice Shiras could change favor, as usual of the Standard Cil conhis opinion in four weeks and knock out an income tax law, and thus shield the wealthy classes from bearing their just burden of the government. No legislative body could ignore the demands of the people. If they passed an objectionable law the people with the Referendum would knock it out at the polls. If they failed to pass such laws as the people wanted they would initiate and pass them anyhow. Who that believes in them anyhow. liberty, freedom, and independence can op-pose these just demands?—The Rerefere dum.

#### Incentive.

In the co-operative commonwealth there will be no incentive to rob. There will be no reward for the efforts which makes of one man a millionaire and at the same time produce a thousand paupers. There will be no meentive for women and children to make shirts for 29 cents a dozen. There will be no incentive for men to gain political office for material gain to individuals. But there will be an incentive for all mankind to live honestly? There will be an incentive to work honestly when we know that the full reward for labor will belong to the laborer. When men are not robbell of their inventions they will have much more of an incentive to invent labor saving machinery. Under ialism there went be any incentive to de grade our fellew man, but there would be an incentive to elevate him, for the simple reason that his elevation would be to the advantage of society. In the co-eperative commonwealth there will be no incentive to pass laws in the interest of individuals. All laws would be for the whele, passed to the whole people, and there would be a faceative to pass who laws only.

### AMERICAN NOTES

An actors trust is the latest

There is much talk of re-organizing the A. R. U.

A 568,000,600 threshing machine trust is being formed.

New York new has a brick trust with \$15,000,000 capital.

A malt cressa trust has been organized in New Jersey with a capital of \$1,250,060.

South America is "trusting," too. The latest there is an \$89,000,000 nitrate trust.

Every effort should be made to circulate socialist literature among our unconverted

The sweeping advance in freight rates b all the trunk railroads indicates the kind of presperity we are having. Henry Clews, the banker, says that wages

have been advanced five per cent, and commedities afteen per cent. Heading in the Kansas City Times: "Salvation army will feed thousands of hungry

people on Christmas day." Social democrats have organized branches at Corington, Ry., Malausazoo, Mich., Hyde

Park, Mass., and more are on the woy. The Order of Railroad Telegraphers has

affiliated with the American Federation of Labor. That's right, boys; get together. The Chicago and Northwestern railway

next year will tremendously tuse of socialism. Takes only worganize a branch of the S. D. P. The Denver News well says: "A way

must be found to make good use of nature's

pany in the bribery suit. Attorney-General Monette charged that the company had tried to bribe him with an offer of \$400,000.

The American Federation of Labor passed the following resolution: "That we recommend workingmen to carefully study the development of trusts and monopolies with a view to the nationalizing of industries."

Would you like to convert your temperance friend to socialism? See that he l copy of next week's APPEAL. It will con-tain "Socialism and Drink," showing that socialism alone will cure drunkenness. Order 100 copies; 40 cents.

The city of Chicago has, within the past two years, passed five ordinances tenching department stores. The department stores carried the cases to the supreme court. On Becember 18 the court decided the five ordinances unconstitutional and void.

It would cost \$10 to talk five minutes over the telephone line between Girard and Boston. In Switzerland you can use the entire 6,000 miles of telephone for a whole year for \$16. Switzerland owns the tele-phone system. Uncle Sam don't.

In New York city a woman was dis disguised as a man shoveling snow with a foreman she cried bitterly and appealed wildly to remain. 'I've a sick husband at home," she cried, "and we are starving."

buried by contract at one-eighth of a cent each. Even at this price there is a large prefit the contractor recoups himself by appealing to the decreased relatives not to have a purper's funeral, etc., and so has prefit, profit, profit. unty paupers who die in Denver will be

A Kansas City alderman advertised to A Good Thing Wont Hurt Anybody. give two rabbits to every poor family that called at his office. The World adds to this thusly: "There are lets of people in this big rich city who have not the price of a Christmas diaper." Great Scott! thought everybody had prosperity!

Judge Gates has issued an injunction against the striking Kausas City leather workers. Some day those leather workers will vote a social democrat ticket. Judges worldn't be needed under socialism, and under socialism such men would eat bread by the sweat of their ewn brow.

The elevator trust and the great railread trunk lines have combined to fix the price of wheat which the farmer thall receive, and likewise the price which the consumer shall pay. Charles Councelman, the boss of the Chicago grain elevator system, says, under sworn testimony, that five men in Chicago meet every morning and fix the price of wheat for that day. The American farmer, who raises the wheat, likes this. Any how, he votes for it.

State Owned Railways.

The attention of those fearsome souls. who believe government ownership of railways is a foredoomed failure, is invited to the case of New South Wales, as set forth in the October number of the Railway and Engineer Reviews.

According to a communication from the secretary of the New South Wales railway commission, which the Review prints, government ewnership has done all its advecates claim it can be made to de. The government has good service, kept up and improved the equipment, and last year it made a profit on the investment of 3.75 percent.

When the government took over the rail-ways in 1888 the relling steck was dilapidated and the roadbeds, sheds and machine shops in bad conditions. There was 428 lecometives, and some had been on the line over thirty years. The government bought 185 new lecemotives and had 74 rebuilt. The government replaced 1,570 wornout

coaches with 1,160 new ones of greater size. It added 324 coaches and mereased the seating capacity for passengers from 26,-\$23 to 35,300. All these coaches are sup-plied with air brakes, and the passenger coaches have gas lights. The government has erected a new foundry, numerous engine sheds, and great shops which are to be

just as a private corporation would have done. It adopted a standard axle box which saved oil; tallow, and "waste." It erected a plant for washing "wasts," and saved on its lubricating bills by substituting mineral olls for vegetable. That is a pretty con-clusive answer to the argument that government can not or will not, exercise such fore sight in conducting business as the in-

dividual or private corporation would.

