TO THE RESCUE! BY EUGENE V. DEBS.

HERE is not a scintilla of creditable evidence against the leaders of the Western Federation of Miners who are now locked up in the prison pens of Idaho.

The kidnaping of these men is prima facie evidence of their innocence.

It is a case, not of lawful prosecution, but of diabolical conspiracy and premeditated massacre.

Governor Gooding, the central figure in the atrocious plot, has already declared guilt and pronounced judgment.

The simple question is, Shall it be carried into execution?

The answer, NO, NEVER! swells from a million hearts and the thunder of their righteous indignation reverberates from shore to shore.

There is no spark of justice, and, therefore, no shadow of real power in this wicked, heartless conspiracy.

The very isolation of the scene projects these midnight assassins into bold relief, while the finger of retributive justice points them out as they flit from cover to cover in their gumshoe maneuverings to wind and twist the deadly coils about their innocent victims.

Compared to such hyenas, ordinary highwaymen become reputable citizens.

The whole infamous plot will collapse like a scap-bubble and every conspirator will flee for his miserable life the very moment the light is turned on and an aroused working class and an outraged people close in on the gang of dark-lantern guerillas.

Caught in the trap of their own setting, and buried in the pit of their own digging, will be the final verdict of the higher court in which inexorable Justice is meted out to all.

With one mailed clutch upon the throats of his victims and the other brandishing the dagger of assassination, the so-called governor of Idaho presents a spectacle for men and angels to contemplate.

He has no particle of evidence, and knows it, else he would have proceeded by lawful means instead of waylaying his unsuspecting victims and bludgeoning them in midnight darkness.

That such a malefactor has the grim audacity, after striking down all law, to invoke its protection, is the very climax of criminal conspiracy.

He may surround himself—this Standard Oil candidate for the United States Senate—with his state militia and armed Hessians, but he will never escape the consequences of his brutal acts.

It is not the fair trial that we are protesting against, as they would have it believed, but the foul conspiracy to murder innocent men that cries to heaven.

It must not, shall not, be consummated.

The doors of the prison cells can be made to swing wide open and our comrades walk forth free men without a single violent blow.

To the rescue, ye toiling millions!

Your leaders have been ambushed by the enemy and their cry should arouse you like a trumpet blast upon the field of war.

Awaken, ye hosts of Labor! For you and your loved ones these faithful sentinels on the watch-towers have been put to torture; and must they now seal their fidelity and devotion with their lives?

To suffer these men to perish as the bloody consummation of a santanic conspiracy to destroy organized labor that the Standard Oil brigands and their murderous minions may have unbridled sway would cover the working class with obloquy, outrage civilization and make the twentieth century infamous to the last stroke of recorded time.

It is not Moyer, Haywood, Pettibone and St. John alone who are in the balance.

It is the working class of the United States and of the World.

It is, in fact, an acute stage in the class war.

That is precisely what it is!

The attack of the mine-owning capitalists upon the mineworking wage-slaves!

The "sovereign" states of Colorado and Utah, with all their

It seems to me that in such a land there must be, on this question of slavery, sluggar is to be awakened, as well as doubters to be convinced. Many more, we verily believe, of the first than the last. There are far more hearts to be quickened, than confused intellects to be cleared up,—more dumb dogs to be made to speak, than doubting consciences to be enlightened. We have use, then, sometimes, for something beside argument.—Wender Pullips.

I am aware that many object to the severity of my language; but is there not cause for severity? I will be as harsh as truth, and as uncompromising as justice. I am in earnest,—I will not equivocate,—! will not excuse,—I will not retreat a single inch,—and I will be heard.—William Lloyd Garrison.

civil, political and military machinery, belong to, and do the bidding of, the Standard Oil company.

John D. Rockefeller and Henry H. Rogers are the real governors.

The dummies that strut and swagger but do the bidding of the syndicate of sharks that list them in their assets.

And what is the shibboleth of this gang of pirates who have swooped down upon these states and extinguished civil government?

"To Hell with the Constitution!"

"To Hell with Habeas Corpus!"

Choice specimens, these, to pose as law-abiding citizens and moralize the people about peace and order!

