OWNERSHIP of the EARTH

AND THE PULLSESS THEREOF

By ALL the People, and Not by Part of the People.

The Appeal is NEVRI sent on credit; if you receive it, it is paid for. Nobody owes a cent on subscription.

Entered at Girard, Kas., P. O. as second-class matter.

TREMENDOUS SOCIALIST GAINS EVERY

ASTONISHING SOCALL GAINS EVERYWHERE.

The election was a surprise all around. The republican majorities were cut down and the democrats were defeated, but the Socialists increased their vote everywhere with an astounding leap. The prediction of the Appeal that the increase would be 300% has been verified by the reports. The total vote in the Nation has been something like 400,000. The news from every section has been an exultation to Socialists. We care nothing about who was elected. That is a personal matter. PRINCIPLES are with us and will as surely win as the earth revelues. The election in the West has proven that the "fusion" of the democrats and populists has been repudiated, and the democratic donkey has been deserted by the people. Never can the old prostitute win a National election. This will cause myriads of the voters to line up with the Socialists. You will notice that republicans will not go over to the democrats, and vice versa, but both of them will come to he Socialists without prejudice. The Socialists of the East are having bonfires to express jubilation over their victories in Massachusetts, which will be repeated everywhere at the next ejection. Taken all in all, the election has been a great victory for the Socialists. The organization has been planted everywhere in the North, and a few places in the South. But the North is the battle-ground for industrial liberty. The aristocracy of the South will go to the republican party as it loses the North, which it surely will, to the Socialists.

From now forward the Socialist march will be one triumphal march of victory. The lines are divided. Hundreds of thousands of votes would be cast for the Socialists today if the election could be held over, and with it a knowledge of the results.

Commence the campaign of 1904. Do it now, while they are disgusted with results. Hurrah for Socialism. It is the winning ticket. And when it wins, it will win forever. Next week a full report from every section will be given.

In your exultation over the results, don't forget that the Appeal is striving for a million circulation, and that you should at once sign and cut out the attached blank and return it to this office at once. This is the kind of work that has produced the result-scattering Socialist literature. To each comrade who does this this, and averages five subscriptions a week during the coming year, the Appeal will present a suitably engraved, full-jeweled watch, enclosed in special design, 25-year, gold case. Come, help the Appeal to do its work.

Winnebago County—Socialist vote 587; last clection 75 for Debs. The Socialists, to whom the democrats and prohibitionists turned over the local field, made a good showing but not as much of one as some of the leaders expected. If they had, John Hallden with the help he received from republicans and democrats would have been elected. The returns would indicate that there are 590 or 600 Socialists in Winnebago county who are rivong enough that way to get out and vote. Hallden did not receive the organized labor vote as expected. If he had he would have been elected. Mr. Hallden made a fine run however, and demonstrated what the organized labor of this city is likely to do in the near future if it stands together—cloct a representative in the legislature. Evansville-One of the great surprises of the election was the large Socialist vote cast; 47 precincts in the county out of 78 give Bd Meyer Socialist candidate for secretary of state 1,033. From these returns it is estimated that the total Socialist vote in the county was about 1,400. Returns are slow about coming in and it is possible that the vote may be over 1,500. The Socialists carried the 27th and the 29th precincia in the 4th ward. Their vote in the first named ward was 72, and in the last named 77. Smith Socialist candidate for congress is running along with the head of the state So-cialist ticket. In 1900 the Socialist vote in Vanderburg county was less than 200. The more. Chas, S., 8,132; Berry, S. L., 1108. This remarkable increase in the Socialist vote doubtless affected, more or less disastrously, the vote Gaston would otherwise have received.

to Reason for October was 253 500.

A very interesting and significant feature of the election throughout the state was the large increase of the Socialist vote, which reached nearly 9,000 in Boston. In Brockton the Socialists cast more votes for their candidate for governor than the democrats could bring to the support of their candidate, and elected a mem-

support of their candidate, and elected a member of the house in a hitherto republican stronghold. In Somerville the Socialists polled nearly 500 votes as against less than 200 a year ago.

