The Agrarian party has been wiped out and the rieisiunige Volks Partei of Eugene Richter will almost be wiped out, if at the second ballot the national liberals and clericals fail to vote for Richter's men, which is more than likely. Richter himself was beaten by a Socialist by 3,355. Bremen, the first beaten by a Socialist by 3,355. Bremen, a stronghold of the Fielsinnige Verinizung, was conquered by the Socialists, meet and talk over their slavery. Only Hammurg, and Leubock are Socialistic throughout. Many workmen have heen discharged for voting the Socialist ticket.

N. Y. VOLKS ZEITUNG.

Berlin, June 17 .- Official returns from 330 constituencies, with 44 yet to be head from, are: Socialists 57; center party 68; conservatives 21; free conservatives 4; national liberals 6; Poles 5; total elected 161. The Socialists claim that they will gain about 25 seats more in the reballotting which is necessary in 169 constituencies.

BERLIN IN THE HANDS OF SOCIALISTS.

The Socialists carried 5 of the 6 Berlin election districts in the first onslaught, and will have a reballot in the sixth, with good prospects of carrying that also. Total Socialist vote in Berlin is 220,000, a gain of 68,000 over the previous election.

SAXONY NOW A SOCIALIST STATE.

The capitalist Dresdener Nacrichten admits that the Socialists obtained a majority of 100,000 votes over all other parties in the kingdom. They carried 18 out of the 23 election districts, and get reballots in 5 districts, with excellent chances of winning in most of them.

Hear From Madden

Socialists had polled more votes in the empire than all other parties combined, the local postmaster brought us a letter from Madden. There is no aper in the nation more religiously read at the seat of the government at Washington than the Appeal. The country is full of small minded people who think that Socialism is a crank's dream, and that it will not amount to anything, but this view is not shared at Washington and on the stock There Socialism is correctly measured, and the certainty of having to deal with it as a great political power is fully realized. A certain prominent trust magnate was asked not long ago where the concentration and trustifying process would end. "Well," said the millionaire, "some day the fool people will combine against us, and take what they have created, but we are going to have a d-d good time before they do it." Just so. rise ones know that Socialism can only be delayed, not prevented, and their opposition is directed to that end. Madden is one of the guardians of the capitalist class, working in the guise of a public official. The Appeal must not send a million copies through the mails, and can send only as many extra copies as we have regular circulation, says his letter. Subscribers may not pay for a bundle of extra copies, and have them delivered to them by government efficials, for that is merchandising, says the astute through the mails, for the government pays so much to the poor railroads through the mails, for the government pays so much to the poor failtons more than all the durf people in the for hauling the mail cars, that it is necessary to economize at every point. Then, too, the Post Office Department has lost a great deal of money in bonuses to pots of the department chiefs, and other expensive things that so give a monopoly of a necessity to a set of men organized to make money out of them, they ought to be squeezed. Hurrah (or the judge. He knows a good as usual it is papers like the Appecl that are supported by the working thing. class, that must suffer. So comrades, you will have to get your bundle orders of Jubilees by express and if you have ordered and directed your papers to a point that has no express office, you must write us at once and give nearest express office Madden don't like the million. How would it do to give him a taste of what we can do and make it two million? The boys have worked at that gait during the past week, and have rolled up more than ONE HUN-DRED THOUSAND ORDERS FOR THE BIG EDITION. A glance at the returns printed below will show you that California has run away from her competitors, and has now contracted for more than 30,000 copies of the paper. Mirsouri is doing well, but she has gone down against the flood of Californio orders that have poured in all week. Next to Missouri now stands Ohlo with her 20,000 orders, and after the Buckeye state comes Illirois, with almost as many as Ohio. After these states comes Kansas with 15,000, and following close behind is Pennsylvania with more than a dozen thousand. The New England states just now are manifesting great activity, ail of them save Connecticutt being well represented among the leading states. The indicator now stands at 319,100 from 1382 persons. It is true that a large number have been ordered by locals, but the limit is as yet a great ways off. In fact we have just begun, and we expect the coming

WEALTH ALWAYS POLLUTES.

