DESERT CLERKS AND DRIVERS

EMPLOYERS REFUSE TO

Men Forced to Strike for More Pay and Better Conditions - Iron Trades Could Be a Power if Properly Organized - Men Must Fight for Their Rights and Prevent Strikebreakers from Entering

WILL YOU HELP US IN THE FIGHT?

The capitalist class has finally succeeded in getting a case against us. It is a filmsy one to be sure, but any old kind-of an excuse will answer the purpose of putting this paper to expense. The long looked for opportunity to discredit this paper or one of its staff arrived last Wednesday when W. F. Cattell, our business manager and editor, was arrested for speaking to the striking

when W. F. Cattell, our business manager and editor, was arrested for speaking to the strainshinsts.

It was evident that the police intended to railroad Cattell to jail, but he demanded a jury which will take place on June 10th. He was first charged with "Inciting men to strike." At trial on Saturday the charge was changed to "Unlawful assemblage and disturbing the peace." Doesn't it look like a frame up?

Cattell is liable to one year imprisonment and \$250 fine.

Cattell had a right to speak on the street and he will fight for that right. He will go to prison her than permit the capitalist class to rib him of this privilege as a citizen.

The police department had no right to deny Cattell the right of free speech, and we are going fact if our cattell the right of free speech, and we are going fact if our cattell the right of free speech, and we are going fact if our cattell the right of free speech, and we are going fact if our cattell the right of free speech, and we are going fact.

understand the case then as you do; otherwise they will be influenced by the capitalist press and be against us.

You can help us by sending in subs for this paper. We will need the money before we get through with this case. We do not ask you to donate money. What we want is subscribers for this paper. We want to tell the people where we stand and we are confident of the result. There is no place in the Socialist movement for the drone or laggard. What we want is live men and women, always ready to get out on the job and fight for the benefit of our cause. Do your share by supporting us in this fight for Cattell.

Send in your subs, and do it quick.

There is nothing the capitalists of this city would enjoy more than putting The Buffalo Socialist out of business.

one policeman went so far in his anger as to tell Cattell that "When he

FIGHTING THE SOCIALISTS

FIGHTING THE SOCIALISTS

That the capitalist political parties fear the Socialists

orning election is best seen by the underhand activity of the 4,
ning leaders in directing the police department in the work of perse cuting the Socialists.

There is no mistaking the fact that our chief of police is acting under orders from his political bosses when he pulls off such a trick as that of last Wednesday, when he sent a wagoi load of policemen to the Buffalo Pitts to arrest F. W. Cattell, business manager and editor of this paper

Cattell was talking to the men on the strike of the machinists, Cattell was talking to the men on the strike of the machinists, and his andience was a quiet and intelligent lot of mechanics who were anxious to know how their fellow workers on strike were making out. Cattell had been talking but a few minutes when Police Captain Forrestel appeared on the scene, and, without any explanation, started to pull him from the wagon in the manner of a bully with a little authority which he was pleased to assert.

Instead of frightening the workers of the Buffalo Pitts, which was the mission of the police, it had the opposite effect. One of the policement was vertheard to say "that there were only a few of the Pitts men out until Cattell spoke to them; now the whole bunch are on strike."

policemen was overheard to say. Hast inere were only a level of the Pitts men out until Catell spoke to them; now the whole bunch are on strike. Six of the properties of the

The Socialists will conduct the affairs of state in their interest.

The capitalists now control all the offices to their interest, and are in a position to persecute the working class to their heart's delight, and are doing it.

The Socialists intend to elect men to office that will represent the working class, and will conduct the affairs of state in their interest. No amount of bulldozing, or threatening, or persecuting of the Socialists will prevent them from the work of reorganizing society on a basis that will give the workers of this world an opportunity to reap the full product of their toil.

The average workingman works all his life and dies in poverty

Just watch the workers of this city do things when they adopt the "Socialist Way."

PAYING THE MILITIA

Of all the slick tricks of the capitalists the one of making the County of Erie pay the bill of expense incurred by the International Railway in calling out the/militia during the street car strike takes all

Judge Brown assumed the authority of calling out the tin soldiers he belief of the International without the sanction of the Goverof the State, and depended upon digging up some law in defens of his action if any question should be raised in regard to his au thority.

thority.

It is altogether probable that the International Railway officers put it up to him so breibly that Judge Brown took the chance to save himself politically, relying upon the fact that under our present system of law a case can be decided by a precedent a thousand years old if need be. Imagine if you ean, the idea of going back to King George III to prove his authority in this case?

If this bill is paid by the County, which it most likely will be, it will only be another proof of the domination of the politicians and courts by such capitalist exprovations as the International Railway.

If things keep moving the way they have for a little while long capitalist politicians will stand a poor show next fall.

RE-ORGANIZING THE LABOR MOVEMENT

There is no questioning the fact that the labor movement of this country is about to go through a series of evolutions in the very near future.

country is about to be alrough a series of events. It is the experiences of the last few years, especially the last year, have forced the members of labor unions to think to a greater extent along class lines, and the activity of Socialists inside the unions has increased the such proportions that instead of being hooted down whenever they attempted to speak, they are now in demand as speakers whenever a strike is on.

With the change of conditions brought about by the complete organization of the capitalist class in the manufacturers' association, changes in method of organization of the workers is also found to be necessary.

changes in method of organization of the workers is also found to be necessary.

Liabor unions, in order to be successful must abandon the old idea of the contract, which binds them to the bosses and prevents them from going out on strike in sympathy with their fellow workers. The time has been a summarized to the summarized them to act as a unit as it is for a number of individuals to organize and set collectively.