Y DEAR TED-That Pennsylvania those blamed Socialists. anthracite miners' strike has been labor by the nose. At the same time I am about those fellows is that their economic views truly thankful to the divine wisdom that placed are sound. And you can't deflect the truly thankful to the divine wisdom that placed are sound. And you can't deflect the rascals such conservative men as Compers and Mitchell from their pernicious purpose of stopping our at the head of American labor. Let me tell graft. at the head of American labor. Let me tell you, if it had not been for them, I doubt whether everything would have gone as smoothly as it did. Take for instance the beginning of the strike. We had calculated that by goading the strike. We had calculated that by goading the miners into a strike, we should be able to get roll the long accomplished old stock of callets. rid of all the long accumulated old stock of coal and have time to add enough new stock to make the venture a financial success. Thanks to the splendid interference of Mitchell, we actually managed to complete our stock and keep them at work another month. Then head, they're safer organized than unorganized again, think of what might have happened, it Mitchell had not succeeded in persuading the soft coal men to stick to their sacred contract. Say, that free contract trick is rich and I hope it will work for quite a while yet. It those soft coal men would have assisted their hard coal brothers, they could have actually tied up the country's commerce and we should have been compelled to get Shaw to suspend the tariff on coal, so that we could have imported foreign coal. As it was, we managed to pull through all right, thanks to that "astute diplomat," John Mitchell.

So our calculations came out O. K. We saved the wages of 150,000 miners from May to Oc tober and sold our coal away above the customary price. After allowing for all the damag to the mines and machinery, and paying all incidental expenses for press and diplomatic services, we have cleared about 13 million doilars above what we would have had, had there been no strike. However, the game was not without risks, and I don't think I shall try it again in a hurry. But about that we will talk

The press has been doing splendidly. I had many a good chuckle over the way they soft-soaped Mitchell as "the great diplomat," "the coming man of labor," and all that taffy. And the fool crowd took it just as a duck does to swimming. It was really refreshing to see how they celebrated their "only Mitchell" as a great leader when he was actually doing right along just what we secretly wished he would do. Honestly, Hanna judged him right when he told me before the beginning of the strike that Mitchell didn't know enough to do what the Western Federation of Miners and the American Labor Union did, viz., declare in favor of Socialism. And I was once again right in relying on Hanna's judgment and forcing the strike

Say, Mark is a wonder. Knowing what I did, it was worth twenty mansfields to see the old boy tearing around as the great mediator, and in his mild and unctuous style declaiming his little piece on "Capital and Labor, hand in hand," and the like. And the way that dope worked was a revelation to me on the psychology of the public mind. It corroborated the opinion I had expressed to my friend Wilhelm of Germany that Socialism in the United States was not to be considered as a serious factor. Why man, the American people haven't got perspicacity enough to see through a quarter inch board full of holes. We'll play our little game quite a while yet.

What I want to tell you, Ted, is this: We need a better militia organization. We must need a better militia organization. We must get the militia into closer touch with the regu-lars, and that as soon as possible, before the next commercial crisis at all events. Arrange for a stricter discipline. Make refusing to fire a felony, punishable the same as treason before line America. Girls in these stores are never the enemy. Get some pointers on that from our friend Bill in Berlin. We must also try to keep the big labor organizations intact. As long as we can keep such fellows as Mitchell and Gompers at their cessions to them than to have them scattered and made Socialists. I am glad that there is going to be a fight between the A. F L. and the A. L. U! There is a gold mine in that for us, and Hanna and Gompers will handle that for us, all right. The A. F. L. will do us many a good turn yet, especially if the Socialists in it are excluded and forced into the A. L. U.

Of course, I understand that this is at the consolidating the Socialist forces. But I'd rather have A that way. We can keep better track of them. Don't you know of a Socialist leader who could be used for a consideration to harass the others Rubber around a little and find out. A Doctor's View.

The editor of the Electic Medical Gleaner writes in the October number of that journal, the following vivid chronicle of the times in which we live. The remedy for the condition is Socialism, though the doctor possibly does not know that:

"It stands that corporations have Compress a corporation into two or three in-dividuals, and it is found that these have less of soul than pertains to even a corporation. When the functions of a corporation have been converged into a single individual, he is about certain to become a heartless monster—cold-blooded beast of prey. This is brutally exem-plified in that most atrocious form of slavery—child labor. In many parts of the country, but more particularly in the South, and very specially in Alabama, this cruelest method of murder for money, is in ample and beastly evidence. I have it from a perfectly reliable source that the cotton mill communities in Alabama particularly, represent the most abject forms of serfdom. These mills are run by northern capital. Most of the owners live in New England. In these murder factorics chil-dren from the age of four to fifteen are forced to toll from ten to sixteen hours a day. All these hours their developing nervous systems are racked and torn by the hum and grind and racket of machinery, and their tender little lungs are saturated with lint and dust. Not more than one in ten of them ever reaches maturity, and such as do, soon die of consump-tion, or some other rapidly wasting disease. If life is hardly worth living under the best conditions, think of what it is to these baby slaves! Utterly robbed of the dear and necesoualy supplied out of their own pockets the wages of the miners which we saved, and that suggests to me the idea that they can stand still another squeeze. They are still making and of social opportunities, they become old and withered before they reach their teens. An authoritative writer, who has personally investigated the subject, says that four out of five of these children die within five years after having entered the service. While all this is that would not pan out as profitably as a strike. But they wont think of that until they haven't any mouey left, and the Socialists are so poor that they can't afford to give away very much literature for nothing.

The only feature about the strike that I did not like was that those militia men fraternized so openly with the strikers. Wonder where those brutes get all their supply of generosity and good-heartedness.

The glass works of New Jersey are scarcely behind the Southern cotton mills in their cruelties to little children. The most heartless abuses of this kind go on right along in the large printing (cloth printing) plants of the East. In fact child slavery is scattered all over free America. Perhaps the least cruel form of it is seen in the case of cash boys and girls in our large department stores; but the fate of these is hard enough. Greed even goes so far as to strangle that gallantry toward the gentler sex which has always been the giory of mascubut as between less money without murder, and more money with murder, they cagerly choose the former. They practically close the argument thus: "Give us the dollars, and bell with your innocent blood."

There ought to be a way of retribe by dealing with these monsters. But the me greed that makes vampires of them, does the same with those with whom rests the power about that.

We must also give strict instructions to all same with those with whom rests the power prominent men of both parties to be more guarded in their public utterances. That Baer incident came pretty near ruffling my temper science and favoring sentiment must be created, and the physician has told me to avoid all extends the physician has told me to avoid all extends the physician has told me to avoid all extends the power of the power and the physician has told me to avoid an excitement. She said that in Populus Land there are plenty of geese, and they are nearly all so poor that they are scarce-ly food for powder. There are lots of frog ponds there and places for geese to build on. But these geese make big nests with great la-bor, and then hand them over to a lot of fat geese that just sit on the ground and gabble. They appoint a few noisy geese to govern them. When they are ill-served by these office-holders they choose others just as bad. They buy all their food from old goese that first found out that there was any food to be had, or who invented the art of swallowing it. Whenever the fat ones want a favor, they bribe the noisy rulers with some of the food that the others bring them. A few of these geese, she said, form companies which are granted rights of way in air, so that no other geese can take flight hout paying fares. Then, she said, some of without paying fares. Then, she said, some of the geese claim all of the land, and the water, too, because they were bought from the mos-quitoes, or because those geese got there first." "Did she say where that place was?" asked

'No," said he, "but she said the poor geese had made it a perfect hell for themselves."

OCIALISTS want you to investigate ern rapid fire gun by labor and turned against the arrogant pirates of their commerce. Socialists want to make this a better world.

This is one of the sophistries of the democrats to steal the votes of Socialists. Every
position of the Socialist is LOGICAL to every
other position. In other words, if any part of
Socialism is right, all of it is right; if part is
wrong, all is wrong. But for the fact that reiteration is necessary to impress a truth, as
well as an error, no notice would be taken of
this absurd, illogical position of the opposers
of Socialism. Socialists nowhere on earth advocate the distribution of property. That
is just what they are opposed to. They want
it concentrated, not divided. The lazy worthless people now live on the industrious (else
they would die of hungt) and that is what the less people now live on the industrions (else they would die of hungt) and that is what the Socialist desires to get rid of—supporting them. The industrious now have to divide the results of their efforts with the men who have made up their minds to live on their wits—and these are the fellows who are mostly opposed to So-cialism because it would make them either g to useful work or starve. The drones today live on the fat of the land, drawing millions a year income from the sweat of the workers. Under Socialism they would do useful work or perish. As they do not desire to either perish or work, they oppose Socialism and uphold the system under which they can live useless lives. The only reasonable reason why ary person would prefer public ownership of the railroads,

wire, water or any other service is that they would be able to get such service for a less cost (labor) on their part, by the elimination of the profit element. If the public ownership of these things would make them cost the people more they would not want public ownership. Now the same law relates to the food, clothing, shelter and entertainments of the people. Public ownership will give the people these things for less labor than private ownership and that is just what the Socialist understands and

