That Famous Post Office Order.

AM in receipt of a letter from an Appeal Reader, who states that the master of his town informed him that he had received no order from the postmaster general giving him power to throw out of the mails literature of any sort; and furthermore the postmaster was quite emphatic in belief that no such order had been issued by the postmaster general, and that the Appeal had simply lied to its readers in a frantic effort to se sympathy for itself, and antagonism for the present administration,

Evidently the postmaster referred to cannot read plain English. I have re me a printed document, headed. "Order of the Postmaster General," agton, D. C., June 12, 1908, and addressed to postmasters. Just what that order means I will leave to the interpretation of Frank L. Stocking, assistant postmaster at Tacoms, Wash. Mr. Stocking has been identified with postal system of this country for a good many years. During the McKinley administration he was assistant director general of posts for the Philippine Islands, and also postmaster at Manila. The position of assistant director general of posts in the Philippine Islands is relatively as important as assistant stmaster general in the United States. It is therefore reasonable to assume that Mr. Stocking is qualified by experience to interpret the rulings issued by the postmaster general at Washington.

In an interview with him, printed in the Daily Tribune, Tacoma, Mr

"The ruling is aimed against such American publications as the Appeal Reason, a Socialist newspaper published in Kansas. . . A vast amount such matter now comes through the mails, but postmasters, in hard and fast rules stipulated in the order, are empowered to bar all of it."

The Tacoma editor understood what Stocking meant, and with scare headlines verifies the statements made by this postoffice official in the fol-

"For years the officials of the government have writhed under the incessant fire of a revolutionist newspaper published at Girard Kansas. . . . The government apparently has spiked the thirteen-inch gun of Debs and the Socialist party and doubtless is prepared to meet the inevitable litigation."

Now, we submit that these statements from this postoffice official is a

plain and significant interpretation of this rule. I have no doubt but that Stocking has been called down pretty hard by the department for giving out the statements quoted above. They do not care to have their purposes thus boldd. The politicians at the head of this government are foxy, and they understand quite well that the American people will resent vigorously any attempt to interfere with the freedom of the press.

In order to create a proper public sentiment that would justify the drastic action proposed, it was necessary to promote an anarchist scare. This was taking advantage of the killing of an inoffensive youth by Chief Shippy, of Chicago, and the murder of a priest in Denver by an insane Italian. A weekly paper that had been permitted, for nearly fifteen years, the use of the mails at Paterson, N. J., was illegally suppressed by Mr. Roosevelt. The law provides that before any newspaper can be denied the second-class mailing privilege that it is entitled to a hearing. This, the Paterson paper did not have until after its second-class entry had been taken away from it on the executive order of the

Then, in order to give a semblance of justice to this action, a clause tacked to the postoffice appropriation bill amending Section 3893 of the revised statutes, which gives to postmasters the power outlined above by Mr. Stocking.

I am not at all surprised that many postmasters cannot understand this While most postmasters are republicans and support the present administration, there are many of them who are old-fashioned enough to still cling to the delusion that that provision of the constitution which says congres shall make no laws abridging the right of the press, is still observed. But after awhile it will fifter through their simple minds that this is no longer a republic, but a capitalist despotism. In order to continue, uninterrupted with the game of high finance, it is necessary to prevent a public discussion of the methods in vogue, by the men who own and control the productive machinery of

As stated by the Daily Tribune, of Tacoma, officials of the United State at have writhed under the incessant fire of the Appeal. This paper, son of its tremendous circulation and its absolute fearlessness, strikes terror to the hearts of the cringing politicians who serve the great financial over-lords by means of special legislation at state and national capitals. And it exposes, without fear or favor, the deals of the captains of industry and their political retainers.

The Appeal, from Mr. Roosevelt's point of view, has many grievous sina for. But above and beyond all others, stand out the part it took in ng the western kidnaping conspiracy and the part played by Mr. Roosevelt in the Harriman-Alton infamous bond deal, by which the savings banks depositors and insurance policy holders were robbed of millions of dollars, a part of which loot found its way into the campaign fund which elected Roose

elt to the presidency.