Opponents of government ownership allike to believe the service would be poor. A sample of the service is afforded by the tables of train delays. For the year ending June 30, 1899, the government op erated 2,706 miles of road, an its total tra runs amounted to 8,869,468 miles. Of its through trains, 91 per cent, went on time, and only 7.17 per cent. were more than five mimutes late. Ninety-eight per cent of its local trains were on time, and 100 per cent. of its suburban traiss were on time. poer service about that.

The conclusion one is forced to draw is that government ownership in New South Wales looks remarkably like's successful venture after ten years of trial. never would have been a success in Australia if it hadn't been tried, and it never will be a success in this country until it is tried.

What Do You Think of This Caesar's Column: 368 pages.... A Tramp in Society: 244 pages. Public Ownership of Railwoods; President John Smith; 200 page

Undoubtedly, when Columbus was searching from place to placed for a friend, or a stranger, to assist him in proving that another continent lay over the sea, when he pictured to Ferdinand and Isabella a new and, where the sun shope as brightly, and reses bleemed as fair as in their own royal garden, there were those at court, whe, in their infallible wisdom, would basish this visionary adventurer. Was it likely, they asked, that a strelling scholar should discover what the seers of centuries had not made knewn? When a message came from the colony who sailed on the Mayflower, telling, in the quaint language of their day, of wondering-eyed, dark skinned, lade and labsics who preped at them from the shadsame stars, whose "sentiael watch was set o'er a stable of Bethlehem" glowed and twinkled above the mountains of this new world, there were these who shook their knowing heads and foretold dianstor, to the ones that thus challenged the wisdom of a Divine Providence by searchingein a new land for the happiness their own country wenld not grant them. Setting ands the traditions of dead and gone generations was not more popular in those days then it is now. But through the arches forests the Pilgrim Fathers cans of the liberty for which they h:

the old home, and in nature's music of their thanksgiving ve low and sweet on Autumn taught the children to guard that freedom if need be with their lives. Is freedom less precious new that its voice should be silenced with the clink of gold.

Socialists today are everywhere fighting of the merciless hand of greed that would throttle the last vestige of that liberty that the bleed staized foot-prints in the snewy woods of Valley Forge proclaim as bitterly paid for. Was Paul Revere's ride to be re-warded by the sweat shop freedom of America's child labor? The march of an army of unemployed over the highways of the mest productive country of which a world can boast, should pass in review be-fere the minute men of Lexington. The modern Tory, the Shylock of Wall street should wear the three cornered hat and powdered wig of 1787 while interpreting for their own benefit the misat traditions of

When Benedict Arneld, skulking in obscurity, pursued by remerse, regretting the Continental shoulder-straps, he had bartered for English gold and was forced in an outburst of passion to raise his hand to heaven and declare "there was not one man in all America he could call his friend", was his crime blacker than the official Arneld's of teday whe speculate in American patriotism. Qualify yourself by studying it to form an intelligent opinion of 'what socialism plans for you. If the enchantment of the old parties (regardless of their teads mark) is toe streng to be resisted, fall in with them. They have cards enough up their sleeve to get your scalp. If the Pilgrim Fathers were to ride at ancher in New York harbor of today would they look for peace and plenty on its shores? -A. M. S.

Which Will You Choose?

Competition in commerce and industry for material wealth in its last analysis is destruction and ends is chaos. Co-operation and collective ownership of preduction and distributica is growth and life in perpetuity. Competitive life and industry meaning and import is individualism, and in its final result and round-up ends in monarchy and the enslavement of the per-Co-operative and collective indus tematic and orderly, is true social. gives life and growth and the reali-man's highest ideal and aspirations.

Socialism, true and scientific, is und the fulfilment of the love principle that nts and brings universal peace and leaty. We are at the turning point and cese. Which will the good people garld have—ellectivism or individ-location or monarchism? One or of the world have— of the world have— or sales ? Socialism or sales is inevitable.

# NEW ZEALANI

ITS LAWS CONDITION

OF LABOR NO STRIKES

New Zealand is not a paradise, but it is Industrial Conciliation and Arbitration Act. still are on such work, allowed to elect their surrounded by water, it has a climate someat resembling that of California.

New Zealand is as yet a sparsely settled intry; having 104,052 square miles of intery, equal in size to New York and Pennsylvania and with a population of only 809,000. The population is somewhat cos mapolitan. New Zealand has been cursed with landlerdism, trampism, millionairism, but she has been wise enough, in the past seven years, to legislate them out of exist-ance. Six or seven years ago tramps were as numerous as they are in the United States. Today they are very scarce; the few are those who prefer to be tramps, when they die the tramp will be no more in that nation. Time was when a few great landlerds owned the greater part of the land. A land tax, graduated from two to six cents on the pound, with an extra two cents for absentee landlords, proved to be so heavy that most of the great estates were offered for sale. The government had also enacted a graduated income tax. These two measures resulted in driving the great money lords from the nation. There is not today one millionaire and only one man worth a half a million in New Zealand.

The land is held for actual settlers who are permitted to hold land to the value of \$2,500 exempt from taxation. Besides the government loans to the settler \$100 in cash, allows him a certain sum per acre for clearing land; it will also provide him with three day's work per week of 8 hours per day, in building reads or other public im-provements. This enables the settler to support himself and family until he can raise creps. The government is reimbursed for all this in the increased value due to an increase of population, resulting in the larger use of the government railroads, telegraphs, telephones, postal system etc. While we here in America, with our immense erops, expert about \$12 or less, per capita, New Zealand's exports average \$15 a year for every man woman and child.

