THE CRISIS!

To the Tried and True.

The Appeal is on the rocks. In crisis I turn to you. Listen: The plutocrats have plotted the destruction of the "Little Old Appeal." All their powers, including their army of postmasters, with a few notable exceptions, are secretly pitted against it: and they have a strangle-hold and are closing in.

They have cut off unlawfully thou sands of subscribers during the past four months.

ANSWERED BY FACTS.

The charge that Socialism will never gain a headway among native Ameri-cans is fully met by the fact that So-cialism has gained headway among native Americans.

The charge that farmers will never become Socialists is completely answered by the fact that the farmers are becoming Socialists.

The intimation that Socialism is confined to foreigners and the ignorant is met by the fact that Socialism has its strength in diffusion, in rural districts, among the best-posted people in

The charge that Socialism is enemy of religion is answered by the fact that with thousands of people, So-cialism is a manifestation of religion, having all the enthusiasm and ideality of a great religious movement.

A souvesir of the "Reply to Roosevelt" edition will be a booklet in which will be printed the names of every man, weman and child who orders 200 or more copies. A copy of this booklet will be presented to each and every one who helps distribute 200 or more copies of the May Day edition. Once in your possession you wouldn't part with it. The book will be stringed on the cover, "The Pairlots of 1900".

A costant, of Washington state, offers five dollars as the beginning of a find for the raising of the Maine, that it may be definitely determined whether or not it was blown up from the inside. It is a laudable idea. But as the government has already rejected offers to raise the Maine without public expense, thinking men are agreed that the vessel was blown up by Americans and over 300 American citizens were wantonly murdered by representatives of the republican party in order to precipitate a war in the interest of American capitalists. There is more pressing need of the pennies of the workers in preventing another equally infamous plot for the taking of the territory south of us for the benefit of American capitalists, either as part of this country or as a field for exploitation. The republican party is today responsible for the enslavement of fourteen million peons in Mexico, and it consents to their oppression in the interest of a few American capitalists.

THE Daily Sentinel of Alton, III. where Elijah Lovejoy is buried, prints the column and a half editorial from the Appeal, comparing Lovejoy and Magon. It shows that there are a few papers not tied up with the tyrant.

To TALK of destroying the home, of reducing all to a dead level and of coniscation is merely to becloud the issue The present system is destroying the home, confiscating the property of the worker, reducing all to a dead level, and Socialism would merely save things. It asks for nothing but honesty and a higher morality.

Please note the number on the little yellow address label on the wrapper of your paper or on the paper itself. This number tells you how long your subscription runs. The number of this issue is 667. If the number on your label is 598 your subscription expires next week and you should renew at once. It would be a great help to us here in the office if you would watch the number on your label and renew at least three weeks in advance. For instance, if the number on the yellow slip following your name and not miss the Appeal's "Reply to Roose-rest."

Ir Now transpires that the "absorpof the Tennessee Coal and Iron which Roosevelt authorized and which was intended to prevent the panic that came nevertheless, was merely another steal, netting the steel trust several million dollars. The company absorbed for \$30,000,000, and at the same time had approximately 700,000,oco tons of iron ore, valued at \$1 a ton.

A NUMBER of comrades are copying ditorials from the Appeal, signing their names to them, and handing them to local papers for publication with the rethat Socialism gets that much wider hearing. The plan is commended to others. Select something explaining Socialism, not over a third of a column in length, or short paragraphs tell-ing of Socialism, all amounting to 200 or 300 words, and you will stand a show of getting the article published.

Your wife, your daughter and your mother have been grossly insulted by Theodore Roosevelt when he called women Socialists of the world free lovers." It brands the man who made this statement as a coward and a liar. If you have a spark of loyalty in your make-up you will resent the insult by helping the Appeal and Debs brand him before the American people as the scoundrel his words prove of honest service will command the him to be. Even the savage will fight highest distinction.

The success of the sale of the Ap peal on the streets of Chicago, is pretty conclusive evidence that this plan can be worked successfully in every city in the United States. Go to work city in the United States. Go to work on this plan without delay and have everything in readiness to sell the Ap-peal's great May Day number on every street corner of every city in Pluteland. Think of the consternation of your cap-italist friends when they wake up Sat-urday morning. May 1st, and find the streets swarming with boys and girls selling Deb's "Reply to Roosevelt."