The rich do not recognize the rights of property. They confiscate the labor or even the personal property of the workers or of each c.her. In the Appeal of October 11 I read an article on stenciling Socialism which is pretty good. I herewith inform the comrades how they can make a good hektograph or copying machine, which will copy many letters from one original I saw this in Machinery of Sept. 1900, and it works fine. For letter size mix about fix oz. of glycerine with one pound of whiting, kneadof glycerine with one pound of whiting, kneading well as you would dough for making bread,
give it about all the whiting it will stand without crumbling. Flatten this mixture on a tin
tray or upon a smooth board to about onequarter thickness. Next procure a package of
violet or purple aniline or diamond dye obtained in drug stores and mix a pinch of this with a few drops of water making it just thin enough to write well. Use this ink in making enough to write well. Use this ink in making your original upon some hard glossy writing paper; do not moisten but lay writing side down upon your copy mixture and run your fingers over lightly leaving a minute or so, then take by one edge and raise off; you will now have a slick negative of the original. You do your copying from this, using a cheap grade of writing paper for this pursece; must not be glossy. Letters copied in this way can be mailed for one cent if left open, enabling the comrades to do twice the propaganda work for the same money.

M. JACKER. the same money. M. JACKER.

Next week the Appeal will be filled with as election returns. They will cause constituention to the thoughtiess, who have only read about the old party votes in their papers. It will be the greatest propagands paper for that reason, ever issued, because we have never had the opportunity to tell such a story, for the acts find not occurred. PUT ONE OF THESE PAPERS UNDER THE NOSE OF EVERY VOTER. We are the only fellows who have reason to rejoice. It is the bell clang of the New Order. If the new machinery gets arected in time the edition will be eight pages. PER 100, 50 cents. It will be two years before you will have the opportunity fo make the impression this showing will make. PuT up your last dollar, if need be, to make the most of the vote.

e committee of Ekaterinoslaw of the Soial Democratic party of Russia has brought hese odious facts to the attention of the pubnas broken out in the prison of Bouterki at doscow in consequence of the barbarous reatment inflicted upon political prisoners.

At Odessa the paraders have been flogged and the peasants of Kharkoff have been tor-

ared as atroclously as those of Poltava.

The "Bund," or the General Union of Jewish

The "Bund," or the General Union of Jewish Workers of Lithuania, of Poland, and of Rusia send testimony which completes the record of the proceedings. This is as follows:

"The parade of the 1st of May took place at "The parade of the 1st of May took place at the Cossacks struck the paraders in the street with heir usual ferocity. The bearer of the red ing was abused most ferociously, so that his lights were cut through and his blood flowed. ag was abused most feroclously, so that his clothes were cut through and his blood flowed in streams. Some dozens of paraders who were arrested were beaten as they were conducted to police headquarters. But all these avageries were only the prejude to the bloody cenes which were enacted on the next day. "Already, before the parade, by order of the overnor, Von Wahl, bundles of rods had been repared, soaked in water. On the 2d of May epared, soaked in water. On the 2d of May he torture took place in the court of the police commissioner in the presence of a commission of executioners, composed of the governor, on Wahl; the prefect of police, Nasimon; he doctor, Michatloff; the commissioners of the doctor, Michaeloff; the commissioners of police, Sculiko and Heatchewsky; of Brigadier Martinoff, and the solice sergeunts, Cyboulsky and Miloucha. The paraders who had been arrested were called up, one by one. With a cynical frony the governor began by extending a May-day greeting to each prisoner. And here is a surprise for you, he added.