THE LAND TAX

is a tax on land value and also a graduated tax. The first law passed in relation to land was in 1870. It provided that not more than 320 acres could be sold by a land officer to any individual. But this did not prevent one individual from buying from another. Next came the land tax, quickly fellowed by the graduated income tax now if a man's land is worth less than \$5,000 a certain rate is paid; if worth more than \$5,-000, and less than \$10,000, a higher rate is

The result was that such essey" Robinson, who had dred thousand acres, had to thousand.

LABOR LAWS.

(

In 1884 an act was passed with amendments in '95 and '98 which is known as The

far shead of every other nation. She has Since this law has been in effect, with its own foreman. The pay on the railroads become famous during the past six years best smeadments, there has not been a strike in averages about 30 per cent. higher than the cause of her radical labor legislation. Sit-New Zealand. The law encourages the wages on our American roads; and the 6,000 nated 1,200 miles southeast of Australia, formation of trade unions which are registrally hands have an 8 hour work day. tered. The central court of Arbitration has the power to enforce it's decisions, case of refusal to obey a fine up to \$2,500 can be levied. This socialistic law was enacted because organized labor demanded it and enforced its demands with their votes.

#### THE FACTORIES' ACT OF 1894

Provided for the complete inspection of all factories, the word "factory" meaning. any place in which two or more people are employed. Children under 15 years of ago are not permitted to work in factories. The law compels all employers to grant a half holiday each week, eith full pay. Good ventilation and sanitary conditions, the guarding of machinery, fire escapes, etc, are enforced. The half-holiday also prevails in the stores, banks, etc.

The employers' Liability Act protects the workers, and provides for compensation for

The Workman's Wages Act caables the verkman to obtain his wages 24 hours after they are due.

The Truck Act abolished the "Pluck me"

This was enacted in 1891. Workmen's Lieu Act, '92, gives stores. prierity of claim for wages.

The Shipping and Seaman's Act does for the sailors what the Fectories's Act does for the workers in the factories.

The Wages Attachment Act, passed in 1895, preveats wages below \$10 a week being attached for debt.

The Coal Miners' Act provides for working the coal mines with health and safety to the miners, and prevents women and

boys from working in coal mises.

The last sociou of the New Zealand par-liament passed the Old Age Pensions to all over 65 years of age who have lived in the nation for 25 years and are of good character, and do not possess \$2,700 worth of preparty, or enjoy as income of \$5 week. The persion provides for \$50 per year, or a 3120 for a couple, usin and wife. It is thought this will be increased at the pext session.

THE LIGHOR TRAFFIC.

The sale of mait and spirituous liquors is a matter of local option. The law, howell under a license. If a man is once seen coming from one of these inus in a state of interication, the proprietor is arrested and fixed; and for a second offense be forfeits his ficense forever. There is scarcely any drunkenness in New Zealand.

#### THE BAILROADS.

New Zealand built her railroads, completing the first line in 1863. The number of miles now in operation is about 2,200. The building of the rends was done directly by the nation, and the workers were, and

You can ride thirty miles for 10 cents and first class service is rendered the people. The annual net profit of the New Zealand railroads average \$2,250,000.

The government also ownes the telegraph and telephones, the rates being about per cent, less than "our" Western Union monopoly. Both pay a profit. The workers enjoy the S hour w. .. day and the week-ly haif-holiday. The government also conducts the express business to the benefit of all the people.

#### POSTAL SAVINGS BANKS

Are a feature in New Zealand, and are immensely popular. Any one may deposit sums up to \$2,560. At present there is on deposit in these banks a sum equal to \$45. for every man, woman and child in the nation. There is no bank failures. No cashiers going to Canada or South America.

The free school system of New Zealand ranks high. The law compels all children over seven and under fourteen to attend school. There are free-high schools and universities. The railways carry all children who live at a distance, to and from school

Woman suffarage is enjoyed and it is the universal testimony that the woman are equally interested with the men in all publie affairs. The women poll a vote within 5,000 as great as that of the men. If any voter fails to vote his name is stricken from the check book until he can give a good reason for the failure.

Government Life Insurance has also been

established with rates much less than the private companies, and it has stready become so popular that the government does more insurance business than all the private companies combined

New Zealand has had her trial. She was plunged in a cestly and bloody war with the savage Maori tr be that justed from 1863 to 1868. She has had her army of the unemployed, her strikes, ber tramps, her paupers, and a plutecracy. She was pretty near got rid of them all simply by the enactment of a few seesalistic laws. She has made sweating deas impecsiable, she has nearly empted her jails and poor houses, and today there is less crime, less intemperence less poverty, less misery, less tramp, less paupers, and more prosperity per capita in New Zealand than any other nation in the world. New Zealand has not stopped progress; from now on she will enact more and more socialistic legislation. Her people are intelligent, more so than any other nation. The number of people unable to capita than in any other nation. She has been wise in the past. She will show greater wisdom in the future.

Comrades, let us in America ward.

not be generally known in Amerioa, but clarge per cent of the brains of Europe are on the side of the social demomovement. Nearly all the literary men, 90 per cent. of the scientific men, and almost all the artists are social democrats. And it may be well to bear in mind too, that this S. D. P. movement in Europe has nearly 7,000,000 solid votes back of it, and that it is growing much faster than all the other political parties.

Tom Mann, editor of the British Socialists News, and president of the International Federation of Ship and Dock Workers, is 44 years of age. His life has been a most active one, an untireing worker for socialism and trade unionism, he is gradually wearing himself out. He is censtantly agitating, speaking and writing. In 97 he received 2,000 votes at Halifax, as the so-cialist caudidate for parliament. He is a strong and remarkable man

The social democratic party, of Lombardy Province, Italy, opened their annual congress December 10 at Milan. There were 135 branches represented by 151 delegates. They took a clear stand upon the trade unon question, pledging the party support to the trade unions. Reports from many parts of the country showed the party to be in a healthy condition. Efforts will be made to start local editions of Avanti, the central organ of the party, on a plan somewhat like the old Socialist Newspaper Union of America.