Maxim Gorki, the Russian novelist, oldly charges that the massacres of the ews was "led by men of cultivated so-isty." The Russian press refused to Jevs was "led by men or curricated so-ciety." The Russian preas refused to print his article, but he sent it to Ger-many. He says that the wealthy insti-gated the horrors because the Jews were opposed to the established order, and they gated the horrors because the Jews were opposed to the established order, and they would prefer to murder all of them rather than give up their lives of case and uselessness. It is so everywhere, in this cour y the wealthy casses would prefer to have a war in which half the people would be killed rather than give up their graft of interest, rent and proft. The rich Jews were protected. Wealth profices its own.

A Socialist cougress was recently hald at Osaka, Japan. The attendance was large, but local. Great impressions made on the common people. Police stopped

and-owners vote. A secret propaganda will likely have to be adopted to make will likely have to be adopted to make progress. The working people deemed it only to make wealth for the owners of property and to fight in their wars. Modern machinery is being applied in Japan as rapidly as the capital of the world can put it in, and that will of necessity produce organized labor, and that will produce Socialism.

THINK OR STARVE.

The Tin Trust's plant at New Castle. The Tin Trust's plant at New Castle, Pa., has just put in operation a "catching machine" for handling tin plates that dirflaces many hands. It has also obtained exclusive control of the patents on machinery for making "continuous roll" roofing, that works automatically, and will shortly displace all "rollers" in the tin mills. Guess the workers will become Societies after awhile or Starve. me Socialists after awhile or come Socialists after awhile or starve.
Under Socialism these machines would
not cause the discharge of a man nor
the reduction of wages—but on the other
hand would decrease the number of hours
of labor. But the working people of
Pennsylvania at the last election registered their desire to, have the present
system continue. Because they like it?
No, because they do not know what Socialism will do for them.

TO PRODUCE A PANIC.

A Chicago dispatch to the Topeka Daily Hernid, republican, dated May 1, states hat it has been established by the testimony of a capitalist who refuses to join, that capitalists and trusts are now preparing to force a panic to cause a depression that will throw many industries into idleness and thus while they gobble up the stocks at a low price, will also break up the labor unious, the latter being the principal object of the move. While the majority will sagree that such traitors and public enemies should be hanged, they will only be honored because they own the POLITICAL machinery of the nation. How long will take labor to use their votes to end the rule of these vampires? With Socialists in office there fellows would soon be behind the bars.

As in America, private ownership skinned the land leaving it barren, just to get a fortune quick, no matter what the future may suffer. This is from the cable-gram, and shows how private ownership stire ownership aids progress:

Private ownership, especially in Northern Sweden, here irrees are necessary for keeping the climate healthy, is radically restricted. State for estawill be increased and county and township forests formed. The debate discosed a general recognition of the fact that private ownership of forest in the widen tendersteadly to make the land.

DEMOCRATIC HONESTY.

The democrats are the friends of the working class! If you don't believe it, just look at the case and are continued on in Illinois, where warrants are out for several senators and representatives for being bribed in connection with laws recently passed. Even the U. S. Senator Stone and his literaght savernor are so Stone and his lieutenant governor are so close to the fire that they are scorched very badly. These are the henest men and of the honest party that denounce the republicans as being corrupt and ask the support of the working asses—as they surely are for supporting such criminals. As between the two old parties the republican is by far the most honest—it is the enemy of labor and makes no claim otherwise, while the democratic party is the enemy while posing as the friend of labor. The democratic party has control of all the southern states where labor is the worst treated and which has the most vicious laws over enacted. Yes, the democratic party is a friend of the working classes! But only foolish children believe it. Stone and his lieutenant governor are so

AMERICAN CHEAP LABOR.

To put it in plain words, they are the said of the said o who OWN them, just as effectually as the anti-bellum slave owner owned his chattel slaves. The German lawmakers state that American labor is cheaper than theirs and use it as an argument to raise a tariff to keep out American goods. Why not let the fareigners make their own goods? Why should Americans work to supply foreigners? Is it because Americans have more goods than they can use or want to use? Have you any brains? Then why not use them?

AMERICAN EQUITY.