A rew years ago the press was de-nouncing Louise Michael as an anarch-ist and enemy of society. She was sent to prison many times and in 1870 to prison many times and in 1870 was transported from France for life. Now France is awaking to a realization that she was one of the noblest spirits that country ever produced, and has just erected a statute to her, picturing her as the idealization of benevolence. It is the outrageous way a half civilization treats its noblest souls. Now it is howling against Socialists, and within half a century it will laud them as the most patriotic spirit of the twentieth century.

REPRESENTATIVE DEARMOND of Missousi has introduced in the house of representatives the following proposed amendment to the constitution: "The congress shall have power to provide for the insurance by the United States of the lives of citizens thereof." Of of the lives of citizens thereof." Of course this is merely an effort to defeat the measure while appearing to favor it, for the reason that congress now has that power. Nevertheless it indicates how the rising tide of Socialism is forcing the bourbons to "socialistic" action. A million Socialist votes will force all sorts of concessions from congress.

THE FIRST ATTACK.

From Kanana City Journal, Nov. 2, 1907:
"The United States department of justice, acting at the suggestion of the president, has instituted proceedings against a 85-cialist sheet of Girard, Kan. It is to be regretted that a technicality must be in-voked in order to establish a case."

THE SECOND ATTACK.

extracts from official records which prove that Roosevelt was an active accomplic to the notorious 'Alten Steel.'

Theodore Roosevelt's last act before leaving for Africa was to strike a vicious blow at Socialism and its foremost organ, the Appeal to Reason Three years ago when the Appeal stepped between Roosevelt and Moyer and Haywood and defeated the conspiracy Roosevelt swore real cuss words and decreed that the Appeal should die. From that

day he did all in his power through secret service agents, plotting postmasters and federal court indictments to crush this paper. He failed, but he could not retire without giving vent to his impotent rage in a foul tirade against Socialism and a cowar", attack upon Debs and the paper which had torn off his mask.

It is the "Little Old Appeal" that rankled in this vaudeville warrior's breast and his fury burst in what was

a crushing blow at the hour of his leave-taking. THE APPEAL ACCEPTS HIS CHALLENGE! His foul tirade upon Socialism in the Outlook will be met point by point and his venomous and sophis-

tical argumentation analyzed and torn to tatters. There will be no resort to abuse. It will not be necessary. Only a weak and tottering cause requires the defense of a vulgarian.

The answer of the Appeal will be on a plane of dignity that will put to shame the coarse tirade of its swaggering assailant.
IT WILL APPEAR IN THE ISSUE OF MAY 1st and this issue will be set apart for this special

the sons and daughters of freedom will girdle the globe. Hundreds of marching columns with banners flying will be in the streets. Thousands of meetings will be held. Hundreds of thousands will join in jubilation.

The "REPLY TO ROOSEVELT EDITION" will be the Appeal's celebration of the day. It will be the

red letter event of its career. Millions have read Roosevelt's attack and are whetted keen for the rejoinder.

Five million copies, the world's crowning edition, must be the Appeal Army's answer to the Roosevelt

UNSUNG HEROES.

The Baltimore News has a little paragraph which suggests a theme for he orator and a text for the preacher. Here it is: "It wouldn't be a bad idea o dig up some of these unsung heroes who sweat in the hold to keep ocean liners going while the saloon rings with laughter at the captain's dinner. body ain't never heard of no coal shoveler being carried on nobody's shoulders

The rich passengers on an ocean lines little dream of the obligation they are inder to the coal shoveler in the hold. The world knows nothing and cares othing for the grimy toilers of the deep who keep the machinery in operation which moves the world. If the ship goes down these same heroes, who have no chance to escape, go down with her, nor is it worth while to mention their names in reporting the disaster. They go down as a matter of fact That is what they are for. Capitalist

civilization flourishes upon that basis.

The idle and parasitic who lounge and laugh on the upper deck, who toil not and who spin not, are in the public eye and whether weal or woe betide they alone are of interest and their do-

ings are alone worth chronicling.

The whole superstructure of present society rests upon the basis of the oppression of the great class who do the useful work, produce all the wealth and keep all the social machinery in operation. They constitute the lower class and are fit only to toil and suffer and die unknelled, unhonored and unsung The time will come when the real

THIS POSTMASTER O. K.