The social democratic party of Denmark, is rapidly growing. It is now 28 years since the party was first organized. Socialism and trade unionism are almost the same thing in Deamark. It is almost impossible to find a trade unionist not a social demo erat. Every trade union paper in the nation supports the S. D. P. The S. D. P. daily, the Sociel Demokraten, has 35,600 circulation, the largest of any paper in the nation. The Reemen is a comic and satirt cal socialist magazine with a big circulation. The secialists in Cepenhagen have founded a theatre where plays are preduced by socialists performers

Prosperity at Boone, Iswa.

Editor APPEAL TO REASON: Prosperity has struck us with a great big boom! On Describer 15 the C. & N. W. railway re-duced the hours of labor in the sheps here to nine per day, and reduced the pay from \$1.25 to \$1.12}. And on top of that gob of prosperity they reduced the number of hands 35 per cent. A few days later more hands were let go, making 50 per cent, who are hunting for this great prosperity heom.

In the campaign of 1996 the McKinley gang held a big rally here. The 400 men who work in the sheps turned out with flying banners, terches and yells for good times and protection! Well, we get it-is the neck! The bauners, which those same shouters have now, are rage, and their shouts will be a cry for work. This fall S. A. Poone was the candidate for mayor on an independent ticket, nominated by the

insta banker on the repub he banker won by 201 is a ray of sunlight, howlled over 400 votes for

k before the reduction was ps here the C. & N. W. declared a dividend of 3 of 24 per cent, which has everal years. That the railroad. And as this I for three times its real I amounts to 9 per cent. 258 miles of new track rbilt gave a banquet that at \$20,000 was contriburepresents a part of the or produced and never take Vanderbilt only aix

ienna. Austro-Hungary has or \$20,000 back, but one of botal democrats.

Five hundred and sixty trade unions of hours and get 75 cents. That's prespecity! France report five per cent, of their mem. The papers printed in this town, with one know what the introduction of that kind of condition of affairs. They even excuse the railway company. If the workers of Beone wast better conditions, if they want emancipation, let them organize and vote for party of the working class. The two old parties care absolutely nothing for the working class.

The social democratic party is the world wide party of the workers, and they should unite under its banner.

Workingssen of the world, unite! You have nothing but your chains to lose; you have a world to gain. Yours, Yours, Boone, Ia. Jose Rose.

J. A. Wayland, you've been sending Your APPEAL since early Your APPEAL since early fall;
Really Wayland, I'm astonished
At your imprudence and gall.
Still it makes me laugh to read it.
Though I laugh at your expense;
Do you think these working suggeon
Can be taught good common sense

See how prejudice can bind them See how party ties control;
Why! to help their dear old party
Nearly all would sell their soul.
See them fight, dispute and quarrel,
Democrats and G. O. P.;
Yet these fools have ne'er suspected,
Either one's the same to me.

When election funds are wanted, I contribute to the two:
Thus the men these dolts elected, I control, when they are through lempley ten thousand workers.
They would starve, should I cot and my profits on these toilers.
Every month is ten percent.

Then they grumble, serve in pu Or perhaps the suldiers call; and I'ts better them a circuis, Matching them poor design to on are Writing, we are worth

From Our Bright Exchanges.

England and the United States have gone into the business of exporting a new product—civilization. They are making two mistakes, viz: (1) Making forced sales abroad, and (2) rebbing loyal citizens at home.—Citizen and Country.

Under public ownership there can be no accumulation of wealth stored away for future generations. We will enjoy all the wealth of the world every day and then leave a greater heritage to future generations than there is now left them .- The Letter.

Think of some 140,000 men in New Zealand experting \$10,000,000 worth of agricultural produce a year. There is no need for "good rich landlerds" in a sountry like Only make the land freely accessible to the landless, and we sauli see the same thing everywhere. - Oitizen and Country

Industry has in fact been secialized. It requires a hundred men to make a shoe and a thousand men to make a watch. dividual in production has practically been displaced by co-operative methods. The machine has taken the place of hand pro-duction and the werst of all is that the pro-Sts go into the hands of the few who own the machines.

It is predicted by enthusiasts that liquid air will drive all the mills of the world, all the wheeled vehicles, and all ships of commerce or war more swiftly, cleanly, and cheaply than they ever were driven before, and that it will relieve railway traveling from cinders, streets from half their dis-ease-breeding dirt, and the atmosphere from all its foulness, thus adding to the comfort and health of mankind .- The Tocsin, Melbearne, Aus.

Before the industrial commissies, John Wanamaker told some plain truths about the department stores and their benefits to the masses of the people. When asked if they did not crowd out small shopkeepers, he replied: "Yes; but the interests of s few speculators are not to be compared with the interests of all the people." Well said, John, and new if the people will only get pessession of the department stores their interests will be further subserved .- Pueblo Courier.

Provision has been made for old age by gevernment action in the following Europgevernment action in the following European countries: Russia, Norway, Sweden, Denmark, Germany, Holland, Belgium, France, Italy, Austria and Roumania. Of these countries only Germany and Denmark have adopted a general system of old age pensions. In Russia and Roumania old age insurance only extends to certain miners. And in Belgium the government maintains a system of grants to triendly somaintains a system of grants to friendly socloties to excourage saving against old age. -Carpenter.

