# The First Man to Bat.

This letter from Comrade J. H. Arnold, of Columbus, Ind., reached the Appeal office Tuesday morning, July 14: "Dear Comrades of the Appeal:—I have seen enough comrades to raise a weekly contribution to enable us to take 1,000 copies of the Appeal for the twenty weeks during the campaign. You may send us 1,000 copies each week, commencing with this issue, and I will collect the money and send the same at once.

Surely there are one hundred and ninety-nine other cities in the United States where the comrades are willing to buy and distribute one dividualism, but only "heads" thousand copies of the little old Appeal each week between now and elec-tion. There are two reasons why this plan should be adopted and without delay. First, it will serve notice on the gentlemen at Washington that bodies of there are enough Socialists in two hundred towns to give the Appeal a of men. circulation of 200,000 copies even though the papers have to be sent by express. A protest of this kind will prove of greater value to the Appeal and to the liberty of the press than anything else we may do.

There is another reason and an important one which you will at once ecognize. This campaign promises to be the hottest in the history of the country. The republicans announced that it is to be a campaign of education and that the people are to be told of the fallacies of Socialism. Surely we are not going to be outdone by the plutes when it comes to distributing educational literature! True, our opponents have the advantage of free use of the United States mails, but I will guarantee that one copy of the Appeal to Reason will knock out a ton of the trash sent out from republican headquarters. It only remains for you to see that one copy circulates until it is worn to shreds among your acquaintances and shopmates. I feel it in my bones, as I write these lines, that there and shopmates. ### And Here are Others.

Dear Comrades:-Your proposition to send 1,000 copies per week until election (or for four months) to Durant for \$80 looks good to us. We have studied the matter and secured a sufficient number of comrades to contribute 50 cents per month for the four months to raise the money. Start the papers at once, as we want to get right after this thing and do We'll make this campaign hum with activity, or you can place my name along with that of Ananias .- H. M. Coon, Durant, Oklahoma.

Dear Comrades:-I started the ball rolling with a proposition to pay one dollar per month for the four months. We raised eight dollars and decided to hold it open until next meeting. If we raise only ten dollars I presume you will give us a 500 bundle at same rate.-R. M. Asbury,

### Abolishing the Constitution.

Smarting under the restrictions im-posed by the British king the American revolutionists made haste to embody in the fundamental law of the new hation the above provision. The members of the first constitutional convention of the United States understood quite well that no nation could long remain free that did not permit the utmost liberty of discussion of public questions through the press. They sought to prevent a recurence of absolutism in the new world by providing for unrestricted criticism. providing for unrestricted criticism the acts of public official. They of the acts of public officia. They well understood the danger which lurked back of a successful attempt to censor

the press.

For nearly fifty years this section of For nearly fifty years this section of the constitution was never questioned. Not until the anti-slavery agitation did it occur to the ruling class that this provision of the constitution was objectionable. Then commenced a series of petty attempts to prevent a discussion of the system of chattle slavery. These attempts consisted of the destruction of the printing presses of offending editors, followed by the murder of the editor if he failed to heed the warning thus administered: the holding up by of petty attempts, to prevent a discussion of the system of chattle slavery. These attempts consisted of the destruction of the printing presses of offending editors, followed by the murder of the editors if he failed to heed the warning thus administered; the holding up by postmasters of abolition papers, the indicatement for high crimes of the editors who could not be reached by the moband finally by an appeal to the postmaster general of the United States asking for authority permitting local postmasters generally to destroy suspected liter. for authority permitting local postmasters generally to destroy suspected literature.

So strongly rooted in the public mind, however, was this provision of the constitution establishing an untrammeled press that the postmaster general, under the regime of the Bourbon democracy, feared to issue such instructions, so he merely sidestepped the issue by announcing that he would not instruct postmasters to forward incendiary and inflammatory abolition literature!

If remained for Postmaster General you L. Meyer in this year of the Lord, 1908, to establish a press censorship which his ante-bellum predecessors lacked the nerve to inaugurate. A comparison of the two epochs will show how far removed the nation is today from the ideals of the old colonial revolutionists who risked their lives when they took up arms against King George.