According to the St. Louis Post Disputch of May 23, the anti-high school ticket was elected at Believille because the wives of merchants, lawyers and other "fushionable" women went to the polis and voted for it. When asked why, this is what the wife of a merchant is reported to have seid:

"One of the immediate results of this merging at St. Louis will be a large percentage of the radical members of the party will go into one or another of the Socialist parties or organizations. The People's party press will find their occupation gone. A large number will die, a large proportion of the survivors will become socialistic. Perhaps in 1904, perhaps in 1904, be licas of the men who went down here before the silver exclone will reappear. Mr. Parry, president of the manufac-turers' association, in his address at New Orleans, paid this compliment to the labor

unions:

"Organized labor knows but one law, and that is the law of physical force—the law of the Huas and vandals the law of the average. All its purpose are accomplished other by accusal force or by the threat-of force. It does not place its reliance in reason and finishes, but it astless, buyeasts and coercion. It is, in all essential features, a moving no master except its own will and it continually condeming or defying the constituent condeming or defying the constituent entire the continual continual in the continual grows. And organized labor votes the same tickets as Mr. Parry and his democratic partners in exploiting labor? We know this, for there are two million votes in organized labor ranks, and as there were only 400,000 Socialist votes, we know they must have voted the republican and democratic tickets to elect mea who serve the Parries. Organized labor should so vote that Mr. Parry will see that they know another law than force—that they associate themselves with the Socialists, elect their members to legislatures, congress and the bench, and make laws in their own interest, and make such men as Parry the outlaws. They can do this. If they do it not, they play into the hand of the Parries.

So rapidly are the industrial conditions flux-rapidly are the industrial conditions. public to realize what it an incomposition flux-rapidly are the industrial conditions flux-ring that it is almost impossible to keep track of it. According to the dispatches, two hundred thousand workers were on strike in New York, 60,00 in Clicago, and every city in the union has more criess labor troubles, some of them being completely tied up. This of itself is nothing so very different from what it has been often before, except the number engaged. What is different is the fact to work where they please, there would be no strike. Because they can't is just the cause of strikes. This condition The Appeal three years ago said would be the inevitable result of the later stages of the labor disputes, and that when it came it would force the workers, for self-defense, to join forces in the political field and capture the powers of government to belp themselves. That time has now arrived, and from now on the workers will go from one political victory to another under the banner of Socialism, and use the political power to aid their struggie against their masters. Men will forget they are anything but citizens and workers; that they have common interests against the master class; that they have a right to the earth and the fullness thereof; and under the political banner they will accomplish what years of struggingle and suffering in strikes has not been able to get. This means the battle of Armageddon-it means that the workers will own the earth; that kings, emperors, aristo, ats and capitalists will be defented. For when such action in one country shall point the way, the workers of every country will be quick to a follow the example. The twentieth century is fulfilling the promise.

moralized elements, a population that gradually grew to 2500, he turned into a model colony, in which drunkenness, police, magistrates, lawsuits, poor laws, charity were unknown. And all this simply by placing the people in conditions worthy of human beings, and especially by carefully bringing up the rising generation. He was the founder of infant schools, and introduced them into New Lebark. At the age of two the children came to school, where they enjoyed themselves so much that they could scarcely be got home again. Whist his competitors worked their people thirteen or fourteen hours a day, in Lonark the working day was only ten and a half hours. When a crists in cotton stopped the work for four months, his ark the working day was valued as the work for four months, his werkers received their full wages all the time." If this is the result of a little improvement in environment, and for a little space of time, what will be the glorious results when ALL environments are made what they can and should be for all time? Crime is a product of the present industrial system. Man is so interesting odd, made in the image of his maker, that when the fearful stress and maker, that when the fearful stress and specific is eased up he no longer needs spentated from the wheat, for we don't support the manufacture. The "Daily Kennebee Journal" regards it as a "reaction in Socialism" that two or three self-seeking individuals, who have never taken the trouble to study Socialism from its classics, have left the party and are now attacking their former compared to the party of the administration. ity. "The workingman should look for a rainy day by saving a little of his carnings each week. If he does this he will never fear to take a stand against the arbitrary action of any combination of employers." This is the advice of the "Taxpayer and Workingman" of Long Branch, New Jersey. If the worker with an average wage of \$9 per week will just feed his family of four on stale bread and second-cless canned goods. just feed his family of four on stale bread and second-class canned goods, wear second-hand clothes and live in a second-hand barn called "home," he may be able to put aside one dollar a week. There are about 10 million men of this class in the Unded States. If every one of them would save a dollar per week, they would keep 10 million dollars per week out of circulation. Most of these people don't believe in banks. If they put a dollar a week into their stocking, the 10 million of them would keep 50 million dollars per year out of circulation. But suppose they carried their 52 dollars a year to the bank. Their saving would still represent an underconsumption of 500 million sent an underconsumption of 529 million dollars per year, or \$5,200,000,000 in ten years. Now the tendency of the capital-ist system of production is to always produce more than the bulk of the con-sumers, the working class, can buy back with their wages, which only represent the smaller part of their product. Hence the saving of a great mass of workingmen intensifies the problem of sent an underconsumption of 520 million tion, and the inevitable outcome will be could break the bank, in which he had deposited, any day they made up their minds to do so. Why about 5,600 republicans and democrats who swated 5,000 republicans and demorrass who wanted to lynch two negroes in Mayaville, Ky. These law-abiding, peace and order loving citizens ought to resent the insinusities that they are a mob. When the old party politicians want the votes of this mob, they address them in a different language. The detection is, When are the citizens of the United States a mob, and when are they "The flower of the universe?" The same question often occurs to the working men in this country. If under Socialism all industries will be run like the U. S. Postoffice is tenday, will everybody have to give bonds the same as the carriers and postmasters to-day? Student.