The new Gatlin automobile plow will do the work of eight men and twelve horses, so the inventor claims. Do you know what an invention of that kind would mean under socialism? It would mean that the hours of those engaged in that department of agriculture would be reduced to enseight of the time usually required. Do you It means that for every machine intre of the eight men affected one will be employed to build the machine, one to operate it and the other six fellows can hustle for another job!-The Critic, Rich Hill, Mo.

Mr. Bryan is a typical democrat, and true te the instincts of the political organization which he assumes to lead, he wants "to lock the stable door after the borse has been Mr. Bryan does not seem to understand the age in which he lives, and that the competitive system which he so eloquently upholds is the cause of the evils of which he complains. He does not compre-head that the conditions which have obtained are only the aggressions of the capitalist and these aggressions will go on as long as the present system is continued, in spite of such political doctrinaires as Mr. Bryan or the democratic party. No compremise could be made that would settle the chattel slavery question, and nothing but its abol-ishment could eliminate it. And no compromise can settle the present issue except the total abelishment of the capitalist system, which will come whether Mr. Bryan and his followers want it or not .- W. E. F. Farmer's Review.

Got it Bad.

## CITY OWNERSHIP

Kindly send in notes on municipal owner-

Springfield, Mo., is slewly advocating city ownership of water works Under private ewaership Escremento,

Cal., population 35,000 pays \$123 per annum rent for each street arc. Water power is used.

The Leadville, Colo., election last week resulted in favor of the city owning its own water plant by a vote of 465 to 56. The water company made a hard fight.

Under public ewassahip Topeka, Kana, population 25,000 pays \$59,73 for the interest and depreciation of charges. Coal

The mayor of Jamestown, N. J., has opened the fight for municipal ownership. He is out in a message full of facts as to its advantages, showing that taxes may be reduced 25 per cent, that \$12,000 can be saved to the city, etc.

Livingston, Ment., has taken up the mat-ter of purchasing the water plant. Getting tired of corporation extortion, The coun-cilmen will then have no incentive to sell out to the company every time the water

Lansing, Mich., bought out the private owned electric lighting plant and in two years reduced the cost of lighting over 40 per cent. She is making an annual profit of \$7,000 and the saving to the citizens on cial lighting is \$10,000 per year.

The toilers from the great mass of every city's population. They are the ones who must pay the dividends on the watered stock of the corporations which are fattering on m. It is well that they are awadening wrongs and looking about for re-ill find it in the public owner-

Rockford, 111., for several ye rate company \$125 per annum for of candle-power are lamps. Two the city made plans to establish a

supply gas at 50 cents a thousand. The United Gas Improvement company offered to supply gas at 50 cents a thousand for 17 years and pay nearly one million dollars to the city for the franchise. The above simply gives an idea of how the private owned gas companies have been robbing the peo

Through municipal ownership of public franchises the great problem involved in the financial diekering between politicians and city contractors will be solved. It will enable a more liberal and wider use of the resources of the city for the social advancement of the inhabitants. It will bring inte local politics real issues in connection with city affairs, and will make city elections more than mere ballet-box scrambles to see which set of politicians shall divide the pre-fits of government. By means of municipal ownership the citizens will be brought into closer touch with the municipal administration. - New York Journal.

Huddersfield, a city of Yorkshire, Eng. is perhaps the best illustration of a city where in the world. Every municipal me nopely is operated for the benefit of the citizens gas, street cars, water works, electric lighting, markets, abattoirs, sani-tariums, lodging houses, and even the cemetery. As to gas, an exchange gives the particulars: In 1872 the gas works were taken over, the object being to reduce the price of gas and increase its use by the poorer classes. To this end the department in-troduced penny-in the-slot metres, which have been so well received that about onefifth of the population is now supplied in this way. When the meter is used a stove is supplied "fixed" free of charge. Not one penny need be invested, except for the 30 feet of gas sold for two cents. This is a great boon for the poor, who find it very difficult to save enough to purchase fittings outright. Stoves alone may be returned at 10 per cent. off cost price per year, and the de ment has its own stoves, containing style-ment has its own stoves, containing styles to suit the poorest or the most fastidions. The price of gas has been steadily reduced, until now it is 2s 9d (66 cents) for lighting, and 2s (48 cents) for heating and trade pur-poses. Indeed, the city has been so con-siderate of subline saling in survey was that

#### THE "BULL PEN" INVESTIGATION

The Shameful Abuses in the Cœur D'Alene Forced Upon Public Attention.

Now that the truth about the capitalist outrages in Idaho has been forced upon publicattention, the great sensational dailies, after half a year of sileace, are beginning to pose as champions of liberty. We know what estimate to place upon their sincerity, when they, so eager for "scoops" and the very latest news, wait five months before giving us this report of the interview granted by Mis Imperial Majesty William McKinley to a delegation, of which Edward Boyce, President of the Western Federation of Miners, was the spekesman:

The President asked what the delegation

Mr. Boyce answered: "We desire that the United States troops shall be used only to preserve order and not to destroy organized labor."

The President insisted that such a thing as the latter could not be possible. To him was quoted then a speech by Brigadier-General Merriam, commanding the United States troops in Idaho, and delivered goon after his arrival at Wardner. In this speech Merriam said:

'It seems to me since the trouble arose originally in hostile organizations of men known as labor unions, I should suggest a law making the formation of such unions or kindred societies a crime, burely, history furnishes argumetst sufficiently in favor of such a course."

The President was also shown a set of the applications for labor permits, and his attention was especially called to a proclamation drawn up by the attorney for the Bunker Hill and Sullivan mines (the Standard Oli mines) and signed by Bartlett Sinclair, with this addendum: "Examined and approved. II. C. Mer-

riam, Brigadier-General, U.S. Army."