NTERNATIONAL Socialist Bulletin addressed by the executive committee of the International Socialist Bureau to the Socialist parties of all countries:

"Give him fifty blows." "And you?" "Fifty years." "Give him fifty blows." And so on. One prisoner, more reckless than the others, answered that his age was a million years. They gave him a hundred blows and then, as he had lost consciousness, they brought him to himself by pouring cold water over his head, then made him lie down again to continue the formade him lie down again to continu by pouring cold water over his head, then made him lie down again to continue the tor-

this event, despotsing the could en-imprisonment, torture, wholesale slaughter dure. The governor, Von Wahl, watched that that all those who through their organization the blows should be given vigorously; if the alt all those who through a better social executioner by chance let fall a blow that was a te and are planning the deliverance of the this blow did not count.

"The beating continued until the tortured man lost consciousness; if he proved able to get up on his feet they began again. And to aggravate the shame of the torture they offered the tortured man, after having brought him to consciousness again, a poster on which was found these words: 'Vive le premier mai! These posters had been distributed the day bee parade by the local committee of the General Union.

"The bearer of the red flag and one other workingman were flogged to death.

"The committee of the Bund, the Socialist rty at Wilna, the Social Democratic party party at Wilna, the Social Democratic of Poland and of Lithuania, the Labor mittee at Wilna, and the Russian Social Democratic group at Wilna, have put out jointly, with reference to this revolting and ignomin!ous torture, 10,000 copies of a proclamation in Russian, in a Jewish jargon, and in Polish, in which it has designated the names of the re-sponsible executioners, and it ends with these words: 'Vengeance shall fall upon each of you and your names shall be accursed forever.'"

The white terror rages in Russia more and more feroclously. The episodes of Wilna are unhappily but one instance a little worse than the others.

International Socialism, profoundly indig-nant at the atrocities which are daily commit-"famine revolt" (refusal to take food) ted against Russian workers, makes its appeal to public opinion than these abominations be denounced.

Moved with grief, it sends its greeting of solidarity to the Russian workers who, with unexampled heroism, are struggling for their political and economic emancipation.

It is the duty of the Socialist Party of every nation to acquaint people with the abominable wrongs which are being done to the working class of Russia and without delay to raise their protest by such means as they shall think most proper against the czarism which, in its official discourses, speaks of peace, and which in reality is waging an implacable war against ople who demand their right to liberty and

[Reader, as you scan this description of the horrors of Russia, reprinted from the August International Socialist Review, please remember that there is a reason for such atrocity— that reason is the desire of those in power to hold private ownership of politics, industry and the church. If it profited no one to commit these crimes, they would not bloody the pages of history. They are done to intimidate and keep down the growing desire of Labor to up-lift itself into Manhood. For the same reasons that the injunction, the militis and the sons that the injunction, the militia and the starvation that are meted out to Labor in America when it asks for more of life. Capi-talism is the same in every country, is moved by the same impulses, and will commit the same crimes when it has the power.—Ed. Ap-

The vote on referendum in state matters was carried by 15,564 to 23,633 in Chimatters was carried by lo, bos to 23,633 in Calcago, as was also the matter of local referendum and election of United States senators by direct vote. With six to one in favor of such laws, I wonder if the politicians will enact them? Hardly. The people rule!

> The Register, Central City, S. D., has changed

Organized labor in Chicago, through its leading men, has taken out a charter from the state to organize a political association for the purpose of entering the city campaign and capturing the political powers. The leaders say there is no sense in the working class voting the old tickets with any hope of bettering their condition. They claim to have the majority of votes and can elect and carry out any program they like but results have shown that jority of votes and can elect and carry out any nongram they like, but results have shown that this is never to be accomplished by voting for Union Labor men on the old party tickets. It is understood that the same methods will be adopted in all the cities. Won't there be fur flying when labor does enlist in class politics?

Socialism is making great progress in Tri este, Austria, where there is a Socialist club with 1,000 members. They also generally work with the trade unionists of the town, and several trades have been successful in obtaining a rise in their wages.

Two thousand dock laborers went on strike at Montreal, Canada, Oct. 29, completely tying up the business of the port. The Boer leaders were very well received in Berlin. It was essentially a popular greeting. The one man in Germany who has made no sign of welcome is the Emperor, and yet it is the same man who, after the infamous Jameson raid, sent the well known telegram to Kruger, informing him, in fact, that he would have lent the Boers aid if they had not been strong enough to defeat the raiders. Yet he abandoned them to their fate. He is as contemptible as Napoleon III. in abandoning Maximilian in

A dispatch from London states that C. M. The ship-yards are steadily paying off men, and matters are made worse by the fact that several hun-dred reservists have returned to find no work obtainable.