A majority of 46,000 votes in Colorado is received with a volley of tobacco juice from the legislative and judicial hirelings of the mine and mill owning brigands who ARE THE STATE.

In such a state citizens are good or bad, safe or dangerous, as they serve or refuse to serve the brigands.

Moyer, Haywood, Pettibone and St. John would not crook the knee and bow prostrate to the tyrants.

That was treason to the State of Rockefeller.

Swiftly followed the intrigue of the brigands, the conspiracy of the governors, the midnight ambush, the kidnaping, iron handcuffs, special train, secret deportation, sneaking "sleuths" and solitary penitentiary cells.

Thus endeth chapter-one.

Now for the next!

SOUND THE ALARM!

Far and wide let the cry resound, "TO THE RESCUE!"

Arouse, ye sleeping Hosts of Labor!

The working class must write the second chapter, and it shall not end in tragedy.

The issue is clear as the light of day at noontide.

The life of the labor movement is in peril. The blow has been foully dealt from the dark and aimed at the heart.

Awaken, you Workers, from Maine to Mexico! Close up the ranks and lift high your banners!

To allow your loyal leaders to be wantonly massacred would brand you all with everlasting shame and bring disgrace upon your children and your children yet to be.

We must meet this issue of life and death with becoming courage and determination.

We should scorn to desert our comrades; we must be true to them as they have been to us.

Whatever cowards may say or traitors may do; whatever mercenary retainers may write or preach or charge or threaten, we shall stand loyally by our comrades to the very end, be that what it may.

The four names of our brothers in chains shall constitute our battle-cry.

MOYER, HAYWOOD, PETTIBONE and ST. JOHN!

Let them proceed with their hell plot and we will make it the political issue of the nation and sare them to face us before an outraged working class.

Let the mass meetings be sewed and all join in them, regardless of past differences.

Let no man dare divide the forces at this critical hour, lest he be looked upon as an emissary of the enemy.

Let one meeting be followed by another, and still another, increasing in numbers, intensifying in determination, and swelling the volume of protest and indignation until its roar is heard across the continent.

New York and California! Minnesota and Texas!

When you workers shake hands you shake the nation.

You need not assault Gooding's jail in which our heroes are captives. You have but to open your eyes, great Samson that you are, and fix your gaze upon the culprits and they will shrivel and crawl in the dust at your feet.

Let the warning notes be sounded and repeated! Let the workers be aroused as if by alarm bells at midnight.

Come forth ye toiling masses, from mill and mine, from shop and store, from farm and factory, from land and lake! Come forth ye organized and unorganized! Come forth ye men and women and children who are oppressed and heavy laden! Come forth ye people all who honor good men and true, and who love the right and dare defend it!

Crowd all the halls and streets and commons everywhere!
You are the people!

Parade the streets and bear aloft your flags and banners!

Let unnumbered voices rise and ring in warning protest!

· The cause is just; it must prevail.

Let woman's voice be also heard and woman's influence felt.

The wives of our imprisoned comrades have suffered more than we shall ever know, and their children cry to us to save their fathers.

Be not deceived by any seeming lull in the plutocratic program.

The tide of protest must rise higher day by day. The burning resolutions must be made to pour in a blazing torrent upon the heads of the conspirators.

Every dollar that can be raised at every meeting must be gathered in for the defense.

A million dollars may be needed to trail the serpent, unearth the reptile and lay bare the vile conspiracy.

Duly authorized representatives of organized labor must attend the trial from the opening hour, a dozen at least, to hear the evidence and keep an eye on the proceedings. Every national union should send a delegate; every large city a representative.

The cost would be but a trifle; the effect incalculable.

Such a representation could absolutely bar chicanery, compel a fair trial and thus win vindication.

Through such a medium, in case of emergency, the whole nation could be aroused.

Labor now has its own press that reaches the millions, and the results are already cheeringly apparent.

Labor has its own correspondents on the scene and their work has had a telling effect upon the public mind.

In this connection the work of the Appeal and of Shoaf, its special representative, cannot be too highly commended. It has had a really magical influence, and in this crisis every nerve should be strained to increase its circulation to a million copies.