Every position taken by the Appeal to Reason has been proven correct, statement made by it in all the controversy of the past years has been proved afrue. To silence this mouthpiece of the working class—this "thirteen inch gun if the Socialist party"—has been the aim and object of plutocracy for nearly a decade. The first attack was made by Third Assistant Postmaster General Madden, and a guerilla warfare, maintained for years, resulting finally in the triumph of the Appeal and the retirement of Mado at all to the credit of either the administration or that official.

Failing through this agency, the Appeal was dragged by the government into Failing through this agency, the Appeal was dragged by the government into the federal courts, on a charge that is now admitted to be perfectly ridiculous and without the slightest foundation. Three times have I appeared at Fort Scott ready for a trial before Indicated in the same republican administration, and before juries selected by republican United States Marshals, appointed by the same republican administration, but for reasons not explained, the government has postponed from time to time, a trial of the case. Thousands of dollars have already been expended in defending the Appeal, and I will say to you frankly that this federal court case has been the only instance which has in any way hampered the Appeal in its work. The court costs and lawyers fees have been a heavy drain on our resources. Our refusal to accept any donations from our thousands of friends is due to our effort to prevent our ensmise from saying that we used our troubles to collect money from our sympathizers.

Following this attempt in the courts, comes this federal law, which is, according to Postmaster Stocking, "aimed directly at the Appeal is Reason."

I assure every one of our loyal friends that the Appeal is not in the least disheartened or discouraged. I believe that our protection lies in publicity. By keeping the reading public informed in advance of what plutocracy aims to do, we can arouse such a protest that it dare not carry out its purposes, and it is for this reason that I have urged, in season and out, that you can do more to help this paper and the cause it represents by asking your neighbors to subscribe than by making a cash contribution.

Furely as a war measure, and to protect the paper, no matter what happens, I ask you, sither as an individual, or with the assistance of local coausedes, to subscribe for a campaign bundle at the rates published in the order blank below. Hundreds of comrades have written me that they think this is the best plan, and the most effective yet mangurated. We will be in a position to carr

Bryan and the Labor Vote.

It is said that Bryan will take advantage of Judgs Gould's citation of Gompers, 'Michell and Morrison for contempt and use the incident in his campaign. It is expected that the working mules will flock to the democratic standard bearer because the democratic convention placed in its platform a plank which, before election, can be construed as a protest against court injunctions in labor controversies. This might be all very well if the democratic party could wine its labor record off the slate. In no place in all the United States are labor conditions as had as in the south where democratic policies are supposed to be in operation. It should not be coeriooked that democrat Sparks, of Nevada, joined with Roosevelt in sending troops to Goldfield, which, on investigation, were hastily removed by the president after an investigation by Roosevelt's commission. We remember also that Steumenberg was a democrat, and a populist and he served the master class against the very men who elected him. We have not forgotten that it was a democratic president that used federal troops during the Pullman strike, and that later the commission appointed by Clereland vindicated absolutely the officers and members of the A. R. U. in its investigation made on the ground. And we haven't forgotten that last week a democratic governor ordered state troops to shoot Alahamaminers. And union men will be asked to vote the democratic ticket! The gall!

An Unexpected Indorsement.

The Catholic Leader, San Francis The Catholic Leader, San Francisco, in its issue of June 27, referred to the Appeal to Reason as "an obscure dodger," and threatened its editor with all sorts of dire calamities. This reference inspired one of the Leader's readers to write a sh column article that fairly bristles and sizzles. Here are just a few extracts from the Leader of ers to write a six column article that fairly bristies and sizzles. Here are just a few extracts from the Leader of July 11, which will show our readers what one ardent Catholic thinks of the "obscure dodger," and what he thinks of

the Catholic press in general:

"Like dry trees in the wilderness" are the average Catholic papers, and it is little wonder that the cry is resounded again and again that the combined circulation of the seventy-eight Catholic papers published weekly in the United States does not nearly equal the circulation of the one lonely Socialist paper published in a town in Kanass. A text, lation of the one lonely Socialist paper published in a town in Kanass. A text, so small that it is nely to secure even a mention on the han.