#### MERRIAM APPROVED PERMITS.

This proclamation, addressed to the mine owners of Shosbone County, declared that certain organizations existing in the shown themselves to be oriminal in purpose, inciting destruction of property No organization was named

In the second paragraph it directed all mine-owners to refuse to give employment to any man who did not bring a permit issued by Dr. Hugh France can employee of the Bunker Hill mine) or his deputy, and the conditions under which these permits were to be issued were stated, including a pledge that the applicant would not belong to the Miners' Union."

General Merriam's signature to the proclamation makes him a party to the permit

Mr. McKinley told his callers he under stood Democrats were very much opposed to government by injunction, and yet the government of Idaho was Democratic. As for Merriam, he added, the process of courtmartial was always open for disciplining an officer of the regular away. His callers failed to see how miners imprisoned in the "Bull Pen" could secure a Merriam courtmartial.

#### PUBLICITY PRIGHTENED PRESIDENT.

When it seemed impossible for the delegation to secure from the President any frank expression of his purposes and all they asked for was an investigation -one of the members, lesing his self-control said:

"Then the only thing for us to do is to go and begin a public agitation and call the artentien of the country to the conditions existing in our

To this Mr. McKinley responded:

"Oh! no, don't do that. Let me have a little time, and I am sure we will arrange the matter to the satisfaction of the working people."

Since that time nothing has been done except to make a military despetism more and mere stringent.

#### A WHITEWASH POR IDANO.

Congressional investigation will be "whitewash," as anyone, who knows anything of such affairs, may expect. Auditor, Bartlett Sinclair, who applied for the Federal troops, who devised the Bull Pen, and who wrote the infamous proclamation that Merriam countersigned, has issued the following statemennt:

"The State administration of Idaho will well "The state administration of that of which weight come a tharough Congressional investigation of the Court d'Alone riets of April 29, wherein two men were shot by the riotors and a concentrator, valued at \$250,020, was destroyed. The state would be pleased to have the investigation go back as far as 1852.

"We will do all we can to induce Congress to make the investigation."

make the investigation.

"The investigation should embrace the conduct of the State authorities in queiling the disturbances and prosecuting the rioters as well as the necessity for the declaration of martial inw.—The People.

### The Ten Acre Farm.

In the celebrated fruit belt of Arkansas, will be given to the person who sends in the most yearly subscribers during the month of January, as usual. Regular thing now. Have five more of these ten acre tracts. They will be the making of a cozy home and an insurance against the cold obscity of the world. These tracts are worth more than all the money sent in by the successful winnors of them. The farm given away in October was captured with 119 subscribers; in November with 211; the Breember farm can not yet be figured out, as this issue goes to press before the mouth is ended. Names need not be held. Send in as fast as you get them and they will be counted on the

TEN DOLLARS FOR A PLAN The APPRAL will give \$10.00 for the best stalling for a pine to get the labor unions to per APPRAL one year into the hands of the embers. Open until January 10,

Eugene Debs Sees Cause for Reinfeing. The Pilgrim, a monthly home journal published at Marshall, Mich., contains, in its November issue, a symposium, to which Eugene Debs contributes the following:

"From the depths of my heart I offer thanks in this year of our Lord, 1899, for the rapid decline of capitalism and the corresponding rise of Socialism. The advent of the trust and its phenominal absorption of competition betekens the near end of commercial warfare and the beginning of economic peace. The trust is the latest development of capitalistic production. Its gigantic power is too great for private hands, and soon after the new century bursts full-blossomed on the thorny stem of time' it will pass from private to collective ownership and what new seems to many an unmitigated curse will prove a universal blessing to mankind.
"The trusts will continue to increase in

number and power until the middle class society is practically extinguished. These mammoth reachines, in the very nature of things, will be so interdependent that they must ultimately unite in one harmonious whole, and then pass into collective ownership and control. No power on cagth or in heaven can arrest this process of economic transformation. .

"The period of transition through which we are now struggling is painful beyond, all precedent, but humanity will merge from the ordeal redeemed and glorified.

"Economic despetsin, with its master and its slaves, its pomp and pride and poverty, murders and suicides and robburies, its fears and dreads and doubts, its hypocrisy and hate, its brutal wars and sham patriotism, its militarism and its Mammon worship will end forever; and wage-slavery, with its hell of daily and nightly horrors, will take its place inhistory with the crimes

·· However trying the ordeal, I am profoundly thankful that it has fallen to our age to participate in the slow transformation now in progress, which shall enunci-pate the working class from economic slavery, and confer upon mankind the inestimablessings of Liberty, Equality and Fraternity.

#### Debases the Rich, Degrades the Poor.

We socialists want to carry this evolution to its logical conclusion and make distribution co-operative as well as production. Mr. Rockefeller is said to be the beneficiary of this system; we deep that this system has any beneficiaries. Mr. Rockefeller lives on the eighth foor of his office building in New York, walled in, a living prisoner, and no hope from any pardoning power. He does not disclose his identity when he appears on the streets of New York. He is not on terms of peace with himself. His brain is thronged with all kinds of problems. does not enjoy life. He is not happy, With all of his millions I regard him with compassion. He was recently looking for a man to take charge of his vast interests and agreed to pay the right man a million dol-llars a year. There is an epening for some of your enterprising men of Whatcom. A million dollars a year! Do you know of a tramp who would have the job? I would rather be on the highway with an appetite, There is some possibility of escape for me, but none for him. When he appears on the street he is protected by a guard. In his fevered vision he sees the dagger of an assassin. Vanderhilt was unable to digest an oyster for fifteen years. Commodore Vanderbilt lived to be 83 years of age. His son, who was born rich, died at 65; he did not live out the measure of his years. His son, grandson of the commodore, died a few weeks ago at 56. Excessive wealth is just as demoralizing, just as degrading, as abject poverty.-From E. V. Debs Speech at New Whatcom, Wash.