Contrast, if you will, the spectacle of a Lincoln restoring the mailing privileges of the old Chicago Times after it had been suppressed by General Burnside for violent, but just criticism, with a Roosevelt backing a subservient post-

master general in his frantic attempt to prevent an intelligent discussion of the bread-and-butter problem!

And remember, too; that when Burnside suppressed the beligerent Chicago Times the country was torn asunder by civil war and he justified his action on the ground of military necessity.

Today, Roosevelt boasts of peace and prosperity which the country is enjoying!

How, then, can he and his friends justify his attempt to prevent a discus-sion of the problems which he publicly admits he does not know how to solve?

As an industrial movement, Socialism has nothing to do with religion. Yet, when all men are assured of plenty, it stands to reason that each man will be enabled to develop his religious nature, in the line he may want, much better than he can now. In this way, and in this way alone, Socialism is the truest friend of religion in the world today.

In claiming to favor equality of op-portunity the republican platform lies. Such equality is impossible so long as one is born with millions at his disposal and another is born without a penny, and the hypocritical slaves of the trust know it.

Now comes the report that the republicans are going to conduct the campaign by offering work in protected factories and mills to the 6,000,000 ide men in the country, providing they will vote for Taft. Inasmuch as there is no asfor Tatt. Inasmuch as there is no assurance that the job will continue after the election, the bribe is a very small one in each instance, although in the aggregate it is the most stupendous bribe ever offered.

The Wall Street Journal is a year more behind Socialist papers but even it is beginning to catch on. In a recent issue it says: "Those who thought that they saw in the business spurt of May and early June a pronounced upward turn in business and prices have revised their views and are prepared to face a period of gradual and limited recovery coupled with a very moderate volume of business."

One thing is obvious: More people are listening to Socialist orators this year, by fivefold, than ever before. An-other significant fact is that Socialist speeches are receiving greater applause than speeches made by either of the old parties. A third fact is that the party membership, of dues paying members, is membership, of dues paying members, is increasing in this period of hard times as never before. I ain convinced that the afety of good government demands intelligent public discussion of present socialistic tendencies, that voters may escape from dangers into which good government is being drawn by a lack of exact knowledge of what Socialism is and what its employment means to our institutions. The republican party is the party that will undertake this campaign of national publicity."

This is a very sensible view of the situation. What we want is discussion. All the Socialist asks is an intelligent investigation of our claims. All we ask is that you read our literature. We are anxious that you read all that our opponents have to say. If we cannot meet the argument of those who are opposed to Socialism and show to you, as a plain, practical man, that there is a better system, then we deserve to be defeated. IN PRISON FOR PRINCIPLE

Socialist women of Los Angeles are still being thrust in jail because they will insist on speaking for the cause on the street. Not only that, but they are being treated with a brutality which reminds one of the dark ages. Mrs. Cloudsley Jones, formerly Countess Pointkowski, one of the victims of capitalist oppression, thus describes her accommodations in the Los Angeles

How Determine Value?
Suppose the Socialist system labed, private property made illegal, settition abolished, and the state the imployer of labor. Without competition Your supposition is supposable only by one who is ignorant of what Socialism is and what it seeks to accomplish. The idea that Socialists would make private property illegal originated in the mind of some individual who has imagined more than he has invarianted.

cialism is to secure to every producer private property equal in value to his product. That is, that every person who works should have for his or her own use and enjoyment as much property as by labor he or she produces. This means more private procests for the

man who works than it is possible for him to acquire today.

But, despite all this, we are firm in our determination to fight for the cause to the last ditch. There was never a cause won without suffering and martyrdom, and we propose to show the men that we are not made of weak material.

One of the women, Mrs. Bacon, was under care of a physician when put in jail in the interest of free speech under a republican administration, and still is treated in this brutal manner, with the result that her ailment is growing much worse.

Dr. Arthur D. Houghton, a former member of the city council, but who voted against the infamous order prolibiting free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, arose the other evening to make a publishing free speech in Los Angeles, and the machine and collects toll, tribute, interest; rent, profit, surplus value, or whatever it may be called, out

A Laborer Fined \$29,240,000.