"There is a reason for the decay of the Catholic press of this country just as there is a reason for the unbounded circulation of the organ of the Socialists. The editor of the average Catholic paper edits his paper with a scissors, while the editor of the Socialist paper puts brains into his work; the editor of the Catholic paper keeps one eye ever on the advertising pages, while the editor of the Socialist paper represents a Cause, he gets into the firing line of battle, strikes straight from the shoulder in the interest of his Cause, and looks about him to see his work rewarded by a solid wall of his people standing with him in the fight.

"The average Catholic editor is afraid to touch a live Issue; it might offend his advertising patronage and then in deed would his joy be turned into woe disconsolate. The Catholic press preaches humility and is a firm believer in the policy of turning he other check when a controversy waves warm and the church is being assailed, while the So-

"If everything was divided up equally, "If everything was divided up equally, things would soon be unequal again." Very true. A dividing up won't work. We want to unite in collective ownership of the machinery of production and distribution, and that would be as hard to divide up as are the public roads or public schools.

"Socialism may be all right in a land-like Russis, but it has no place in free America." Socialism is combatt-ing monarchy in industry, and that prevails in the United States. The prevails in the United States. The steel trust controls a million men, and the mills, factories and railroads have the power of life and death over a third of the people in "Free America."

"All men are not equal. Some are smarter and better than others, and are entitled to all they can make." Very true. Socialism believes in equality in nothing but opportunity. But a babe born in the slums has not the opportunity of one born in good circumstances. And so long as any man gives profits, either on his labor or on his purchase of anything, he cannot get his full product.

So, after all, society owns the land and when Socialism gets ready to take possession of the nation there will be no question over the ownership of the farms. And when that time comes there will be such a re-adjust-ment that the condition of occupancy and use of land will be made very much easier than it is at present.

The longest-lived of those who began to breaths when Watt's engine began to throb have for years rested in their graves. But there are still living men bern in this country who were already at school wrestling with the three R's when the "Rocket" with George Stephenson at the thiptile, won the race against all competitors. These men have witnessed the birth of the American railway system in 1830 and its developement to this day. If gifted in the least with the faculty of observation they must have watched with deep concern the stupendous changes, economic, political and social, wrought out in their native land by machinery in general and by the railroads in particular under a system of private property in the means through which the forces of nature are subjected to the command of man. They have seen the rapid increase of the distance between the classes into which the young capitalism of their early days had already divided the "free and equal" citizens of this "Res publica"; the rise of plutocracy; the vain struggle of the "middle" to maintain its antiquated position, and the sinking into helpless dependence of the very class whose productive power of motion had been increased a hundred fold. And from what they could tall us we might learn whether the progress of monton had been increased or man's command over nature; or if not, why not.

XII.—Railroad Concentration.

A brief introduction to this great subject may not be deemed superfluous.

The whole work of man is motion. He mores a seed into the ground, an at through a trace, a park to feel; the first of the rest. It would not a seed into the ground, an at through as trace, a park to feel; the first of the rest. It would not a seed into the ground, an at through as trace, a park to feel; the first of the rest. The Boston Transcript, July 18, prints the following cheering information:

The military authorities have discovered that targe is a peristent circularizing of the armly on the part of what may be called enemies of the government. Literature is industriously sent out from sources which have now been identified as committeed to a task which the authorities report to be anarchistic in character. It is a question how this distribution of annti literature may be interrupted, so far as it effects emisted men of the military and may a services. The attention of the postoffice department has been directed to the matter and it appears that the whole thing devolves upon the interpretation of the planscology of law. It is known that a certain class of literature, printed or written, may be excluded from the mails, but it is a question just how far this authority may be exercised, and whether it can be made to apply to that class of periodicals which appear to be devoted to stirring up strife, creating discontent and expressing sentiments which could not be indoreed, for instance, by an enlisted man if the army ynd navy, and make it possible for him to perform his duties with loyalty and live up to the rules of obedience and discipline.

The New York Evening Call has obtained possession of a copy of an order sent to all superintendents by the Pennsylvania railroad, in which war is declared against many of the unions. The order roads:

"It is expected that employes of the Pennsylvania Railway system, outside of the classified aervice, should not be connected with labor organizations. It is ordered that superintendents will, through their organization, inform themselves concerning such employes in these various classes as may be members of these unions, and remove at the earliest possible moment the leaders in our employe, and that they will follow this up with the removal of all other employes, members of the above named unions, that have not severed their connection with the union. This is altogether proper under recent rulings of the court; and it is thought that the present is an opportune time to clean out these unions, so far as our own system is concerned. While it should be done in a discrete way, that will involve us publicity, yet it is artically enjoined that it be effective.