#### .The Oak and the Vine. By Madison Wanden Ottoma Iowa

A glant oak stood in the forest. It had their servants, the state authorities of appearance betokened stern and unyielding line homes, and within the next five years appearance betokened stern and unyielding you will do it. its branches twined a vine, whose rootlets pierced the eak and sapped its strength. The oak complained.

"I am tired," it said, "of nourishing you. Why can you not stand alone?'

The vine rustled its leaves in horror. "What base ingratitude!" it cried. "After I have supported you all these years!" The oak was mildly surprised.

"I thought," it faltered, "that you were dependent upon me-

- But the vine waxed indignant, 'Fool! Ingrate! What would you be, but for me? How could you rear your head so proudly, but for the support of my clasping ingers? How could you endure the fierce storms and howling winds, but for my beneficent protection? Instead of complaining of my presence, you should be thankful that

you are permitted to lean upon me. The vine assumed an air of smug com placence and conscious benevolence.

And the oak bowed its branches, and was more than ever convinced of the dependence of labor upon capital.

#### HOW IS THIS?

For the remainder of January I will send one of the strongest reform books of over 700 pages—price 50c—to every subscriber who results 50c for a year's subscription, AND REQUESTS for a year's subscription, AND REQUESTS THE BOOK. I desire to jest the effects of this

#### APPEAL ARMY

A bappy new year to you all.

Comrade W. G. Henry, of Belta; Colo., got after us with 31 scalps, all for a year.

Comrade Johnson, of Maytown, Pa. banged us with a 54 pound shot, all for a

Comrade E. W. Isaac, of Hitman, Iowa, hustled a Christmas present to us contain-67 yearly subs.

Comrade Fushberg, of Seattle, sent in a bomb containing 27 annuals and an extra order for baiting. Comrades Kramer, Slayton and Campbell,

of New Castle, P., clubbed together and clubbed us with 30.

In several places the boys have organized clubs to push the circulation. It produces big results. Try it.

Want to convert the prohibitionists to socialism? Order 100 copies-40 centsnext week's APPEAL.

Comrade Evans; of Ash'and, Ore., took 30 sealps in just three days; and has sent 'em here for safe keeping. Comrades Mahan, Anderson and Maack,

belong to the Salt Lake Trust. They gave us 27 upper cuts this week. Comrade Landis, landed us on the left

ear containing 60 for a year. The right ear can be hit any time now. Comrade J. A Snook, of Elkhart, Ind., has taken a contrast to capture about all the

braves in his county, 60 subs. Comrade Hartwig, of Evansville, Ind., is another fellow who is helping Snook out.

He landed on us with 50 for a year. Comrades Hill and Goodwater didn't hurt us any with that club of 50. Don't know

how it would effect us if it had been 150. Comrade Nagel, of Cincinnati, is at his old tricks again; in fact he will die fighting for an Appeal subscriber, thirty this time.

The S. D. P. comrades of San Antonio remembered us with a club of 26 Texas rangers. The Texas gang mean business,

Comrade Smith, of Portland, Ore., let drive at us with a 70 pounder for one year. We always did claim that Smith was a good

. That Wilbush comrade is at it all the time. He lives in Houston, the big state, and he sends big clubs about once in 6 days;

Comrade Mammsen, of Summip, Wash., is a lead, bad man. He works Sundayssometimes. The last two Sundays he cap-He tured 25 Filiphos.

Comrade Strobell, of Newark, N. J., sent 51 Filiphos to the APPEAL office on the run, and he is after more. He handles the enemy with gloves.

Brockton, S. D. P. simed their big gun at us this week and fired just once, landing just 50 Yankees for a year. Comrade Sackett was the gunzer.

Comrade Rogers, of waydown East, sends in 20 from Ausin, Me. Maine only needs a little work to take a leading place in the fight, there are lots of radicals there.

Comrade Johnson, of Brockton, don't seem to be satisfied with the damage the S. D. P. done to the two old parties in his town. He has enlisted twenty-five for a

Comrade Freeman, of Del Rio Tex., anted up with a club of 25. They will each be treated to 52 doses of anti-capitalist compound warranted to kill or cure inside of 12

Comrades, you are the men who hold the fate of a nation in your grasp. United, you have the power to put this paper into a mil-

Mass., is a smart boy of only 54. He sends in a club pretty often, even if he has to get up in the night to find an extra sub., twenty-six vearlies.

Comrade W. S. Patterson has moved from Condersport, Pa., to Buffalo, N. Y. He got to the bat for a home run with 76 subs for a year. We warn Buffalo that

Patterson is in town. Comrades Tracey and Spear, of Kearney, Neb., have organized a trust at that place. They just sent us a club of 25 to remind us that Christmas and all such days have no influence on them. In fact, nothing will stop them from the good work.

W. E. Ryan, Rock Creek, Texas, is a new recruit, but shows the generalship of an old commander. Captured 34 of the old party rangers and enlisted them for a year, Texas is rapidly coming to the fron in ener-getic workers. What a socialist commonwealth it would make.

lows, is not so slow as you might think, either. Comrades sent in a few loads: Mo Donald, of Benan, 30: Ballinger, of Lacy, 29; Isaac, of Hitman, 67; Newkirk and Patrick Dean, 29; T. W. Bowen, Mystic, 15; and about 25 small clubs. The Social Democrats in Iowa, will give the old parties something to think about in a few m

Comrades you may not believe it, but this paper is going to have a bigger circulation than the N. Y. Journal. The army have enlisted until the war to over. The are the best workers the world ever saw.
To them will be due the house of changing this old world from Capitalism to a Social Democracy. The workers will yet send the APPEAL into a million homes.