The fight is on. It has been forced upon us. We are not responsible for it.

We are not favoring violence, but resisting it.

We are seeking, not to commit, but to prevent murder

"Thou shalt not kill!"

Hear that, Gooding and MacDonald!

Beware! A promised senatorial toga may yet turn into prison stripes.

Beware the wrath of an outraged and avenging people!

"I never could believe that Providence had sent a few men into the world ready booted and spurred to ride, and millions ready saddled and bridled to be ridden."

From ocean to ocean, from the lakes to the gulf, mass meetings have been or are being held by the working people to protest against the high-handed manner in which the governors of Colorado and Idaho, the mine barons of Colorado and lazaro, the mise barrols and their Pinkerton hirelings, have deliberately conspired to railroad innocent men to the gallows and wreck the only organization in the West that stands between thousands of honest workingmen and hopeless degradation and wage-

This article attempts—albeit with small success—to show how conditions have improved under the trust methods. However, some really illuminating state-ments are—perhaps inadvertently— "It was the operators' practice, at which the railroads loudly protested, to maintain an output largely in excess of

Praise for McPartland.

The purpose in presenting these truths is to contrast the former deplorable sunation with the present conditions prevailing under the trust management, and thus emphasize the utter unreasonableness of the miners in the pend-ing controversy.

The culminant infamy of the article,

The culminant infamy of the article, however, is found in the encomiums on the cowardly McPartland, of which the following will serve as a sample, and quite enough to sicken the reader:

THE CIRCULATION

I was the Appeal Army's inning last week-and the thermometer shows a decided gain-2,470. The indications are good that next week's report will beat that figure by several thousand.

Madden and Sir William, of Canada, jolted the Appeal pretty severely, I will admit, and, under their bearish operations, the list dropped and kept dropping until I thought the bottom had fallen out. I wondered if the end had actually been reached, and the time had come for the little old Appeal to close up its shop and give the buzzards of capitalism full sway. It did look like it at this end of the line. With one-half of our circulation wiped out and a big source of revenue cut off, a financial problem was presented which was by no means reassuring.

If there was ever a time in the history of the working class movement in the United States when a powerful newspaper was needed, IT IS NOW! I have often urged you to get subscribers for the Appeal-without subscribers, you understand, its influence would be nothing. I had the feeling at times when urging you to do this necessary work, that you thought I was asking you to do a personal service for me-"Working for Wayland," as the Boise Statesman puts its. It looked that way, I must onfess, and it discouraged me a good deal. Events of the past two months have demonstrated beyond doubt the need of the Appeal, and I am going to ask you to help keep it in the field. I seldom quote from the columns of other papers notices of commendation, but that you may get my thought I reprint the following editorial from the Salt Lake Crisis:

We cannot praise too highly the gallant fight that the good old Appeal to Reason is making in defense of our brothers whom the murderous finnkeys of the ruling class attempted to railroad to the gallows. The last two months, with Comrade Shoof in the field and the Rescue Edition driving the truth into the very teeth of the lying reptile press, have fully repaid every effort made in these years by Comrade Wayland and his army. The value of such a paper at this time can only be measured in that priceless thing, human life. For if Moyer, Haywood and Pettibone escape assassination by the legal things it will be due to the stirring up of the people by the Socialists and their press, and in this work the Appeal was the master worker.

If the Appeal can accomplish so great a work as this with less than 200,000 subscribers-what, think you, could it not do if it had a list of 300,000? The "Rescue Edition" would have gone to 5,000,000 if I had back of me a subscription list of half a million. The protest against this outrage-loud ective as it is-would have been doubled, yes, trebled in volume!

I am going to appeal to you with all the power and force at my command to get back of the Appeal with redoubled push the list up at once to the 250,000 mark, where we will be safe from financial storms and can then take eath and look to the future. Get subscribers-get MORE subscribers-and still MORE subscribers-and I will guarantee that the Appeal staff will give you a paper that will stand as the peer of anything ever flung sizzling hot from the printing press! Give the brightest minds in the Socialist movement the opportunity to talk through the Appeal columns to toiling millions and you will see the realization of your dreams and of my hopes—the Co-operative Commonwealth!