Recently a workingman in Oklahoma was brought into court on some trivial charge. He was duly found guilty. The judge in imposing the fine placed the meat little sum of \$29,240,000 against the culprit. In placing the fine, however, he stated that the man before the bar should be exempt from the payment of same until such time as the Standard Oll Company should pay its fine for a like amount.—The Laborer, Dallas, Texas.

Choice of Occupation

If choice of occupation were free would not all choose the pleasant occupations, and no worker-sa left for those iess agreeable? Weuld this not make it necessary for officials to dictate employment and tell cash what he might or might not work at 7—B. M. Des Moines.

You seem to overlook the obvious fact that different people have different ideas as to what is pleasant. You may like to ask questions concerning Socialism and I may like to answer them. You might like to make boots and I might like to wear them. The diversity of taste and incilnation which manifests itself everywhere would tend to meet each demand for an article with a person to supply the demand.

Most people would likely regard swinging a heavy maul and driving tent stakes or fence posts as something disagreeable and decidedly undesirable, but if you ever visited an old fashioned county fair and observed the man with the striking machine you saw that there are people who are willing to pay for the privilege of doing that very thing. The only essential difference in, the two instances is that the man driving posts or stakes must keep continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be mere exercise when continually at it until what in moderate amount would be more exercise when continually at it until what in moderate amount would be more exercise when continually at it until what in the manifest in the fail of the fail of

In addition, Chinese, Japanese, Mexicans and Italians are in the labor ble if enforced through the hours, weeks, months and years of a lifetime. A short walk is a delight to the person who is tired of resting; and a short rest is equally delightful to the person who is tired of walking. Work becomes labor, labor becomes toil and toil becomes liresome drudgery according to whether there is just enough of it, more than enough or entirely too much.

If it were possible for the choice of occupations to be absolutely free, it would result in a diversity of work that would transform labor into recreation and rob it of its distressful wear on mind and its distressful wear on mind a

third of the population would save Southern California in twenty-four hours."

Mr. Westgate cites the case of Gen. Otis, proprietor of the Los Angeles Times, and his fight on the typographical union. The fight has been going on for years, and Mr. Otis has been able to keep it up merely because the need is so great in Los Angeles that men are driven to accept low wages by fear of actual starvation. The latest ruse of Mr. Otis is to start a school of lynotype setting, in a building adjoining had, and run under another name. There, after fiaming adversing, the pupils are taught the business in an eight weeks' course, after paying \$100 for the privilege of learning, and are kept busy setting up Otis's paper. At the end of eight weeks they are turned adrift and new victima take their places.

Then the real estate man gets in his work. He induces the hard-pressed

The dictator is the whole thing under capitalism because he is hired by a boss and answerable to him only for his acts and their results. Under democratic industry all exercising authority would be chosen by those over whom such authority would be placed, probably from among their own number, and would be subject to discipline or removal by them were he to become autocratic or others.

A striking cass was that in which William Howard Taft issued one of the first injunctions that paralyzed organized labor. This same gentleann appears on an anti-lajuaction platform appealing to working men for support. Can you think of anything more grotesque? And but for the injunctions he issued I would not be the candidate for the presidency on the Socialist ticket. A certain engineer refused to haul certain cars, preferring rather to quit work. The only way in which capitalism can escape conviction of criminality is to plead that it is insune.

Socialism doesn't want your property, but it wants that you and not the cap-tain of industry should have it.

Socialism will not enslave people to a system, but will free them from the machine—the iron machine of the fac-tory and the golden machine of profit

Roosevelt pleads for "inequality of re-ward." Of course. The whole idea of reward is criminal. A man should have what he produces—less is robbery, more is "reward."

Mr. Bryan feels he has to publish (part) of the democratic campaign contributions in order to avoid the suspicion that the bulk of it comes from the captains of industry.