Comrade Fred Book of Haverhill, (that

the war horses. He starts out in the morning for a couple of subs, and comes in about noon with 25. Anyhow he landed on us with such a club. If Beal should get mad sometime and devote 17 days hunting subs, the APPRAL would have 6,229 subscribers in that S. D. P. burg.

Comrade W. G. Markham, of Sherwood, Tenn., relied in another club of 25 from his mountain home. This makes 40 per cent. of the voters in Sherwood, reading the APPEAL. Gee Whiz, boys! Just think what a circulation the APPEAL would have if all the tewns in the nation had 40 per cent. reading this paper. It would give us six million readers. Oh! for a thousand Markhame!

Comrade Claffin thinks there are 52 Christmas days in a year, we reckon. Anyhow he sends us a Christmas present of anywhere from 10 to 25 subs, every week. Comrade Geo. Hewis helped him out this week. Howie and Claffin are a couple of the best workers in the nation. They are at it all the time. We expect any time to hear that they have been transported for the trouble they are causing peaceable citi-

Old Missouri, is coming to the front in great singe, as the fellowing bombardment shows: M. H. Smith, Sedalla, 62; C. H. Boyd, Kansas City, 23; C. W. Jacobs, Kansas City, 31; J. F. Miller, Harrisonville, 25; W. H. Tallman, Pleasant Hill, 50; A. J. Curtis, Kansas City, 25; Ind. Socialist Club, Webb City, 25; Peter Imel, St. Joe 28; M. F. Scott, Aurera, 25; E. Peterson, Independence, Mo., 25. A total of 324, and a big list of small clubs. We wont do a thing to old Missouri bye and bye.

There are lots of clubs from five twenty, and lots of orders for bundles, books, etc., etc. Just to give you an idea of the second class mail that goes out of this little city of 3930 population, we will state as a fact that the posteffice receipts of Haverhill and Brookton with 89,090 population is less than that of Girard. shows you how impossible it is to mention all the workers. A few of them are

#### Will You Think?

The agricultural statistician estimates that the cotton crop of the United States will reach 8,500 000 bales. The same fellows who produced millions of bushels of corn, wheat eats, barley, meat and much of other things that might be named. Enough raw material has been produced to feed clothe and keep in a comfortable condition every man, weman and child in the nation; provided there existed an equitable system of distribution. But under the present system thousands of these hardy preducers are in actual want.

I see men every day who by the help of their families have produced enough cotton this year to clothe them for 40 years, and still they are not able to wear good clothes. Many of them are comparatively in rags and had no money left after disposing of their

Now Mr. Farmer, look, here; are you not endewed with a sufficient amount of common sense to see that there is something radically wrong with a system that makes a poverty-stricken people of the producers of wealth, and millionaires of these who speculate in the products of labor? Or do you believe in a system that makes millionaires of commercial gamblers while you as an honest preducer are deprived of the com-

forts of life? Now, look this matter squarely in the face and den't be afraid to think, and you will soon see that your hope of deliverance lies in the organization of the co-operative commonwealth. In the establishment of a system that will allow the producer to enjoy the fruits of his labor. As long as the preducers of wealth support the present apitalist system they will be the slaves of those who control the price of their labor by controling the price of their products. They will continue to be "hewers of wood

controling the price of their products.

They will continue to be 'hewers of wood and drawers of water" unless the system is changed.

Den't be afraid to think. It is all that will save society from slavery and poverty's hell.—W. E. F., in Farmer's Review.

A Correction.

The item in relation to the wage workers building a court house in Battle Creek, Mich., is a mistake, that has been going the rounds of several papers. We don't know who started the story but we do know that it is only a story.

And there are We Drittlag.

Socialize Several papers are several papers. We don't know that it is only a story.

Imprudent Marriagas Pasting in Pasting in Pasting in Size In a lateratory part in the section of the People of the it is only a story.

Till Social Democratic Party is the world wide name of a world wide movement for the communication of all manking. Local branches skyuld be organized as rapidly as possible.

The Devil Enjoys This Extract.

From a statement by the committee of the

London School Board: "At times, when there is no special di tress, 55,000 children in a state of hunge

them, are in the schools of London alone. The Devil reads that to his wife, and

"No use going up to-day, my dear. I

could not improve on that." Wise Devil. His work is certainly well done.

Fifty-five thousand children are so hungry in ordinary times-that their brains are too weak to think, too feeble to hold knowledge. Later, fifty-five thousand-minus those killed off-young men and women with dwarfed souls, stunted bodies, preverte i moral nature. Among them some thousands of hopeless drudges, some other thousands of criminals—the ablest of the lot, no doubt - some imbeciles in workhouses elaborate breeding of other thousands to

starve and steal and drudge. Milions for the workhouses, millions for the prisons, millions for cells to hold the insane. Millions for palaces, millions for cannon, and not a shilling for the children

with starved bodies and brains. And let us not preen our feathers proudly

and feel superior on our side of the ocean.

There are thousands of ill-fed hungry children in our schools. There are teachers who cannot get their honest dues. There are thousands of mothers scrubbing and and slaving a few hours before and a few after their bables' birth.

It would be dread "paternalism" to help these children or these mothers. It is all right to build up speedways, bridle paths—to fatten in all ways the fat bodies of pub-

Some day the Devil may laugh himself to death-then perhaps, with his evil influence gone, we shall improve.

It is a rotten type of "civilization" stands.

#### When Charley Plays the Band

If your city lacks only two or dred subs of getting the band that we cost several hundred dollars, you will wish you had done a little more hustling, eh? Get some labor unions to subscribe for their membership and you will have a good start That band will be an important factor in the coming campaign. Ten determined men hustling will get it for their city. It will be something to be proud of. None will have a better. Bo you want it?