"WE CAN DO IT."

Comrade Geo. W. Holt, Poplar Bluff, Mo., writes as follows: "Having just read your article in the Appeal, "Can We Do It." I want to say "WE CAN DO IT." Here is the way it can be done: Let each and every reader of the Appeal who is in sympathy with this movement pay for a subscription to some non-Socialist friend and the trick will be turned. Here's my little old quarter to pay for the enclosed subscription."

During the month of August the Appeal will accept single subscriptions at the rate of 25 cents per year. This will give every referred. Comrade Geo. W. Holt, Poplar Bluff,

will accept single subscriptions at the rate of 25 cents per year. This will give every friend of the paper, a chance to pick up one and two and three and send them without getting up a club, as provided by our regular published rates. Hike out immediately and see if you cannot pick up one or two subs and forward them without delay. I feel pretty certain if you will start you woult stop with the one or two, but will find it so easy and so interesting that there will be a club of ten or more. Nevertheless, send in the one and it will be welcome.

"The Socialist Special."

It was an inspiration on the part of the national headquarters to start a Red Special, bearing the Socialist candidates for president, and vice-president, in a speaking tour of the country. Such a plan is sure to attract wide attention, and will advertise Socialism as it has never been done before. But the more practical feature of it is that it will enable Comrades Debs and Hanford to make ten times as many speeches as they could otherwise do. Without it, they could make only sixty speeches. With it, they are already booked for nearly five hundred.

The Socialist Special, it is proposed, will run twice across the continent, and w'll carry one combined sleeper, diner and observation car, with platform for speaking, a day ceach and a baggage car. It will partly pay expenses by the sale of literature and the carrying of excursionists between speaking points.

But to assure its success, \$15,000 out of the required \$20,000, must be raised in advance, within the next two or three weeks, because it is felt that the

tion of sentence will take place in the not remote henceness.

Even a poor man, may make his mark in the world, but it is generally made at the bottom of a mortgage.

If competition is a decent incentive to work, why are there so many tramps and worthless people under it?

Socialism is not a cut and dried af-fair. It is the old party conventions that belong in that catagory.

About the only chance a poor man has is to show how foolish he is, by has is to show how foolish he is, by voting an old party ticket.

With the profit system abolished there will be homes instead of hovels, wives instead of harlots.

Capitalism has been raising hades and the depression is a result of over production of that article.

Money may not buy happiness, but it will sustain life until one can get it in some other way.

Capitalism is having to defend it-self against the truth, Socialism against lies.

With the profit system at an end you will always be sure of a job when you want it.

The way to get rich is to keep your eyes open and the other fellow's shut. The few get the good things of life before the many can get next.

There are too many "brother's ers" and too few brothers. The only wage slave who has job is the convict.

"Levying a tax!"

On the "ultimate victim!"
Has a familiar old plutocratic ring to it, doesn't it? Pull down your old school history and you will find that the revolutionary war was fought over that proposition of levying a tax without consulting the intended victim! Honestly now, my plain and practical friend, how do you like being talked about by your masters in this brutally frank manner? Does it spell nothing to you? Are you so dumb, so blinded by prejudice, that you can not understand this situation? Do you not see that you have absolutely no voice whatever in the thing which most vitally concerns you and your family—your daily bread? If the bankers and railway magnates may meet in secret conclave and with a stroke of the pen levy a tax—mark that word tax—on you, "the intended victim," of one tenth on all freight, is there anything to prevent them levying the same tax again next year and repeating the operation on every item that goes to supply the daily necessities of yourself and your family?

I have been trying to make the victim—which means you and extended.

