TWO HANDS OR ONE?

If you as a working man had a different physical task to perform, what would you think of a man who would attempt to persuade you that you could do it best with only one hand? And then if you met two men and they both agreed that you could do it better with one hand than two, one said it was all important that you do it with the right hand only and the other contended that only the left hand was of any importance in such a task, what would you think of the sanity and wisdom of such advisers?

TIME TO AWAKE.

The decent thinkers of Chicago are wondering just at present where they are at. The disconcerting spectacle that the Chicago Federation of Labor has made of itself for the last month is enough to fill any self-respecting working man with disgust.

POETIC JUSTICE.

There is a pitiful wall going up from a couple of hundred ex-police policemen who left their regular work to engage in doing the dirty work of strike breaking for the Employers' Association during the teachers' strike.

WORKERS IN THE FIELD.

Comrade G. A. Kropps of Carnegie, Iowa, sends in \$2.00 and takes 275 sub cards and the "Evolution of Man."

Comrade Joe Tager of Des Moines, Iowa, sends in a money order to square his account with the Chicago Socialist, and a request for a copy of the Chicago Socialist containing Bertha Wilkins's sworn statement to what she witnessed while working in Swift's packing house.

Comrade Chas. H. Tanner of Biabe, Ariz., sends in a list of names and a money order for \$2.50 with the request that they each get the Chicago Socialist for one year.

Comrade Chas. G. Bargren of Rockford, Ill., sends in a list of names and a money order for \$4.00. Rockford has some strenuous hustlers for the cause of Socialism and Comrade Bargren is one of the most active of them.

Comrade Adolph Harrach, now speaking under the auspices of the Illinois State Committee, sends us \$8.50 for sub cards and says he must have another supply of sub cards.

A club of five yearlies and "Evolution of Man" for \$2.00. Comrade Backus, Houston, Texas, pays for a weekly bundle of the Chicago Socialist.

Comrade Anna K. Hulburd, Chicago, sends in a bunch of five sub cards and is now reading "Evolution of Man."

Comrade Ed. H. Valentine, Chicago, planks down \$2.00 for five yearly sub cards and "Evolution of Man."

Comrade L. Sherman, Chicago, is always on the firing line and once a week we are sure to receive a bunch of sub cards.

Comrade Shuemecher, Chicago, sends a club of sub cards and says more are coming.

Comrade Ed. M. DeMuth of the 6th ward captured six victims of capitalism and requests that treatments be begun at once.

Comrade John Collins spent a few days this week with his family and many comrades and friends in Chicago. He returned after an extensive trip through the Western States arranged by the national office.

Comrade Thurepelt left Chicago Thursday night for New York City, where he will make his home in the future. He will miss him in the struggle here in Chicago, where he has worked so long and faithfully through all the various vicissitudes of our movement.

Comrade Guy Williams left Chicago this week for Minnesota. He has done some good soap-box work during his stay in Chicago.

Mother Jones has just returned from an extended agitation tour through several of the Western States. She reports that Socialism is the one topic that the workers of the West are interested in.

OPEN AIR MEETINGS.

FRIDAY, SEPT. 1. NOTE: The circumstances attending speakers' list makes the problem doubly hard this week. Each speaker named above is urged to be on time as indicated.

ATTEMPTED POLICE INTERFERENCE. The general shifting of the police is showing its effect. Last Saturday Comrade Wm. Stewart was opening a meeting in the Thirty-fifth Ward at 48th and Lake street, when a new policeman on that beat demanded, in a rather unpolite but very firm, an inspection of the permit.

DANGEROUS PATERNALISM. Judge Gaynor of New York had the temerity one day last month to tell the jury that when little boys lost their fingers in factories these fingers had to be paid for.

SECRETARY'S REPORT. Receipts—Due stamps, \$26.15; campaign fund, \$18; literature sales, \$5 cents; balance on hand last week, \$23.98. Total, \$58.08.

FINANCIAL SECRETARIES. The returns on financial report cards sent out some weeks ago are coming in very slowly. Financial secretaries will kindly give this matter immediate attention so that proper report may be filed with national office.