The Appeal is in receipt of a letter from a postmaster in Wyoming, which I knew will be read with interest by our readers. For obvious reasons we refrain from printing his name. "I no-tice an editorial in your paper of March 20th, referring to undelivered copies of the Appeal which you say postmasters made no effort to deliver and indeed, try to stop from being delivered. I am running the postoffice here, and I want to tell you that your papers are not rotting. I am reading them and am pass-ing them along. You have my best wishes and when next I vote there will be another member added to your party. I might add that these papers have been left here have enlisted my

sympathy with your cause."
All of which merely proves that no copy of the Appeal is ever wasted. A Socialist idea will sprout in any sort of mind stuff no matter how prejudiced and partisan, if we just give it time and a little attention.

DEBTORS TO PRISON.

In the early history of the United States it was a common thing to send a man to prison for debt. The records show that thousands were put into jail because they were unable to pay. This law has long since been repealed and men are no longer imprisoned, but they are made to suffer in many other ways if they are among the imfortunates who are out of work and lack the means of

seems incredible that in a called civilized nation men should still be punished for their misfortunes. This s precisely what is done in the case of a man who is treated as a criminal because he is unable to pay his debts. He may have good reason, or no reason at all, the crime of depriving him of his liberty and branding him as a felon for such an affense is the same.

The time will come when people will wonder if the recorded facts of present civilization are not hideous and monstrous exaggerations.

From the Chicago Daily So

In Columbus, O., a charity committee is advertising the terrible condition of the unemployed and urging that sub scriptions be sent for their relief. The mayor charges that the report is at fault and that the committee is merely grafting on the charitable. In response the committee asserts that the situation is not exaggerated, but that the mayor the Red Cross society is misusing funds sent to Italy for the relief of the earthquake sufferers, and that the soldiers compel the poor to pay for food which was donated by Americans, On the other hand the Red Gross society declares the trouble with the preacher is a grouch because his church was not given the handling of the funds. There you are again. Take your choice of the two views. But they show how charity is a fake and how the desire for prof corrupts everything, even things which were conceived in the very best spirit

"ROOSEVELT SLOPS OVER."

Prof. Small of the University of Chicago, in an interview sent out from that city by the Associated Press de clares "Roosevelt slops over when he talks about Socialism. He has no idea what Socialism is and he goes outside his province when he writes or speaks on the subject. Roosevelt declares that Socialists put no value on any but the material side of life. That reminds me of Mrs. Hetty Green's calling Jane Adams a materialist. I am not a So-cialist myself, but I think it is a mistake for those who are not Socialists to misrepresent the socialistic doctrines cause it gives those of that faith the idea that their opponents are not sin

DEL Rio, Tex., March 27.-It was a neat trick that the officials of the United States government played on the de-fense in the disposition of the Mexican utionary cases here—those familiar ith the circumstances do not hesitate to denounce the handling of the affair by the government officials as the rankoutrage that has yet been perpetrated in the name of the law east of the Rio Grande river. The prisoners-Col. Encarnacion Diaz Guerra, Basiliso Ramirez and Calixto Guerrawere given no defense, had no chance, and throughout the entire procedure were absolutely at the mercy of the government. Col. Guerra was literally railroaded to the penitentiary for a term of eighteen months; Ramirez, against whom there was no evidence and for whose trial the government was unprepared, was virtually forced to con-sent to a continuance of his ease until the October term of court; the charges gainst Calixto Guerra were dismissed and he will be held in the Eagle Pass if until July, when an effort will be ade to extradiate him to Mexico. That Attorney A. A. Worsley of

defense plainly did not affect the siton of Guerra and the disposition of the other cases had been d in San Antonio before court ed in Del Rio, and when Federal Judg Maxey mounted the bench and the machinery of justice began to move the prearranged program was put through with dispatch, regardless of the pres-ence and protests of the Arizona attor-ney. Guerra had been in the hands and under the influence of United States Secret Service Officer Joseph Priest several months and had been persuaded Priest that the only thing he could to escape being sent to Mexico and ot was to plead guilty to the charge was to plead guilty to the charge riolating the neutrality laws of the ted States. The unfortunate pris-a grand old man of undoubted age—could not understand English, him in tow were better friends than the attorney who had come from Arizona to conduct his defense. As a result of the machinations of Priest and his associates, Guerra refused to listen to Worsley or accept his advice; at the bidding of Judge Maxey he stood in front of the har and pleaded guilty to things he denied doing in an interview with the representative of the Appeal to Reason a few days previously in the county jail at San Antonio.

Advantage Taken of Ignorance.