The time when a few men of one craft can strike in a shop and tie it up is gone by. It is now necessary to call out every man in the establishment, or if need be in every establishment of that industry, or to prevent that industry from obtaining any of the material necessary to eating as the work of the industry.

We must organize to meet the conditions of the day or we will face the conditions of the day or we will form the condition of the summarized that the condition of the day of we will follow the sum of the condition that must be met, and without delay. We must organize to wis.

This will be the work of the griatlors.

It is no easy task, and no idlers need apply, but it must be done.

PRESENT AND FUTURE

Where there are Secialists working there is always something doing, because Socialists abhor inactivity as nature abhors a vacuum. They are like the creative forces of nature, ever active, and thus in harmony with the great principle of life, which is nevement. Though the creative forces are considered and thus in harmony with the great principle of life, which is nevement. Though the creative forces are considered to the truth that if we want to have conditions changed we must change them. Socialists cannot be trapped by the illusion that there can be harmony of interests in society where one class preys upon all other classes, and self-help is the universally acknowledged law of the world. They have long realized that you have to fight for what you want, and that you are the more prespected the better you fight. They are fighting for the future, not merely dreaming of it, and it is one of the fundamental principles of their view of life that the best way to approach your ideals is strying your very best to make present conditions as pleasant as you conder to become better, but settlice that it was the conditions as pleasant as you can be to become better, but settlice that it was the conditions of the working class combine our forces and work the energetically havely and intelligently for our common interest. The great revolutionary forces must be intered masses of organized workers who know what a civilized living looks like, and are determined to fight for its realization.

The future belongs to the strong, the active, the daring, and the best way for you to prove that you are one of them is by showing strength, activity and daring in the daily struggles for better to conditions. The foundations of the new world of the future must be laid now, for the tomorrow will be tout of the result of our own specifity soul effort. It will not be the realization of our dreams, but the product of our actions. This world is a man-made world, and so will be the one we are aiming at.

THE WILL OF THE PEOPLE

The will of the people shall rule; informed? Who are the people whose rather than the people whose rather people, we their practical doing a harmonic rather people, who whose rather than the people whose rather people whose rather than the people w

THE WILL TO POWER

Life is will to power, says the German philosopher, Neitzsche, and the ruling classes of our day—and of all previous days—have long recognized this and never hesitated in their attempts to monopolice all the powers on earth. Their will to power has always been very strong, and exceedingly reluctant in recognizing in limitations. However, the chief limitation of man is man, developed and formidable form the struggle between the classes and nations.

The most significant struggle for power in our days is that between the working class and the capitalist class, and that object is nothing less than the government of the civilized wordl, not merely the political government, but the government of the economic world, which is the foundation and source of all other powers. This is, indeed, a stupendous struggle, the grandest, perhaps, the world has ever witnessed since the destruction of the ancient Roman Empire. Yet very few of those who are able to make themselve heard in public discussion, outside of the Socialist movement, seem to realize its grandeur and apprediate the significance of the fact that the work ingred the significance of the fact that the work in the significant of the significance of the fact that the work in the significant of the significance of the fact that the work in the significant of the significance of the fact that the work in the significant of the significance of the fact that the work in the significant of the significance of the fact that the work in the significance of the fact that the work in the significance of the fact that the work in the significance of the fact that the work in the significance of the fact that the work in the significance of the fact that the work in the significance of the fact that the work in the significance of the significance of the fact that the work in the significance of the

THOUGHTS OF THE WORKER

A lazy man is a usel he who is useless has justify his existence.

The most dangerous elements of so-clety are those who by their insatiable selfshness and greed violate the sense of justice in others. They not only call formed, which is not always very justi-cious in its chelte of the means of expression, but give aid and countenance to the all too popular belief that in this struggle for existence everything in justifiable as long as it is crowned with success that is, that the end jus-tifies the means.

It is doing alone, not wishing and

It is doing alone, not wishing and dreaming, that counts in this extremely, practical world of ours and fetermines the fate of the individual as well as of classes of men and nations and human

Life's burden would be light for all if everyone would bear his just share condition of the men and women who life, to promote the richness and beaut of it.

The real measure of civilization is the collectively to produce the goods of it.

The real measure of civilization is the collectively to produce the goods of it.

The real measure of civilization is the collectively to produce the goods of it.

The possession of wealth is not identical with the enjoyment of happiness, no doubt about that. But beload, how is the exploitation of the worker, who a raise in wages brightens the home of the worker.

It is a childish pastime, to dwell on the past and argue the question of how different things might have shaped themselves if this had been done and that had been left undone. You can-not change that which has gone never to return, but you may learn this great lesson from the past that

"The minutes thou neglected, as they fade, Are given back by no Eternity."

Are given back by no Eternity."

The only rational thing for a man
to do is to get into proper relation to
things as they are, and to try his
best to make them as he desires them
to be, which means joining the forces
of pollitical, economic and intellectual
programs under the banner of Socialism.

The Socialist idea is that of a people
regainted, not to compare other mations,
nor to resist invasion, but to work

THE CLASE STRUGGLE.

When capitalist, employers of labor and capitalist, oploited and capitalist newlysers of labor and capitalist politicisms and capitalist newlysers with effects of these people to gain the means for a decent living according to civilized standards, what do you call this, class struggle or harmony of interest 1 No struggle or harmony of interest 1 No and in the property of the control of t lavention of the Socialist, but the natural outcome of our present concentrations, the result of antagonists