PRIMARIES ON SATURDAY, SEPT. 16. Every comrade and branch should constantly and emphatically emphasize the day and date of our primaries. Get

LIBRARY OF SCIENCE FOR THE WORKERS. The work of modern science confirms the faith of the organized laborers of the civilized world that the forces of the universe are working out a better social order in which the parasitic ruling class, now become useless, shall disappear, and the workers of hand and brain shall be the human race.

THE CHICAGO SOCIALIST. This is a delightful and fascinating book. The idea worked out in it is that the life of living beings which receive impressions from the outside world, and act on those impressions, is a continuous process of adaptation as people do.

SCIENCE AND REVOLUTION. By Ernest Untermann. Cloth, 59 cents. First edition ready Oct. 1. This is an original work by the translator of "The Evolution of Man." Mr. Untermann, an accomplished linguist, and a special student in biology as well as in social sciences at the University of Berlin, and within the last few years has done much important writing in American periodicals.

THE TRIUMPH OF LIFE. By Wilhelm Boelsche. Translated by May Wood Simons. Cloth, illustrated, 50 cents. Ready Nov. 1. This latest work by the author of "The Evolution of Man" will be found even more fascinating than the earlier volume. It is based on a series of popular lectures delivered by the author to large audiences in Berlin. In the preface he says: "We accompany life in its conquest of the planet earth. Out of the boundless space, this earth first appears to us as a star. We rush to this star upon a meteorite. While this strange world-voyager glows and puffs and smokes, the fern forest on the ocean suddenly appears to benefit us. This glowing of the water is the work of living creatures, and thus we first enter upon the history of the triumph of life."

THE EVOLUTION OF MAN. By Wilhelm Boelsche. Translated by Ernest Untermann. Cloth, illustrated, 50 cents. Fourth thousand now ready. Professor Boelsche, of Berlin, is recognized as the leading popularizer of the evolution theory in Germany. His book is of a simple narrative, which makes his argument easy for even untrained readers to follow. It traces the history of man backward by aid of the bronze and stone tools and the fossils that show man's life-history on the earth to extend back a million years—much farther than was claimed by the earlier evolutionists. Starting then with the cave-man of the last backward step, he traces the ancestry of man backward step by step through ever simpler and simpler forms of life, until he reaches the animal consisting of a single cell. He shows then how this cell might have been developed from matter that we call "inorganic" by the action of the same forces that we see working in the universe today. The book is illustrated with many engravings showing the different forms of life through which man developed.

THE EVOLUTION OF MAN. By Wilhelm Boelsche. Translated by Ernest Untermann. Cloth, illustrated, 50 cents. First edition ready Sept. 1. This is a delightful and fascinating book. The idea worked out in it is that the life of living beings which receive impressions from the outside world, and act on those impressions, is a continuous process of adaptation as people do. The author brings a wealth of interesting facts to prove that it is true. He shows the progress of the most important peculiarities of plants have not been generally observed is that in most cases they are not the result of a conscious adaptation to conditions of animals. These new and most interesting exceptions to this rule, and he describes a few of these in full detail. Some of the most important contributions of recent years toward the rounding out of the evolution theory have been in the field of botany, and this little book, now for the first time put within the reach of English readers, is a most charming introduction to this field.

THE EVOLUTION OF MAN. By Wilhelm Boelsche. Translated by Ernest Untermann. Cloth, 59 cents. First edition ready Oct. 1. This is an original work by the translator of "The Evolution of Man." Mr. Untermann, an accomplished linguist, and a special student in biology as well as in social sciences at the University of Berlin, and within the last few years has done much important writing in American periodicals. The present volume is based on a series of articles which appeared in a prominent review, but their form has been popularized so as to offer few difficulties to the student who wishes to investigate the important subject of the relation of modern science to the working-class movement. The scope of the book is well indicated by the following:

TABLE OF CONTENTS. 1. Proletarian Science. 2. The Origin of the Working Class. 3. The Awakening of Philosophy. 4. A Step Forward in Greece. 5. A Step Backward in Rome. 6. The Slough of Ecclesiastical Feudalism. 7. The Struggle for More Light. 8. The Reorganization of Natural Philosophy in England. 9. Natural Philosophy in France. 10.