That is what we are working for-it is the only thing worth working for-and it is the only object we have any

Comrade George W. La Mance, of Greenville, S. C., hit the thermometer the heaviest jolt for the week ending April soth, with sixty yearlies. Comments of the Press.

Commenting on the attempt of the postal authorities of Canada and this country to suppress the Socialist press, the Daily Democrat, Johnstown, Pa.

The most conspicuous object of the enmity of the postoffice department seems to be the APFEAL TO REASON, a Socialist weekly published at Girard, Kan., and having a circulation of half a million. On several occasions this paper has passed the million mark and it has been receiving corresponding attention at the postoffice department. One means of securing subscribers employed by the paper in question was to circulate blanks with room for a dozen or more names to be sent in at club rates a late blanks with room for a dozen or more names to be sent in at club rates, a plan that has been employed by almost every magazine in the country. Howevery magazine in the country. However, the APPEAL TO REASON was informed that in the case of 'weekly' public cations such a process was illegal and would not be countenanced by the post office department. Of course, the issuance of subscription blanks had to be discontinued. But despite this and similar rulings the paper continued to grow Some enthusiastic propagandists ordered the paper in bundles, which they afterwards distributed. Some also sent in orders for back numbers of the paper in branched in the country. This is cour first trial for municipal election and, the results are so encouraging that we are going after the whole thing next election. Socialist candidate, which they afterwards distributed. Some also sent in orders for back numbers of the paper in the postal authorities to the paper in the postal authorities to the paper in the classification through the mails at second-class rates. This has applied the rule against the sending of great numbers of extra copies through the mails at second-class rates. This has blocked Wayland's financial game of industry that the postal authorities to the paper in the classification. Socialist candidate in the field. Socialist candidate for assessor had it out with the requestion, is to the effect that such may not be transmitted through the mails as some annealing. not be transmitted through the mails as second-class mail matter. To that extent the nasty viper has been scotched in this country, while it is expelled from Canadian mail pouches as completely as St. Patrick drove the analysis from the Canadian mail

The Canadian postal authorities have barred the Appeal TO REASON from the mails, and, naturally enough, the paper is making the most of such an excellent advertisement. The barring of any paper from the mails because of representing the moneyed interests and its political belief is a mistake. Any paper should be allowed the use of the Parsons.

mails to advocate any belief it may choose so long as such belief is not cal culated to corrupt good morals. There is nothing immoral or corrupting about Socialism, and if any one wants to talk Socialism, and if any one wants to talk it or write it he certainly should have the privilege. The authorities should also bear in mind the fact that the chief creators of Socialists are not the socialistic papers. The delectable band of financiers at 26 Broadway turn out more Socialists in a day than Marx, Debs, Gorky, Bebel, and the Appeal to Reason could manufacture in 1,000 years. "Lest We Forget."

Already the earth is thembling beneath the tread of an army in action. The murnur of the multitude that once fell so faintly on unincling ears has grown in volume until now it sounds like the voice of a stormy sea.

But above this army floats the pennons of peace. Not violence, but votes, will win the victory. The worker holds in his hands a weapon that with a single touch can conquer the world and transform its injustice like some wonderful wand.

For this reason it will not be necessary to resort to the arbitrament of syms in order to above our compades.

POSTOFFICE DEPARTMENT, CANADA.

Ottawa, April 11, 1906.

Sir:—
I am to acknowledge the receipt of your telegram of the 10th inst.,
upon the subject of prehibition of transmission by post in Canada of "Appeal

In reply I am to say that a copy of the "Appeal to Reason," dated March roth, 1906, was submitted to the department, and upon examination it was found to contain, among other matter, an article entitled "Arouse Ye Slaves!" signed Eugene V. Debs, which the department considers of such a nature as to debar the paper from the use of the Canadian mails,

I am, Sir, Your obedient servant,

E. H. LASCHINGER,

Acting Deputy Postmaster General.