It was recently stated that prior to the South African war quite £20,000 per month was being sent by miners to relatives in West Cornwall. England. A Cornishman, who has been out in the Transvaal, writes to me on the subject as follows: "A simple calculation will show that the loss amounts to nearly three-quarters of a million of money. The Cornishmen com-menced to leave the Rand directly after the Jameson raid. Besides the large sums sent home for the maintenance of their families. the miners banked considerable amounts, which they brought home when they left the country. A drive from Redruth to Camborne will show you a continuous street, four miles long, dotted with new villas that have been built with South African money—a strong reason why Caine, an anti-Jingo, is returned for this division. I may mention that the average wage of a miner in Cornwall is about £3 a month. In South Africa, under the Beer government, his-wages would be nearer £60 a month. More municipal debt! Glasgow has decided to berrow £750,000 for the erection of houses for the poor. It is really wonderful how these improvident municipalities live on their losses. For example, in thirty years Glasgow has done away with its slums, built model lodging houses, acquired a magnificent water supply, and installed an electric tramway system secand installed an electric tramway system sec-ond to none, which makes a gross profit of over £100,000 yearly. It has laid out parks, runs its own gas and electric lighting undertakings, and was the first municipality to have its own telephone system. The government of Nicaraugua has recently put into effect a remarkable act regulating and defining labor which would not do in this or any land of liberty. The law defines a laborer as any person, male or female, over sixteen years of age, not having the equal of \$100. It reads, in part, as follows: "All laborers must have an employer. Any one found unemployed will be imprisoned for twenty days and snade to labor on public works while awaiting an employer." The act further provides that each laborer must have a receipt from his employer, which he can show to avoid arrest for being idle. Perhaps this remarkable law is intended to avert a revolution. If the laborers are intelligent it would be pretty certain to lead to a revolution. But they are not intelligent, and will be compelled to submit to this piece of tyranny.—Philadelphia Press. It is announced in Chicago that unless the Chicago & Alton and Chicago & Eastern Illinois railways granted the increases demanded by machinists, boilermakers and blacksmiths, strikes on these roads would be ordered next week. Other strikes likely would follow.

A dispatch from Springfield, Ill., states that the machinists, helpers and boilermakers em-ployed by the Wabash road struck October 31, and began a campaign among the railroad ma-chinists of the west for higher wages. Unless the Chicago & Alton and the Chicago & East-ern Illinois railroads grant the demands of their men within the next week they, too, will suffer from a walk-out.

The Buell woolen mills of St. Joseph and the largest in the state of Missouri has a strikge on, due to differences over the wage scale. Some of the strikers say that all but four employes have agreed not to return to work in the mornshut down of the plant. The demands of the strikers, if allowed, would mean an advance of from \$1 to \$3 per week in pay.

A company of capitalists, headed by W. A. Shepard, proprietor of the Onondaga Whisk Broom Works, Syracuse, N. Provision has been made by the board of directors for the Illinois Central road to in-stall a block signal system between East Cairo and Fulton, a distance of about sixty-two miles. It is understood that the company will, as fast as possible, block the system from Chicago to New Orleans, and so arrange the stations that trains can be run without the usual train or-ders, as is done now on the Chicago division of the Burlington road. The consolidation of the various stockyards companies could be effected with com-parative case after the consolidation of the beef packing interests. With the exception of the Chicago stockyards, which are controlled in Boston, all the properties involved are owned and controlled by the owners of the principal beef packing plants. Having the ownership of these various properties so closely concentrated in the hands of the people whose other in-terests are so united makes it seem certain that there will be little to hinder consolidation. The plan for the consolidation has not pro gressed as yet to a point where the amount of stock required has been more than discussed. It would undoubtedly run close up to \$100,-

Illinois State Federation of Labor resolved that members of trade unions should withdarw from the militia. The adjutant general of the state has issued an order that all union men could withdraw if they cared to. During the New Orleans street railway strike a whole company laid down their arms and refused to do riot duty because of sympathy with the street car strikers. At Shamokin the same four Pennsylvania militiamen headed procession of strikers carrying a large American flag, who were holding a demonstration for the Socialist party. Four members of one of the companies of a regiment stationed at Schenectady, N.