President Roosevelt is enlarging his sphere of influence. Not satisfied with dictating the republican nomination for president in the United States, he has

Socialism in America is an American movement. It has a place here, because it proposes a rational industrial sys-tem in place of the insane anarchy of capitalism, and capitalism is nowhere re rampant than in America.

The good work of Roosevelt in destroy ing the trusts is shown in the fact that Schwab has just succeeded in organiz-ing an international steel trust. Incidentally he says that the United States must have a ship subsidy, and Roose-velt knows his master's voice.

And now some one has found a use or Orchard. He is wanted by an insurance company to prove that damage which the company paid in San Fran-cisco for the explosion in the Bradle were not just. If Harry does no get this job, the republican party might give him employment in proving that the "late" panic is over.

The press suggests that more than \$1,500,000 will have to be raised by the republicans this year merely to put it even with the start of other campaign years, because heretofore the railroads have contributed that much in passes to republican spellbinders, and under the operation of interstate commerce law they dare not issue passes this year.

The Morning Register, of Eugene, Ore, which is in the belt where the great Harriman timber frauds have occurred, is authority for the statement that Mr. Harriman will not be prosecuted, and that the understanding is that he will contribute to Mr. Taft's campaign fund. This is the end of the president's vainglorious denunciation of his former practical friend, Harriman. Merely another trust killed.

The vice commander of the Spanish war veterans is reported by the United Press to have made a speech in San Francisco, June 29, stating that Admiral Dewey and the commander of the Spanish fleet in Manila fixed up a sham battle for the purpose of giving the Spanish commander an opportunity to send home a large list of dead and missing. The Spanish commander had been carrying on his pay-roll for years men long since dead. The speech has created a sensation.

President Amador, of Panama, had President Amador, of Panama, had ignated Senor Arias as his successor, very thing Mr. Roosevelt did relate to Mr. Taft. But this action did suit the wielder of the big stick, a so he sent battle ships to Panama unloaded armed marines there in interest of a "fair election." Arias not intimidated—oh, no—but he red just the same, leaving only one didate in the field. It is the same though pressure should be brought to to leave Bryan the only candidate the field here. This is the republicant of political democracy, as exempted only now in Panama.

THE CORNER GROCERY NOW

"Equality of Opportunity."

Mr. Roosevelt has broken out in a new place. He has killed Socialism again. He has come out in favor of a divide up at birth, so that every child may have equality of opportunity. He has declared in favor of a destruction of the republican party, so that the whole scheme of special privilege may be destroyed. At least, one may infer these things from what he says. Hear the he-sybil of plutocracy:

I believe in doing all possible to keep alive equality of opportunity for each man. As to the man's reward, let each man get for himself by his thrift and courage just.

Properly, in this country, we do not be lieve in special privilege. Some of our ecclasistic friends and socialistic writers make a tremendous mistake in this respect. Their theory of a common fund out of which each person may take what he chooses is a gross example of the worst kind of a special privilege.

For a long time to come, it is manifest, it will be impossible for the men of America to produce equality of service. Until such a time comes we must have in this country inequality of reward.

John Brown was a Puritan, fanatically religious, who, during the free soil agitation in Kansas became impressed with the idea fhat he was predestined to overthrow slavery. His first effort in this line consisted in leading a small force against a community of pro-slavery men in Kansas and butchering them, even mangling the remains. It is related that afterward he raised his hands, still stained with dried blood he had shed, to bless the food at his family table. Horrible as this was, the other side did things equally as bad. On one occasion, eleven abolitionists were taken and without trial lined up and shot. In retaliation for this, Brown and his few followers crossed into Missouri, and set free half a dozen slaves, taking them back to Kansas. For this act the Missouri governor offered a reward of \$3,000 for his averagement. back to Kansas. For this act the Missouri governor offered a reward of \$3,000 for his apprehension. His plan to capture Harper's Ferry, arm the slaves and invade the south was in pursuance of an idea he had that he was fore-ordained to this work, and in the enterprise he was financed by Boston abolitionists. Up to this time he had gone cleanly shaved, but now he let his beard grow long as a disguise and adopted the name of Hawkins. The Appeal is unable to speak authoritively as to name of Hawkins.