SEDITION-The raising of commetion in a state not amounting to insurrection.-Webster's

Forced by the demands of the Appeal to declare its position, driven from the last ditch of official evasion and brought into the open field of frank confession, the powers of tyranny represented by the Canadian postoffice department have dropped the mask from their motive in excluding this paper from the Dominion mails, candidly admitting such action was taken because of an attempt to arouse the wage-slaves to a realizing sense of their servile condition and to inspire them with the courage to strike away the galling gives that so long have held them in industrial bondage.

thrilled this continent like an electric current, and sent a shiver along the spine of
Autocracy, whether in Idaho or in Canada; and tyrants now are troubled and the
seats of the mighty seem less secure, whether they be by the Thames or yet by the Potomac.

Than these, Debs never uttered words more worthy, speaking as he did from the full majesty of his manhood, with heart aflame and his soul on fire. Truly they be "seditious" words, "raising commotion in a state." Incendiary they are indeed, for they have kindled a conflagration that is lighting the minds of men with the rays of reason—a conflagration which will not be extinguished until the last vestige of vassalage has been consumed.

We will light the lamps of Freedom on a million altar stones. With the terches we have kindled at the blaze of burning thrones."

"Arouse, Ye Slaves!" This is the tocsin that has caused tyrants to tremble, that has humbled the haughty and rent the purple robes of power from the time of Therius Caesar to the days of Toothsome Teddy. These are the words that have startled the oppressor, from the time when Nero lighted the boulevards of the Eternal City with human torches down to these democratic days when men can be kidnaped with intent to murder because they have dated oppose the oppressor and denounce the crimes of the capitalists.

The minions of George III. did not show a spirit different from that of the servants of Edward VII. Debs is not less objectionable than was Washington. A Social Revolution is quite as dangerous as a military revolution. The political results are the same, and "sedition" must be suppressed at any cost. Any proclamation to the proletariat, any utterance calculated to stir the slaves, is "seditions" and must instantly be smothered by the iron hand of authority in Russia and America alike. "Arouse, Ye Siaves!" This is the tocsin that has caused tyrants to tremble,

America abke But the censorship came too late. The message has gone forth, and not all the powers of all the rulers in all the world can recall it, or lessen its effect, or stay the movement it has started. At last the slaves are aroused, and nevermore can they

be subjugated.

The Appeal has been charged with sedition, and according to the accepted, definition of the term it is guilty. Moreover, it is proud of its guilt—proud and glad. It is proud to be on the side of all the immertal rebels America has known, from Washington down to Debs.

Yes, the Appeal is seditious against slavery. It is treasonable to all forms of tyranny. But it is more than seditious. It is in open revolt against all the wrongs that have cursed the race through the centuries of social servitude and economic ignorance since civilization's early dawn. It is ceaselessly agitating POLITICAL AND INDUSTRIAL INSURRECTION, and its efforts will be unremitting until the broad banner of universal equity is firmly emplanted on the battlements of the the broad banner of universal equity is firmly emplanted on the hattlements of the

world.

The Appeal Army is a mighty host of social rebels, fighting with the potent weapons of peace many wrongs of greater moment than those that were overthrown by force by our brave colonial forebears. The historic parallel is convincingly apparent. Washington was declared a traitor and a price was put upon his head. The Continental patriots were denounced as rebels and hunted like beasts. Yet they triumphed for the reason that their cause was in line with progress, and now their names are emblazoned in letters of fadeless light on the scroll of a nation's memory and their deathless deeds are embalmed in the amber of immortality.

REBELLION HAS COME TO BE RESPECTABLE. SERVILE SUBMISSION IS THE ONLY DISGRACE.

Sedition is the "raising of commotion in a state." Let the Appeal Army continue this commotion, braving all wrath and all revilement, until every wrong has been righted and all oppression is overthrown; until freedom has found our humblest brother, until right is regnant—througout the world, until liberty is enthroned in every land, until justice is accorded in its most gracious fullness, even to the children of the islands of the utmost purple seas.

The Workers have wakened—they are ready for revolt!

No longer does Labor sit in service submission and caress its chains
it required the red spectre of murder to startle its vision and