Under the present system bonds are required, because the bondholding class are in control. As loty as one class lives by the exploitation of mother, there will be an effort on the part of the ruling class to exert a pressure, op. the exploited class. Under Socialism, there will be only workers, and no exploiters, hence there will be no bonds or any other means of subjecting one man to the power of another.

Do you think there is just as good a chance as ever for a man if he will get up and hustie? X. Y. Z.

That depends how you mean it. If you mean to say the great majurity never had a chance under capitalism to become independent and well of them I agree with you. They have as little chance now as they ever had. But if you mean that the great majority of the working men of this country have as much chance now to find employment at good wages, as they had before the era of machinery and trusts, then I comphatically disagree with you. Sustaining Power.

The sustaining power of Postum Coffee when properly cooked is greater than most people imagine and it is well illustrated in the story told by a young Texas woman who says: "I almost lived on Postum Coreal Coffee for over a month and there was over a week I did not eat anything at all but just drank the food drink Postum and yet I grew stronger and gained weight.

"Our family physician examined Postum and decided to use it altogether in place of coffee. We all think it has no equal as a nourishment for the sick for beside being pleasant to the taste it so strengthening. My father and mother have always been coffee drinkers and suffered all kinds of troubles from the coffee until about, a year ago a neighbor was praising Postum and mother decided to try it.

A number of teamsters made use of their right to "work under such conditions as they pleased" and demanded an eleven hour day and \$50 per month. The capitalists on their part insisted on their right to work the teamsters as it pleased them, and to "run their own business," and so the tree rights elsshed and the trouble settling this question. An easy and sure way is to let hill the capitalists vote their side, and let all the workingmen vote the other. Then we shall quickly see who is right. Think it over.

ic, any more than they desire a class struggle, but both of these things are facts and it is a part of the business of the Socialist teacher to point them out and prepare the public mind to deal with them. When the panic bursts full upon us, Socialists will suffer along with others. There will be hungry men walking the street and gaunt mothers and starving children. Stores will be full of goods and the land full of empty pockets. Granaries will be bursting with plenty and every market will be glutted with unsalable commodities, for it is the first referendum. There are many surface causes, but the one underlying that the did it with the manifest intention flot that makes commercial depressions possible and inevitable is the fact that or playing a sharp political trick. It not production and consumption do not balance each other. There are two working in confusion. Let us simplify our machiners entering into production—the man and the machine. Hand labor is nerry. The national secretary is abundant-Bacists energy into production—the man and the machine. Hand Pitor is nery. The national secretary is abundantabolished, and the working class must sell themselves to the owners of the ma- by able to transact the business of the chief and the working class must sell themselves to the owners of the male chief and the working class must sell themselves to the owners of the male chief and the machine goes to the product turned out by the man and the machine goes to the capitalist class in turn seek a market for the product of the man and the machine, only the man consumes. Machines make hats, but do not wear them; food, but do not eat; buggies and wogons, but do not ride. The centus reports tell us that the average working man creates by his labor. reports tell us that the average working man creates by his labor nearly \$2500 in product values, and that he receives in wages less than \$500, of he producer, therefore, can buy but one-fifth of his own product, and the capitalist class must dispose of the balance in some way. Some of the products are some are consumed by the capitalist and professional classes, some are unloaded on other countries, but these means do not keep pace with production, and another panic is in process of formation as soon as one is finished. 33 followed an era of great production. Mercantile establishments with goods at the beginning of the depression. Factories all over the land closed down and were more or less unoperated for three years. Sheriff sales closed out much of the stored up products, for little or nothing. Shelves ed at great sacrifices and business commenced again. I do not say octors did not enter, but they were only incidents and intimately foundation cause. Succeeding the panic we have bad an era of high pressure production. Speculation has run wild. Stocks have been inflated ancial ship is so freighted down with a dead load, that a false turn of the tiller would submerge us at any moment. Sometimes a panic is started by over-speculation among capitalists and resulting forced liquidation on the stock tarket that overreaches the loaning capacity of the banks, sometimes by the financiers, who, having londed up with evidences of debt, bring on a money for the purpose of robbing the debtor class, but ever and always the industrial system alone makes this possible. Especially do we desire to bring this matter to the understanding of the old Populists of whom doubtless thousands will read these lines. Know that your money parie has its foundation in the wage system, that drives the worker, whether of farm or factory, to enormous production, and pays him but a small fraction of his product for his labor. The farmer is but an employee of the capitalist class and his net income does not exceed, and in most cases is less than, that of the wage work-The wage will not buy back the product, and a surplus is created that closes the mills and factories, and fills the land with hunger in the midst of plenty. The panic will come never doubt that, whether it is precipitated by overspeculation, financial manipulation, or is delayed until a sufficient surplus is created to make the closing of mills and factories necessary. We can await its coming with certainty, but what of events when this dire condition is once more forced upon us? Is it not possible that it will create revolution? THEY MARRY.