Think it is reasonable to assume that each comrade who kindly and persistently tries can couvince at least two old party voters between now and election time. Start now on this "Make Two Socialists" crusade and do not give it up until you have the sincere pledges of at least two men who did not vote the Socialist ticket at the last presidential election to vote it this time. The best book I have found to use is "Introduction to Socialism." Get a dozen and systematically loan them. In a few days call for them and with a little kindly and judicious reasoning you will get your pledge in many instances. THE SOCIALISTS HAVE WON. Los Angeles Repeals Her Ordinance Subversive of Free Speech. By Telegraph to the Appeal.

Suversive of Free Speech.

By Telegraph to the Appeal.

Los Angeles, July 21.—The fight for the right to bold street meetings in Los Angeles, for which so many, men and women, languished in prison in the hot summer months, has been splendidly won by the Secialists. The council completely abandoned its position and repealed the ordinance restrictive of free speech. Comrades have been released from jail and the chain gang, which is an encouragement to Socialists everywhere. We have been to heavy but necessary expense to win the fight, and would still appreciate contributions.—Choudsley Johns, Secretary.

Gaines' Mistake.

For the past twelve years John Wesley Gaines, of Tennessee, has ably and honestly represented his district in congress. He has been a unique and picturesque figure. A ready debater and persistent fighter, he is possessed of many radical ideas and has always been a vigorous opponent of legislation in the interests of the large corporations and trusts that are constantly seeking favors from congress.

inferests of the large corporations and trusts that are constantly seeking favors from congress.

Previous to the last session John Wesley's opposition to the trusts manifested itself only in oratory. Gaines is a hard worker, and it was a bad day in congress when he did not deliver himself in a few burning thoughts on the subject of curbing the trusts and preserving the liberties of the people. From the standpoint of the trusts this sort of talk did no particular harm, and as it added variety to the proceedings in congress and gave the impression that the interests of the whole people are still a subject of consideration by that capitalist owned body. John Wesley's speeches were not only tolerated but welcomed. As long as he did not succeed in translating any of his theories into legislation he was looked upon as a member whose services were in a measure useful to capitalism, and to addeclat to the occasion his actions were frequently written up in the capitalist papers and he was patrouizingly pointed out as a great tribune of the people.

But in the last session of congress Gaines made the mistake of actually doing something. He translated one of his radical theories into law, and as a result he has been defeated for renomination and the halls of congress will know him no more.

SOCIALISM ALARMS DEMOCRACY.

Growth in Missouri Is Cutting Into Ranks-Many Counties Strong.

Growth in Missouri Is Cutting Inte Ranks—Many Counties Strong.

From the Globe Democrat.

The growth of Socialism in Missouri and the fact that three-fourths and more of its recruits come from the democratic party is causing alarm among the democratic leaders in St. Louis. Prominent Socialists of St. Louis claim their vote in the state matifall will be over 20,000. The Socialists have nominated fifty-one candidates for the legislature, and in Jasper, Wright, Douglas, Scott, Greene, Adair and a number of other counties of the state they have nominated compiste county tickets.

A prominent party leader of Scott county writes Thomas J. Akins, former republican ustional committeeman of Missouri, that the Socialists claim all the way from 500 up to 1,000 votes in that county. Conservative party leaders in the county, he said, concede them 400 or 500 votes. About four out of five voters who drift into Socialism. Mr. Akins estimates, are democrats. The spread of Socialism into purely agricultural sections of the state has become a matter of concern to leaders of both parties, but more particularly to the democrats, who are the greatest losers, according to Mr. Akins. The booulists have up candidates for the

"Threatens to Burn the Appeal."

From the Prosser, Wash., Record.

The order of Postmaster General Meyer authorizing postmasters throughout the country to destroy such papers as may be offensive to the administration—ala Russian methods—broadly states the reasons for the order and opecifies the class of publications aimed to be reached, but the hint had long been given to the postmasters that the particular papers which are "indecent" and offensive are those published for the propagation of Socialism.

There is not a postmaster who does not clearly understand what is expected of him under this order. He will not inspect the Police Gazette, or any of the numerous catch penny blood and thunder publications, or even some of the big dailies, which in their "personal" columns, run notices of assignations and bids for girls with good forms who like a good time.

These are all really offensive to good morals, but the postmaster will keep his weather eye open for Socialist publications, who are merely advocating an industrial system that will guarantee the right to life by guaranteeing the