Advantage Taken of Ignorance. Precisely similar was the experience with regard to the disposition of Ramirez. If ever the authorities of a government took advantage of the ignorance and helplessness of a prisoner it was in this instance. Ramirez had been in jail six months charged with violating the neutrality laws. When his case was called, United States District Attorney Boynton stated to the court that inasmuch as the government was not ready to go to trial, Ramirez had kindly o go to trial, Ramirez nad knowy ed to a postponement until the r term. Attorney Worsley, of knew of the unprepardness of knew of the unprepardness of once causes Ramirez and Calisto once ca course, knew of the unprepardness of the government and had urged Ramirez to demand an immediate trial, knowing that if Judge Maxey granted the trial the prisoner would be discharged. In to be placed in the catalogue of poli-tical offenders who cannot be extradited however were Attorney Worsley's according to the treaty existing between the United States and Mexico. advice and solicitations. Ramirez refused to hear him, and instead turned to Priest, the secret service officer, who

Guerra, if he lives, can return to his family in Del Rio to again renew the advised a postponement.

It was a trying situation for the friends of the prisoners, and afforded the lawyers of the government much amusement. Ramirez's inability to unagitation for liberty in his native the lawyers of the government much amusement. Ramirez's inability to understand English placed him absolutely at the mercy of Priest and Boynton and Cresson and Special Prosecutor Liewellyn, of New Mexico, who had been hired by the Mexican government irea, that doughty revolutionist will be mailed to any address at the rate of 18 cents of the section of the control of the contro

Priest and Railroad from Chihuahua to Guerro Cresson and Boynton boasted that in the event of the acquittal of Magon and Villarreal at Tombstone-a circumstance altogether remote-they would certainly convict them at Del Rio, and if by any possibility they succeeded in escaping the noose of the law in Del Rio they would face indictments at San Antonio that would not fail to send them to the penitentiary. At the present time in Arizona and Texas, it is said, indictments have been returned against the two liberal leaders sufficient to hold peal representative a vicious smile of them in a federal jail fifteen years and to cause them to have to pay jointly a fine of \$50,000. Judge Chicago, nor the united protests of the Maxey, who presided in both trials, is an elderly man who enjoys a reputation for honor and uprightness second to none in the state. Persons who have known him intimately for years assert that he can neither be bought with cash nor influenced by flattery. However, in the battles for the emancipation of the proletariat, it is not always necessary for a judge keep up the fine devotion to the ideal to be influenced by money or any on which his country was founded, he to be influenced by money or any other consideration in order for him to decide a fight in favor of the master class; virtually all he has to and Ramirez, that these two men, with Calixto Guerra, are heart and soul in do in most instances is merely to administer the law as it is made. The Appeal to Resson is publishing astouding charges against the Mexican goverament, particularly as to the high-handed tyranny and bloody brutally of President Diaz, which, if false, ought to brand the acciety ever can harbor; but, on the other hand, if the charges are true, then the worst enemy to society is the person who refuses to stand by the Appeal in publishing them. I said much the same at the time of the prosecution or persecution of the labor union lenders in Colorado a few years ago. And yet, after the strongest possible effort on the part of the prosecution, twelve burors not their friends pronounced these men innocent and virtually sustained the Appeal's charges. Is it not becoming, then that we luquire if these charges, too, may not be true? Sometime I hope to have room to print some of the charges and show a reason why, if they are true, we have need to know it. beginning to take notice:

The Tombstone of today is an entirely different proposition. Silver has dropped to 44 cents, the mines are flooded with water, and as a result the town is almost depopulated. It is, however, the county seat of Cochise county. Its population is about three hundred, made up of a half dozen Chinamen, a dozen Mexi-

sake of those poor fellows in jail." Another "newsie" told how a rea newsboy, a cripple on crutches, hobbled up to her and insisted on buying a paper. "You can sell on my corner as long as you like, lady."

DIAZ AND THE CAPITALISTS.

While Diaz has been very liberal with American capitalists, and is especially commended for furnishing them cheap peon labor, of late it appears his on cupidity is leading him to demana lion's share for himself. The W. C. Green Gold-Silver Mining Co., which flourished for awhile and which sold stock extensively in the United States has gone broke on account of this The Stock and Bond Reporter of New York says: "Titles to gold mines are invariably held by the Mexican government, and only working rights are given to operating companies. A heavy tax is imposed, which must be paid every four months." Now that American capitalists have gained such a foothold in Mexico, they are not going to let go, and it would not be at all surprising, if Diaz continues to demand lion's share from the fleecing of Mexico, that the capitalists themselves should turn against him and demand annexation of the country to the United States. It is a possibility that is worth keeping in min

A Case in Evolution

One Saturday in 1857 I attended a slave sale in Memphis, Tenn. Saw two children sold. Then the mother was about to be offered for sale, when she got on her knees before the brute who had bought the children and said, "Massa, I will be anything to you, do anything for you, only let me go with my children." He shoved her to one side and said: "I don't want any old, dried-up wench like you." It made me an abolitionist. A friend gave me one of your papers. Re-sult: from a republican to a Socialist. That's evolution and I want to evolute others .- W. C. Strickler.

This simply means that the gov-Perhaps many readers of the Appeal ernor of a state has the same power will remember the attack made by in this so-called free republic as the Cleveland on Debs and the A. R. U. czar of Russia has throughout his dominions. When a body of workingmen strike against the exactions of their employers it is only necessary, as in this case, for the employers to command their tool, the governor, to call out the militia and declare a state of insurrec tion to exist. Then the ordinary rights of individuals must yield to what this governor "deems the necessities of the Individuals may be imprisoned, tortured, deported, flogged, even murdered in cold blood, if he "deems the necessities of the moment" require it. The courts of their state can not pro has said that in such cases, public dan ger warrants the substitution of executive process for judicial process."

e governor will be acting entirely within what are said to be his rights no matter what he does to an individ ual. He has received his warrant of tyranny and murder from the highest authority in the land, the supreme court No matter how grossly or manly be may invade the rights to life and liberty of individuals he is always acting by "due process of law." The fourteenth amendment to the

onstitution of the United States provides that "No state shall make or force any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any state deprive any person of Life, Liberty, or Property without due process of law nor deny to any person within its juris diction the equal protection of the law.

This seems to be couched in plain and unmistakable language, and there would appear to be little occasion for difficulty in determining the rights of an individual under it. No person of logical mind can possibly construe that amendment as authorizing the officials of a state to forcibly seize a citizen, without warrant, and without shadow of a charge against him, and hold him a prisoner for a period of two and a half months. Such a proceeding would certainly seem to be depriving a person of his liberty "without due process of law."

However, a person who attempts to decide a case of that sort by simple and clearly understood rules of logic, will find that he has lots to learn. constitutes "due process of Taw" is a thing that has to be determined by that wise, infallible, just, impartial, and incorruptible body, the supreme court of the United States; and that court has decided in the case of Moyer vs. Peabody (212 U.-S. 39) that "Imprisonment for two and one-half months under the order of the governor of a state, with-out sufficient reason, but in good faith, in the exercise of his power under the state constitution and laws to call upon the military arm of the state government to suppress an insurrection, does not deprive the person imprisoned of his liberty without due process of law.

THE FUTURE?

As to the petty details of the new social edifice, we are unable to forse them, precisely because the new social edifice will be, and is, a natural and spontaneous product of human evolution, a product which is already in pro cess of formation, and the general out lines of which are already visible, and not an artificial construction of the imagination of some utopian or ideal-

can only tell the general lines of the future evolution of that individual, and must leave it to time to ticular details of its personality, which will be developed naturally and spontaneously, in conformity with the heriditary organic conditions and the conditions of the environment in which it will live.

This is what can be and what must be the reply of every Socialist. This is the position taken by Bebel in the German reichstag in his reply to those the wish to know at the present time what all the details of the future state will be, and who skillfully profiting by the ingenuity of the Socialist romances criticize their artificial fantasies which are true in their general outlines, but rbitrary in their details.

It would have been just the same thing if, before the French Revolution which, as it were, hatched out the Bourgeois world, prepared and matured during the previous evolution—the no-bility and the clergy, the classes then in power, had asked the representatives of the Third Estate-bourgeois by birth, though some aristocrats or priests em-braced the cause of the bourgeois against the privileges of their caste, as the Marquis de Mirabeau and the Abec Sieves-"But what sort of a world will new world of yours be? me first its exact plan, and after that we will decide.' Third Estate, the bourgeois

would not have been able to answer this question, because it was impossible for them to forsee what the society of the ninetcenth century to be. But this did not prevent the bourgeois revolution from taking place because it represented the next natural and inevitable phase of an eternal evolution. This is now the position of Socialism with relation to the bourgeois And if this bourgeois world, born only about a century ago, is the feudal (aristocratico-clerical) world, this is simply because the marvelous scientific progress of the nineteenth century has increased a hundred-fold the rapidity of life in time and has nearly annihilated space, and, therefore, civilized humanity traverses now in ten years the same road that it took, in the middle ages, a century or two to travel. -Enrico Ferri.