We take the following interesting ex-tract from Comrade Dan White's weekly communication to the New York Worker: Representative Carey was married to omrade Clara Stevens of Hartford last Friday. Good wishes go out to the couple from thousands of fraternal hearts. friday, Good wishes good to the conferent housands of fraternal hearts.

On Thursday, when the house convened for the afternoon, an interesting scene took place. Representative Schofield of ipswich took the clasir and Representative Callendar, Carey a pld antagonist, took

tree Callendar, Carey a sid antagonist, took the floor and addressed Carey. Congratulating him in a very graceful address, upon the event of the morrow by which he was to give the lie to the slander that Socialists do not believe in marriage, he presented him, on behalf of the members of the house, with a wedding gift in the shape of a beautiful chest of table silver. Carey, realied in a characteristic suscept. Carey replied in a characteristic speed Carey replied in a characteristic speech, humorous and serious at once. He said that his example not only showed that Godalists appreciate the institution of marriage, but that his waiting until such a mature age showed how Socialists do things. They make sure what they want and they make no mistakes. There was no blank space for a divorce application on the back of his marriage certificate. He was touched beyond power of expressions. He was touched beyond power of expres He was touched beyond power of expres-sion by this manifestation of good feel-ing. "I have feught you in defanse of the principles which I love and believe in," he said, "fought you with all the power I have. I will continue to fight you on behalf of those principles until my lips still be waged by my class until victory still be waged by my class until victory is won and until men no longer have to clutch at each others' throats in a daily struggle for life. We are political enemies, absolute and uncompromising. But this gift, and the words that go with it show that men may differ politically and yet be bound together by a tie of human feeling. I am not used to this sort of yet be bound together by a tie of human feeling. I am not used to this sort of thing. If this were an attack you were making upon me. I would know how to meet it. If it were a box of bricks you threw at me. I would know how to hurl them back. If I do not respond in well chosen words, you must remember that we are in the habit of meeting in battle but that we Socialize lows for the time when

that we Socialists long for the time when we can meet in pence."

The incident shows the personal respect that Carey has inspired in those with whom he has exchanged the hardest blows.

TANFORD'S SPEECH. Trade unionism is here as a rebellion

against slavery. We are here to-day to abolish what those who understand political economy in other than legal terminology know as wage-slavery. Wage-slavery is just as brutal and just as legal as any slavery preceding it. What constitutes slavery? The fact that the prostitutes slavery? duct of the laborer belongs to the mas Those of you here who are workingmen—how many of you dare throw up jobs tomorrow? Hold up your hands, you voting

OREGON ELECTION.

As usual the Socialists must wait for the freight trains to bring in the election returns. There has been a special election in Oregon for congressman, and as is the rule, though the other parties have fallen off in their vote, the Socialists were on the spot and have increased their vote over previous elections. We give below the returns so far as reported:
