Sometimes false conclusions are drawn from correct premises and sometimes correct premises and for eight dollars an acre are drawn from false premises. Says Locke: "Folly consists in the drawing of false conclusions from just principles, by which it is distinguished from madness, which draws just conclusions from false principles."

The result in either case is the same, whether it be folly or madness. There is but one sure means of guarding against both and that is by developing the capacity to think clearly and training the faculties for keen and searching analysis and investigation.

How It Will Be Done

A reader wants to know just the details of how Socialism is to be established. The first thing to do is to get the people to want Socialism, which they will when they understand it. That is the FIRST step. In the abolition of chattel slavery or of breaking away from King George, agitators were first and all important. They did not pretend to detail just the methods that would be followed, but they knew if they could get the people to see the matter right that the results would be right. If the change comes in peace it will be by the new desire of the beople causing them to elect people to public office who will proceed to have the public engage more and more in business. Every public utility should be taken over and this followed by such industries as are most necessary to the

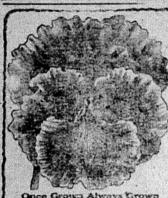

3. A. WAYLAND, 1905.

Every public utility should be taken over and this followed by such industries as are most necessary to the complete operation of them. Thus the collective owenership of railroads would require the people to own and operate coal and iron mines because it will be the greatest user of these things. The people will demand that their government sell them the product as cheap as it costs—and this will lead to that principle of government that will permit them to do for themselves what capitalists only have been furnishing. You will hear more and more about revolution from the old party papers from now on as the only way out of the fix they have gotten the country in. How the thing will be done depends solely on the education of the people. But one thing is certain—the public must engage in business

Socialism does not consist in violently seizing upon the property of the rich seizing upon the property of the rich and sharing it out amongst the poor. Forty-two prisoners were recently lost in the county jail at Portland, Ore. When the new district attorney, who took office last week, asked for a list of prisoners in the jail awaiting trial, he found that a list had never been compiled. No record had been kept of them. Two Chinamen had been kept of them. Two Chinamen had been kept of them. Two Chinamen had been kept in jail awaiting trial since, March, 1907. They had been in the cells so long that they had been almost white, losing their native rich vellow complexion.

"The Call of the Carpenter" Is one of the weat books of the present cen-tury. Its asthor is an entiment scholar, and the book is a splendld tribute to his scholarship.

It comes just at the moment when it is needed, when a section of the Homan Hicrachy is leading an attack upon the Socialist party.

Socialism is a political movement. It seeks an economic end, and it is neither religious nor anti-re iglous. And we are neither friends nor enemies of any religion or religious tanet.

It is true, however, that, for ages, the rules class has used the church orannizations to discourage a revoit of the robbed and exploit d tokies. There was once when this was not true. For the first three centuries of the Christian era the church was composed of, and ruled by the working class. It was a body of determined fighters against the robber class and the government of Rome.

Scholars have long known these things, but have kept them concealed in the libraries. Socialist investigations now bring this hitherto suppressed his-tory within the reach of the people from whom it has been concealed.
